A. Introduction

Purpose of the North Carolina Test Coordinator’s Policies and Procedures Handbook
The purpose of the North Carolina Test Coordinator’s Policies and Procedures Handbook is to provide public school unit (PSU) test coordinators with a reference for implementing proper test administrations for the Annual Testing Program.

This handbook provides information to ensure the integrity of the testing program is maintained, results generated from the program are valid, and any subsequent reporting is accurate and appropriate. To experience the complete functionality of this online resource, Testing News Network (TNN) users should log in to TNN. If a user is not logged in to TNN, some links will only take the user to the TNN log in screen. For more information about how to gain access to TNN, contact your regional accountability office.

Fundamental Testing Premises
It is essential for school personnel to develop proper testing procedures in order to provide accurate test data for decision-making.

- **Fairness.** Be fair and consistent in following policies and procedures.
- **Equality.** Students must have equal opportunity when taking tests. Any special arrangements or accommodations must be in accordance with the policies, procedures, and standardization expectations of the test. Special arrangements or accommodations must never be used for score enhancement.
- **Flexibility.** North Carolina-developed tests are curriculum-based tests designed to measure the objectives found in the state-adopted content standards. The tests are available in an online format (and paper format when there is a documented accessibility need). All students are allowed ample opportunity to complete the tests. Students with disabilities and students identified as English Learners (ELs) may also receive approved accommodations to complete certain tests.
- **Security.** Test security must be maintained at all times. Test materials must be stored in a secure, locked storage facility when not in use. A trained test administrator must always be present during the test administration. The test administrator must conduct an unbiased administration of the test according to the policies, procedures, and directions in the test administration guide and any subsequent updates shared by the Office of Accountability and Testing. Awareness of proper testing procedures helps ensure the integrity of the testing program, provides accurate test data, and gives PSUs the ability to use test data.
confidently as decisions are made for the improvement of student learning and achievement.

**Participation in the Annual Testing Program**

As stated in 16 N.C. Admin. Code 06G .0315 (a), “All students enrolled in a public school unit (PSU) in grades 3 through 8 or in high school courses in which an end-of-course (EOC) assessment is administered shall participate in the State Annual Testing Program. PSUs shall report to the North Carolina Department of Public Instruction (NCDPI) test results for:

1. beginning of grade 3 reading proficiency;
2. grades 3 through 8 end-of-grade (EOG) English language arts/reading and mathematics;
3. grades 5 and 8 EOG science;
4. grade 10 EOC English II;
5. grade 11 EOC assessments in NC Math 1, NC Math 3, and EOC Biology;
6. grade 11 ACT; and
7. grade 12 Career and Technical Education Concentrators and WorkKeys.”

Per State Board of Education (SBE) policy ACCT-021 [1B], “For the accountability model, a school that does not assess at least ninety-five percent of its expected test population for the all students group and each subgroup of students will be deemed not to have met participation rate requirements.”

There are three ways students may participate in the Annual Testing Program:

1. participation in the general state test under standard conditions (i.e., without testing accommodations);
2. participation in the general state test with testing accommodations; or
3. participation in a North Carolina alternate assessment, with or without testing accommodations.

For information regarding appropriate testing procedures, test administrators who provide accommodations for students with disabilities must refer to the most recent Testing Students with Disabilities Handbook and any published supplements or updates.

**The Test Development Process**

The test development process involves multiple checks and balances guided by testing experts and professionals. The test development process begins after new content standards are adopted by the North Carolina SBE. Stakeholders who serve in advisory roles to the test development process include the following:
Prior to the test development process, the standards to be measured are defined during test specification meetings. North Carolina educators collaborate and develop recommendations for a prioritization of standards indicating the relative importance of each standard, the anticipated instructional time, and the appropriateness of the standard for test design for each content area. Subsequently, test development staff from the NCDPI meet with various advisors to review the recommendations from the teacher panels and to adopt final weight distributions across the domains for each grade level.

Once test specifications are adopted, item writers and reviewers complete training on the new subject-specific content standards. The training also includes an overview of item writing, sensitivity, and bias guidelines. North Carolina educators start the item development process by creating new items with various advisors (see the bulleted list above) providing feedback on item quality throughout the eighteen-step test development process. The development process concludes with the NCDPI test measurement specialist evaluating the recommendations from all advisors and then finalizing and approving the item, reading selection, or test form.

Teachers interested in training to become an item writer or reviewer for the Annual Testing Program, should visit https://docs.google.com/forms/d/e/1FAIpQLSeR9185Py-rD8O0mluFe8l-hzBTT4i8pTDO6ySYJfcvx9IQw/viewform for more information.

Protocol for Communication
To keep individuals well informed regarding topics related to test development and policy, the Annual Testing Program supports two-way exchanges between communication levels that include ongoing dialogues at each level. Program questions and information should be channeled through the appropriate testing staff at each successive level. Staff members at the school level are encouraged to share questions related to testing and
accountability (e.g., questions pertaining to the EOG and EOC tests, testing students identified as ELs and students with disabilities, and testing accommodations) with the school test coordinator. If necessary, the PSU test coordinator will share these questions with the regional accountability office, who in turn will contact the NCDPI Office of Accountability and Testing.

Testing Policy and Operations
Regional Accountability Coordinators (RACs) and Regional Computing Consultants (RCCs)
IT Staff

Educational Directory and Demographical Information Exchange
The Educational Directory and Demographical Information Exchange (EDDIE) is a public-facing online application containing school district and school information such as district numbers, school numbers, select administrative contacts, addresses, grade levels, calendar types, and more. EDDIE does not contain individual teacher or student information. EDDIE is the authoritative source for NC public school codes and demographic information, and it is used by multiple systems, including The Office of Accountability and Testing, PowerSchool, and NC School Report Cards. EDDIE is also used to meet federal reporting requirements. PSUs are responsible for ensuring that EDDIE is kept up to date throughout the year.

The PSU test coordinator must be listed in EDDIE. The role is titled “Accountability” for districts and “School Testing/Accountability Coord” for other PSUs. If the test coordinator changes during the school year, please notify the regional accountability coordinator and ensure EDDIE is updated immediately to reflect the newly designated test coordinator for the PSU. Districts and schools are encouraged to have the same person in the test coordinator roles throughout the school year to ensure continuity and consistency.

Testing News Network
The TNN is a closed information and collaboration service sponsored by the Office of Accountability and Testing. The primary users of this service are district, charter, lab, and regional schools testing and accountability staff. Test coordinators should check the TNN News link on this site daily for testing information and updates.

The TNN is the information source of the Annual Testing Program for North Carolina Public Schools and is supported by the TOPS at North Carolina State University.
TNN’s dual missions are to
• provide secure dissemination of information to local school system test coordinators, and
• index critical events, policies, reports, communications, process details, and software upgrades for the testing programs of North Carolina Public Schools.

Information is placed on the TNN for electronic access by PSU test coordinators, NCDPI Office of Accountability and Testing staff, and TOPS staff at North Carolina State University. Persons other than these must obtain written permission from the NCDPI Office of Accountability and Testing to access and use this information.

**NCDPI Testing and School Accountability**
The Accountability and Testing website is a public resource that provides information about state tests, policies and procedures for testing, and accountability results.

**Nonpublic Schools Testing Service**
The Center for Urban Affairs and Community Services provides access to secure state test materials to nonpublic schools through the Nonpublic Schools Testing Service program. This program is sanctioned by the NCDPI and is operated on a cost recovery basis. All questions regarding nonpublic school testing should be directed to Brian Swiger at (919) 515-3642. For more information on the NPSTS, see [https://center.ncsu.edu/wp/main/educational-services/](https://center.ncsu.edu/wp/main/educational-services/).

**Help Desk**
Email requests are preferred for Help Desk communications and should be sent to ncdesk@ncsu.edu. Phone requests can be placed by calling (919) 515-1320 from 7:30 a.m. until 5:00 p.m., Monday through Friday (excluding holidays).

**Test Administration Guides, Publications, and Administrative Documents**
Test administration guides, publications, and administrative documents are available online within TNN under “Administrative Documents” and in print for each state-mandated test. These publications provide information and directions for administering tests and preparing documents for return to the test coordinator. Administration guides are not considered secure test materials.
**Testing Code of Ethics**
The *Testing Code of Ethics* (16 N.C. Admin. Code 06D .0311) stresses the importance of maintaining test security at all times and addresses appropriate professional practices for central office staff, school administrators, test coordinators, teachers (test administrators), and proctors in the areas of securing tests; administering tests; and scoring, reporting, and interpreting test results.

Ethical testing practices include the following:
- informing students about the tests and why the tests are important;
- informing students and parents about how the tests and test results will be used;
- preparing students to take the tests;
- ensuring all eligible students take the tests;
- encouraging students to attempt to respond to all test questions and do their best; and
- sharing the results of the tests (along with any available interpretation of the scores) with students and parents within the allotted timelines.

A copy of the *Testing Code of Ethics* is in Appendix O of this handbook and is also printed in the appendix of all North Carolina test administration guides. Before each test administration, test administrators and proctors (if utilized) must read and review thoroughly the *Testing Code of Ethics* and its sanctions, paying careful attention to section (q)—the unethical testing practices cited in the Code—and section (r)—the sanctions for violations of the Code. This document has the effect of law in North Carolina. Following the *Testing Code of Ethics* helps ensure testing is conducted in a fair and ethical manner in every classroom across the state. The *Testing Code of Ethics* is part of Title 16 of the Administrative Code and must not be removed from this document. A copy may be requested from the PSU test coordinator for reference.

Information regarding test security may be found in the publication *Testing Security Protocol and Procedures for School Personnel*. This publication is provided to principals, teachers, and other school personnel as a reference for implementing secure, uniform test administrations in North Carolina schools.

**Released Test Questions**
The Annual Testing Program has released tests available for most state-mandated tests. Released test forms reflect the currently adopted content standards and can be found by searching for the type of test at [https://www.dpi.nc.gov/testing-documents](https://www.dpi.nc.gov/testing-documents).
To navigate this site,
1. click the “Type of State Test” dropdown box to select a test type,
2. click the “Resource” dropdown box and select “Released Tests,” and
3. click “Apply.”

Released questions may also be accessed through the secure browser, NCTest apps for Chromebook and iPad, and via https://data.ncsu.edu/nctest/Destination.html by clicking on the released items icon.

Released questions and assessments are copyrighted by the NCDPI and cannot be uploaded into third party applications. These materials must not be used for personal or financial gain.

Copies of any documents or links to any webpages suspected of containing secure test questions or information from secure tests must be submitted to the Annual Testing Program through the RAC for clearance before use in the PSU. Appropriate documents or links that should be submitted for review are materials of which the origin is not known, or material that appears to include secure test questions and/or answers. It is important to note that PSUs and the Annual Testing Program work together to maintain the integrity of state tests and test security.

**Annual Testing Calendars and Required Testing Charts**
The following Annual Testing Program calendars and other required testing charts for the 2023–24 school year are available on the NCDPI website:
- **2023–24 North Carolina Operational Testing Calendar**—a comprehensive chart that includes all operational state-mandated tests by grade level, test name, and test administration dates.
- **The North Carolina Annual Testing Program Overview 2023–24**—an overview document that summarizes key facts about each state-mandated test.
- **North Carolina Testing Program Required Testing for the 2023–24 School Year**—a color-coded chart that denotes (1) federal testing requirements, (2) state testing requirements, and (3) inclusion of schools’ test results in the state’s accountability model.
- **North Carolina Testing Program Required Testing (with alternates) 2023–24**—a chart that includes all state-mandated tests with the corresponding alternate assessments, if available.
- **2023–24 Testing for Read to Achieve at Grade 3**—a list of tests associated with the Read to Achieve legislation (G.S. § 115C-83.1).
Assessment Briefs
Assessment Briefs are publications that contain information related to testing and accountability and may be helpful when explaining certain aspects of the Annual Testing Program to staff, students, parents, and guardians. Assessment Briefs can be found on the NCDPI’s website at the following address: https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/testing-policy-and-operations/assessment-briefs.

Test Specification Information
Test specification documents are available for each state-mandated test administered by the Annual Testing Program. These documents provide technical information about the tests, such as types of questions, number of questions, delivery mode, assessed standards, and the weight distribution (percentage) of each assessed domain. Test specification information for state-mandated tests is located at https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/technical-information-state-tests.

Information about Test Questions
North Carolina state tests contain a small portion of field test questions, which do not count toward or against a student’s score. These questions are indistinguishable from operational questions and should not interfere with students’ test-taking experiences. The NCDPI does not share field test questions embedment information with regional accountability offices, schools, parents, or students.
B. Roles and Responsibilities

All individuals in the testing community play a vital role in maintaining a secure testing environment at every level—from test development to administration of the tests, to scoring and reporting. Section B of this handbook outlines the roles and responsibilities of key individuals who are responsible for overseeing all aspects of the Annual Testing Program. The following responsibilities reflect in detail the duties established in the Testing Code of Ethics.

Responsibilities of the North Carolina Department of Public Instruction

The NCDPI shall develop, revise, publish, and provide timely updates to PSUs on the policies and procedures required for proper test administrations. These guidelines shall be provided through the regional accountability offices.

The NCDPI shall supply required tests and supporting materials to the PSUs. The NCDPI shall develop, procure, distribute, and bear the cost of such testing materials necessary for the administration of tests mandated by the SBE. The NCDPI shall score or have scored all tests in the Annual Testing Program and shall provide scoring and interpretative services to the PSUs.

In the unlikely event there is a stand-alone field test, an internal committee of directors or their designee for Academic Standards, Exceptional Children, Charter Schools, Federal Programs, Advanced Learning, as well as the Superintendent’s Principal Advisor and the Superintendent’s Teacher Advisor, reviews any submitted appeals from participation. The resulting recommendation(s) is presented to the State Board of Education for approval or denial.

Training Expectations

PSU test coordinators should ensure testing staff are trained annually, as appropriate, on these resources.

- Policies and Procedures Training Course—Online Test Administrations
- Policies and Procedures Training Course—Paper Test Administrations
- The Proctor’s Guide or Proctor’s Guide Training Video
- Test administration guides
- Testing Students with Disabilities Handbook
- Guidelines for Testing Students Identified as English Learners
- Testing Code of Ethics
Please note that this is not an all-inclusive list but a summary of specific resources that require annual training and verification of completion.

Verification of training. PSU test coordinators are permitted to collect digital signatures. Digital signatures are accepted in the following formats for training documents and annual agreements. Typed signatures are not permitted.
- Scanned document with handwritten signature
- ADOBE signature
- DocuSign

Information about storing training verification documentation is included in the specific training resources that follow.

Annual training of school personnel on the Testing Security Protocol and Procedures for School Personnel publication must occur early in the school year by either the use of the
- Testing Security Protocol and Procedures for School Personnel publication; or

It is best practice to review the video as part of a group training. A group setting provides an opportunity for staff to ask questions of the school test coordinator about test security.

School personnel must complete training annually by signing a training roster verifying training completion and by signing a confidentiality and test security agreement. These documents must be kept on file at the school for the current school year.

Documentation of training is an important part of an investigation following any security issue.

Expectations for the Policies and Procedures Training Courses
There are two virtual training courses available that review policies and procedures found in all test administration guides. The courses address content specific to either the online testing or the paper testing format. School staff facilitating, overseeing, or administering either an online or paper test or both are expected to complete the appropriate training course(s).
Certificates of completion are generated upon successful completion of each course.

- **The regional accountability coordinators** will establish an appropriate timeline for PSU test coordinators to complete the course(s). Regional accountability coordinators are expected to locally store course certificates of completion for the current school year (either via paper or electronically) for all test coordinators in their region.

- **District test coordinators** will establish an appropriate timeline for school test coordinators to complete the course(s). District test coordinators are expected to locally store certificates of course completion (either via paper or electronically) by a deadline determined locally for the current school year.

- **School test coordinators** will establish an appropriate timeline for school test administrators to complete the course(s). School test coordinators are expected to locally store certificates of course completion (either via paper or electronically) by a set deadline for the current school year. Note: Course certificates for test administrators who completed the course(s) the previous school year are valid until September 29, 2023.

Staff are not permitted to administer tests required by the Annual Testing Program without a valid certificate of completion on file.

**2023–24 course opening date.** The *Policies and Procedures Training Courses* will be available July 18, 2023. Directions for accessing the courses can be found in Appendix A of this handbook.

**Expectations for The Proctor’s Guide and Video**
The PSU test coordinator will conduct annual training with school test coordinators on *The Proctor’s Guide* publication or the Annual Testing Program’s *Proctor’s Guide Online Training Video*. It is a local decision to use proctors, but when used, they must be trained. For additional information, refer to the subheading in this section, *Duties of Proctors*.

**Training Mode Options**
Test administration training may occur either in-person or virtually. Test administrators must be provided with a printed version of the appropriate test administration guide before administering the test.

**Required Test Coordinator Credentials**
Test coordinators will need access to the NCTest Admin platform each year to carry out their duties. A username and password are required for access.

New test coordinators must create a new account at
https://center.ncsu.edu/ncauth. The regional accountability staff will then assign the test coordinator to the appropriate organization and assign applicable user roles in NCTest Admin. NCTest Admin will enable the test coordinator’s access to TNN News, administrative documents, and the test materials ordering system, the secure shell, as well as additional test administration resources. For additional information about NCTest Admin, refer to the NCTest Admin Guide posted on TNN > NC Education and NCTest Admin Guidance.

Selection and Training of District Test Coordinators
“The local superintendent in a local education agency (LEA) shall act as or appoint an LEA test coordinator to assist in the local administration, reporting, and interpretation of results of any ‘secure test,’ . . . administered in the Annual Testing Program” (16 N.C. Admin. Code 06D .0308 [a]).

As outlined in 16 N.C. Admin. Code 06D .0308 (b), “LEA test coordinators shall attend required monthly test administration training sessions provided by the North Carolina Department of Public Instruction on subjects including proper test administration, test security, appropriate use of accommodations, scanning and scoring answer sheets, and preparation of test materials for scoring at a central site.”

Duties of District Test Coordinators
After receiving test administration training from the NCDPI regional accountability office, “LEA test coordinators shall in turn conduct training in the Annual Testing Program for any school test coordinators” (16 N.C. Admin. Code 06D .0308 [c]). The district test coordinator will train local personnel who are responsible for test administration procedures. This training shall include procedures for test administrations that require accommodations and shall emphasize the need to follow the directions outlined by the test publisher.

District test coordinators shall perform or oversee the following procedures:
- Annually read and study the Testing Code of Ethics.
- Annually sign a confidentiality and test security agreement that must be kept on file with the RAC. The required District Test Coordinator Confidentiality and Test Security Agreement is included in Appendix D of this handbook.
- Ensure an annual written testing plan for the district is developed and distributed to each school before the beginning of the school year. The overall testing plan must include, but is not limited to, rules for test administrator training, test security, proper testing environment, administering secure tests, auditing test administrations, and preparing and returning secure test materials. A copy of the testing plan must be
submitted annually to the RAC. A sample Public School Unit Annual Testing Plan is included in Appendix E of this handbook and can be modified to fit the needs of the district.

- Per 16 N.C. Admin. Code 06D.0307(q), at the beginning of each school year, provide information to principals, teachers, students, and parents or guardians advising them of the local and state-mandated tests that students will be required to take during the school year, the dates the tests will be administered, and how the results from the tests will be used. Also, the information provided to parents or guardians must include whether the SBE or local board of education requires the test(s).

- Develop local policies and procedures to ensure maximum test security in accordance with the policies and procedures developed by the test publisher.

- Provide information about test security and inform staff of sanctions, penalties, or other possible consequences for test security violations.

- Designate the personnel who are authorized to have access to test materials. “Access” to test materials by school personnel means handling the materials but does not include reviewing tests or analyzing test items (16 N.C. Admin. Code 06D.0311).

- Assist the principal at each school in understanding the duties and responsibilities relative to the Annual Testing Program and the implementation of state tests.

- Ensure that all school principals and directors read and study annually the Testing Code of Ethics.

- Ensure that all school principals and directors read and sign annually the Principal/Director Confidentiality and Test Security Agreement. The original signed copies must be kept on file with the district test coordinator. The required Principal/Director Confidentiality and Test Security Agreement can be found in Appendix D of this handbook.

- Ensure that all school test coordinators read and study annually the Testing Code of Ethics.

- Ensure that all school test coordinators read and sign annually the School Test Coordinator Confidentiality and Test Security Agreement. The original signed copies must be kept on file with the district test coordinator. The required School Test Coordinator Confidentiality and Test Security Agreement is included in Appendix D of this handbook.

- Ensure school test coordinators have a copy of the Test Administrator Confidentiality and Test Security Agreement for test administrators participating in training for the administration of North Carolina state-mandated tests and that they are aware all test administrators at their school must sign the form before administering a test. The required Test Administrator Confidentiality and Test Security Agreement is included in Appendix D of this handbook.
• Ensure all test administrators sign the *Test Administrator Confidentiality and Test Security Agreement* at every test administration training session, and the signed forms are kept on file at the school.
• Ensure that student placement decisions are not solely based on test scores (SBE policy *SCOS-016*).
• Ensure the school test coordinator and test administrators are in compliance with 16 N.C. Admin. Code 06D .0307(a)(1)(2).
• To avoid the appearance of a conflict of interest and to protect test administrators from allegations of impropriety, a test administrator should not be assigned to administer a test in a room where his or her relative or ward is tested.
  o Relatives and wards include children, stepchildren, grandchildren, nieces, nephews, siblings, in-laws, and persons under the test administrator’s guardianship.
• Oversee the planning and implementation of training for school test coordinators, test administrators, and proctors.
  o It is a local decision to have proctors serve as additional monitors who help the test administrator assure testing occurs fairly.
• Maintain accurate attendance records for all training sessions and keep these records on file in the district testing office.
• Ensure each school establishes procedures to ensure all test administrators comply with the test publisher’s guidelines.
• Ensure all appropriate staff receive training in procedures for providing approved accommodations for state-mandated tests to students with disabilities and students identified as ELs.
• Ensure each school has a secure, locked facility in which test materials will be stored, and staff clearly understand test material handling and storage procedures. Access to the storage area must be limited to one or two authorized school personnel when secure materials are being stored. Unauthorized personnel (e.g., cleaning staff) must not have access to the storage area where secure materials are stored.
• Monitor to ensure the district and school plans for administering tests under secure conditions are implemented appropriately.
• Prohibit PSU employees from disclosing the general content of the tests or specific questions contained in the tests to persons other than authorized employees of the PSU.
• Ensure all eligible students are tested.
• Maintain accurate records of student membership and assist in identifying all students who are eligible to take the test in order to secure the appropriate quantity of materials.
• Order enough copies of test materials (i.e., test administration guides and supplemental testing materials). Only order paper materials for students with a documented accessibility need.
• Account to the NCDPI for all test materials received.
o Count and record the number of secure test materials, including supplemental materials, when the materials are first received.
• Report immediately to TOPS any discrepancies in the count.
• Develop a system of checking out and checking in of test materials to ensure that at each level of distribution and collection all secure materials are tracked, returned, and accounted for at each level of distribution.
• Ensure each school test coordinator:
  o develops and documents in writing a schoolwide testing plan for administering tests under secure conditions;
  o receives and stores test books, and other testing materials in a secure manner; and
  o has a system of checking out and checking in test materials to ensure all materials are returned and accounted for.
• Prohibit the reproduction of any or all parts of the tests. No person may copy, reproduce, or paraphrase the test materials in any manner or for any reason without express written consent of the test publisher.
• Train all school personnel on the appropriate use of test materials, test security, the Testing Code of Ethics, the Testing Students with Disabilities Handbook and published supplements, and the Guidelines for Testing Students Identified as English Learners document and published supplements.
• In conjunction with program administrators, ensure the need for test accommodations is documented and the accommodations are limited to specific needs.
• In conjunction with program administrators, monitor to ensure all documented accommodations are provided to students and to determine the extent the accommodations are used by the students during the test administrations.
• Ensure the security of test materials and the integrity of the Annual Testing Program are maintained at all times.
• Investigate all reports of testing irregularities and violations of ethical testing practices and immediately report them to the superintendent, principal or director, and RAC.
  o Determine the seriousness of reports of test security breaches, loss of test materials, failure to account for test materials, unauthorized reproduction or retention of test materials, or any other deviation from required security procedures.
• Declare a test misadministration when appropriate, using the appropriate procedures and documentation, and ensure students are administered a different, secure form of the test, if available. All misadministrations must be reported to the superintendent, principal or director, and the RAC, using the appropriate documentation and notification procedures.
• Use and follow all procedures in the Online Testing Irregularity Submission System (OTISS) to document and report all testing irregularities within five days of the occurrence.
• Account to TOPS for all test materials returned.
  o Count and record the number of secure test materials, including supplemental materials, when the materials are returned.
• Verify with TOPS that the number of secure materials returned matches the count taken when the materials were first received.

Duties of Charter, Lab, and Regional School Test Coordinators
The principal or director for charter, lab, and regional schools shall either serve as or designate a school test coordinator. After receiving test administration training from the NCDPI regional accountability office, the school test coordinator shall assist in planning test administrations, reporting and interpretation of test results, and performing other accountability measures in the Annual Testing Program. The school test coordinator will train school personnel who are responsible for conducting test administrations. This training shall include, but is not limited to, instruction on procedures for test administrations with and without accommodations and shall review the test administration directions outlined by the test publisher. Maintaining test security is a major responsibility of the school test coordinator. The school test coordinator is responsible for monitoring test administrations within the building and responding to situations that may arise during test administrations.

If the school’s testing occurs at the same time at one or more nonadjacent sites, ensure a trained site coordinator is assigned to each nonadjacent site.

The school test coordinator—and all site coordinators—are expected to be accessible to test administrators during the administration of secure state tests. Because of this accessibility requirement, the school test coordinator (and site coordinators) must not be given the responsibility of administering or proctoring a test.

School test coordinators shall perform or oversee the following procedures and responsibilities:
• Annually read and study the Testing Code of Ethics.
• Annually read and sign the School Test Coordinator Confidentiality and Test Security Agreement that must be kept on file with the RAC. The School Test Coordinator Confidentiality and Test Security Agreement is required for school test coordinators who report directly to their RAC and is included in Appendix D of this handbook.
• Ensure that the school principal or director reads and studies annually the Testing Code of Ethics.
• Ensure that the school principal or director reads and signs annually the test security agreement. The original signed copies must be kept on file with the school test coordinator. The required Principal or Director Confidentiality and Test Security Agreement is included in Appendix D of this handbook.

• Ensure all test administrators read and study annually the Testing Code of Ethics.

• Ensure all test administrators attend training for the state-mandated tests and sign the required test security agreement at the end of every training session. The test security agreements must be kept on file with the school test coordinator and should be available during the assessment monitoring process. The required Test Administrator Confidentiality and Test Security Agreement is included in Appendix D of this handbook.

• Ensure an annual written testing plan for the school is developed and disseminated to the school principal or director and appropriate staff before the beginning of the school year. The annual testing plan must include, but is not limited to, rules for test administrator training, test security, proper testing environment, administering the secure tests, auditing test administrations, and preparing and returning secure test materials. A sample Public School Unit Annual Testing Plan is located in Appendix E of this handbook and can be modified to fit the needs of the school. A copy of the school testing plan must be submitted annually to the RAC.

• At the beginning of each school year, collaborate with other school officials to provide information to teachers, students, and parents or guardians advising them of the state-mandated tests that students will be required to take during that school year, the dates the tests will be administered, and how the results from the tests will be used. Also, information provided to parents or guardians must include whether the state or the local school board requires the test(s).

• Establish any needed school policies and procedures to assure maximum test security in accordance with the policies and procedures developed by the test publisher.

• Provide information about test security and inform staff of sanctions, penalties, or other possible consequences for test security violations.

• Designate the personnel who are authorized to have access to test materials. “Access” to test materials by school personnel means handling the materials, but it does not include reviewing tests or analyzing test items.

• Assist the school principal or director in understanding their duties and responsibilities relative to the Annual Testing Program and the implementation of state tests.

• Establish procedures to ensure all test administrators comply with the test publisher’s guidelines.
• Oversee the planning and implementation of training for test administrators and proctors.
  o It is a local decision to have proctors serve as additional monitors that help the test administrator assure testing occurs fairly.
• Ensure all appropriate staff receive training in procedures for providing approved accommodations for state-mandated tests to students with disabilities and students identified as ELs.
• Maintain accurate attendance records for all training sessions and keep these records on file at the school.
• Ensure all eligible students are tested.
• Maintain accurate records of student membership and assist in identifying students who are eligible to take the test in order to secure the appropriate quantity of materials.
• Ensure the school has a secure, locked facility in which test materials will be stored and staff clearly understand test material handling and storage procedures. Access to the storage area must be limited to one or two authorized school personnel when secure materials are being stored. Unauthorized personnel (e.g., cleaning staff) must not have access to the storage area where secure materials are stored.
• Order enough copies of test materials (i.e., guides and supplemental materials). Only order paper materials for students with a documented accessibility need.
• Account to the NCDPI for all test materials received.
  o Count and record the number of secure test materials, including supplemental materials, when the materials are first received.
• Report immediately to TOPS any discrepancies in the number of materials received.
• Develop a system of checking out and checking in of test materials to ensure all secure materials are tracked, returned, and accounted for at each level of distribution and collection.
• Distribute test materials immediately before the test administration (16 N.C. Admin Code 06D .0311) unless otherwise authorized by the NCDPI.
• Accurately count and verify with each test administrator before the test administration the number of secure test materials, including supplemental materials, received.
• Immediately after each test administration accurately count and verify with each test administrator the number of secure test materials, including supplemental materials, that are returned to the secure, locked storage facility.
• Verify with TOPS that the number of secure materials returned by the school matches the count taken when the materials were first received by the school.
• Prohibit the reproduction of any or all parts of the tests. No person may copy, reproduce, or paraphrase in any manner or for any reason the test materials without the express written consent of the test publisher.
• Monitor to ensure plans for administering tests under secure conditions are implemented appropriately.
• Ensure the security of test materials and the integrity of the Annual Testing Program are maintained at all times.
• Prohibit school employees from disclosing the general content of the tests or specific questions contained in the tests to persons other than authorized employees of the school.
• In conjunction with program administrators, ensure the need for test accommodations is documented, and the accommodations are limited to specific needs.
• In conjunction with program administrators, monitor to ensure all documented accommodations are provided to students and to what extent the accommodations are used by the students during the test administrations.
• To avoid the appearance of a conflict of interest and to protect test administrators from allegations of impropriety, a test administrator should not be assigned to administer a test in a room where his or her relative or ward is tested.
  o Relatives and wards include children, stepchildren, grandchildren, nieces, nephews, siblings, in-laws, and persons under the test administrator’s guardianship.
• Train all school personnel on the appropriate use of test materials, test security, the Testing Code of Ethics, the Testing Students with Disabilities Handbook and published supplements (as appropriate), and the Guidelines for Testing Students Identified as English Learners document and published supplements (as appropriate).
• Emphasize to all school personnel that no person may copy, reproduce, or paraphrase the test materials in any manner or for any reason without the written consent of the test publisher.
• Inform personnel that any person who learns of any breach of security, loss of test materials, failure to account for test materials, or any other deviation from required security procedures must immediately report that information to the school principal or director and the school test coordinator, who in turn will inform the RAC.
• Ensure every student participating in the online test(s) has completed the online assessment tutorial at least one time before the test administration.
• Encourage a positive atmosphere for the test administrations.
• Maintain the confidentiality of individual student scores when reporting test results to the public and the media.
• Prohibit the reclassification of students or the assignment of a grade of “F” or “I” for the sole purpose of not having students participate in any state test.
• Ensure that student placement decisions are not solely based on test scores.
• Use and follow all procedures in the OTISS to document and report all testing irregularities within five days of the occurrence.
• Immediately report irregularities to the school director or principal and RAC. Submit completed and signed Irregularity Investigation Checklists, investigation summaries, and all pertinent investigation documentation to the NCDPI within five business days of the occurrence (or the date the incident was identified).
• Notify the school director and the RAC for consensus before deciding whether to declare a misadministration.

Duties of School Test Coordinators within Districts
According to 16 N.C. Admin Code 06D .0308 (d), “School test coordinators shall conduct training in the Annual Testing Program for any test administrators or proctors.” Additionally, the school test coordinator is responsible for monitoring test administrations within the building and responding to situations that may arise during test administrations. The school test coordinator must be accessible to test administrators during the administration of secure state tests. Because of this accessibility requirement, the school test coordinator should not be given the responsibility of administering or proctoring a test.

The school test coordinator shall perform the following:
• Adhere to the district testing plan and test administration schedules established by the NCDPI and the district test coordinator.
• Develop and document in writing a schoolwide plan for administering tests under secure conditions. For each testing session, the plan must include documentation of the accommodations and the nature of the accommodations each eligible student will receive.
• Cooperate with district and state officials in the event of an audit or monitoring visit to ensure the testing plans are implemented appropriately.
• Attend training sessions sponsored by the district test coordinator on the policies and procedures for conducting a proper test administration and for reviewing and processing test materials.
• Read and study annually the Testing Code of Ethics.
• Read and sign annually the school test coordinator’s test security agreement. The original signed copies must be kept on file with the district test coordinator. The School Test Coordinator Confidentiality and Test Security Agreement is included in Appendix D of this handbook.
• Count and record the number of secure test materials, including supplemental materials, when the materials are first received from the district test coordinator. Report immediately to the district test coordinator any discrepancies in the count.
• Store test materials in a secure, locked facility. Access to the storage area must be limited to one or two authorized school personnel while secure materials are being stored. Unauthorized personnel (e.g., cleaning staff) must not have access to the facility where secure materials are stored.
• Ensure test materials are distributed immediately before the test administration unless otherwise authorized by the Annual Testing Program.
• Accurately count and verify with each test administrator before the test administration the number of secure test materials, including supplemental materials, received. Immediately report any discrepancies in the count to the district test coordinator.
• Immediately after each test administration, accurately count and verify with each test administrator the number of secure test materials (including supplemental materials) that are returned to the secure, locked storage facility. Immediately report any discrepancies in the count to the district test coordinator.
• Return all test materials to the district test coordinator, as directed, immediately following the completion of the test administration.
• Count and verify with the district test coordinator that the number of secure test materials, including supplemental materials returned by the school, matches the count taken when the materials were first received.
• Select test administrators who meet the following criteria:
  o Per 16 N.C. Admin Code 06D .0307(a), “Only current or retired professional educators as defined in G.S. §115C-270.1(2) (an administrator, teacher, or student services personnel) or teachers who
    1. are employed by local education agencies (LEAs); and
    2. have training in the Annual Testing Program as required in Rule .0308 of this Section shall administer secure tests.”
  o To avoid the appearance of a conflict of interest and to protect test administrators from allegations of impropriety, a test administrator should not be assigned to administer a test in a room where his or her relative or ward is tested.
    ▪ Relatives and wards include children, stepchildren, grandchildren, nieces, nephews, siblings, in-laws, and persons under the test administrator’s guardianship.
• Train all school personnel on the appropriate use of test materials, test security, the Testing Code of Ethics, the Testing Students with Disabilities Handbook and published supplements (as appropriate), and the Guidelines for Testing Students Identified as English Learners document and published supplements (as appropriate).
• Ensure all test administrators attend training for each test in the Annual Testing Program and sign a test security agreement at the end of every training session. The test security agreements must be kept on file with the school test coordinator and should be available during the test monitoring process. The required *Test Administrator Confidentiality and Test Security Agreement* is included in Appendix D of this handbook.

• Emphasize to all school personnel that no person may copy, reproduce, or paraphrase the test materials in any manner or for any reason without the written consent of the test publisher.

• Inform personnel that any person who learns of any breach of security, loss of test materials, failure to account for test materials, or any other deviation from required security procedures must immediately report that information to the principal and school test coordinator, who in turn will inform the district test coordinator.

• Implement the district’s testing policies and procedures and initiate any additional school policies and procedures to ensure all eligible students are tested.

• Ensure every student participating in the online test(s) has completed the online assessment tutorial at least once before the test administration.

• Prepare the physical conditions for the testing room, including rooms to which students may be relocated.

• Cover or remove bulletin boards and instructional displays that contain content being measured or test-taking strategies.

• Cover or remove all reference materials on testing rooms’ walls, students’ desks, devices, or workstations that might be a source of direct answers.

• Encourage a positive atmosphere for the test administrations.

• Maintain the confidentiality of individual student scores when reporting test results to the public and the media.

• Prohibit the reclassification of students or the assignment of a grade of “F” or “I” for the sole purpose of not having the students participate in a state test.

• Ensure that student placement decisions are not solely based on test scores.

• Use and follow all procedures in the OTISS to document and report all testing irregularities.

**Public School Unit Test Coordinator’s Responsibilities for Ordering Test Materials**

The Annual Testing Program works closely with TOPS to manage the ordering and delivery of secure test materials. Test materials are ordered via the Online Order System maintained by TOPS on the TNN website. Test materials ordering and delivery methods include the following:

• ordering via NC Education (TNN Online Order System)

• ordering via an ordering system managed by a test vendor
• auto shipping to PSUs based on student membership data

Test coordinators receive notification and training for tests that use ordering methods other than the TNN Online Order System. For all tests, RAC approval is necessary before TOPS will ship paper orders.

When ordering test materials, PSU test coordinators shall complete and/or ensure the following:
• Provide accurate contact information within TNN so testing shipments are delivered to the correct address, and TOPS and NCDPI staff can contact the appropriate testing personnel, as necessary.
• Provide accurate test participation dates in the ordering system based on the testing calendar. These participation dates help with statewide planning and ensure receipt of materials in a timely manner. Ordering pages are not available until the participation dates are entered and training has been completed.
• Prepare estimates of the quantities of materials necessary for each test that is part of the Annual Testing Program. Estimates of guides and supplemental materials should be based on student membership. Paper test orders should be based on students’ documented accessibility needs.
• Carefully read the instructions, including any special instructions, on the ordering pages before placing orders.
• Order the appropriate number of test materials in a timely manner.
• Attend RAC trainings each month to obtain important information about upcoming tests, such as testing windows, and student eligibility.
• Check TNN regularly for notices regarding test materials.
• Ensure copies of any errata sheets or supplemental pages that are posted on TNN are provided to test administrators, as appropriate. Ensure accommodation forms (i.e., Braille, Large Print, One Test Item Per Page [OTIPP], and Large Print One Test Item Per Page) are ordered at least thirty school days (forty school days for Braille) before the test administration date (or as soon as the ordering system becomes available, if fewer than thirty days before testing).
• Establish an alternate point of contact so that materials can be received without incident or breach of security on days when the test coordinator may be out of the office and unavailable to receive shipments. Test security must be maintained at all times.
• Ensure each school has a secure, locked facility in which test materials will be stored, and the school staff clearly understands test material handling and storage procedures. Access to the storage area must be limited to one or two authorized school personnel while secure materials are being stored. Unauthorized personnel (e.g., cleaning staff) must not have access to the storage area where secure materials are stored.
• Inventory test materials upon arrival and inform TOPS immediately via email (group-topsdocs@ncsu.edu) or fax (919-515-4622) of any discrepancies in the shipment.
• Report nonreceipt of any materials to the RAC as soon as possible. The test coordinator must make every effort to ensure that materials are ordered so that they arrive in time to meet the demands of the testing schedule.
• Receive test materials delivered to PSUs. Materials should arrive two weeks before the beginning of testing, except for the test administration guides for the EOC and EOG tests, which are generally delivered three weeks before the beginning of testing.
• Account to the NCDPI for all test materials received by checking in all materials upon their arrival in the district and school.
• Follow the appropriate requirements in Section I (for districts) and Section J (for charter, lab, and regional schools) of this handbook for the return of test materials, the secure destruction of test materials, and the secure storage of test materials.

Duties of School Counselors
Per G.S. § 115C-316.1(a) counselors shall spend at least eighty percent of their work time providing direct services to students. Direct services do not include the coordination of standardized testing. During the remainder of their work time, school counselors shall spend adequate time on school counseling program support activities that consist of professional development; consultation; collaboration, and training; and program management and operations. “School counseling program support activities do not include the coordination of standardized testing.” However, “school counselors may assist other staff with the coordination of standardized testing.” The district determines how school counselors will assist with testing (e.g., trained as a test administrator or proctor). This policy does not apply to charter schools, lab schools, or regional schools.

Duties of Test Administrators
Per 16 N.C. Admin Code 06D .0307(a), “Only current or retired professional educators as defined in G.S. §115C-270.1.2 (an administrator, teacher, or student services personnel) or teachers who (1) are employed by local education agencies (LEAs); and (2) have training in the Annual Testing Program as required in 16 N.C. Admin Code 06D .0308 of this Section shall administer secure tests.”

While the North Carolina test administration guides outline the full test administrator’s responsibilities, those responsibilities specifically related to test security are as follows:
• Prepare for and attend a test administrator training session(s)
conducted by the PSU test coordinator or school test coordinator before each test administration.

- Attend training on the *Testing Students with Disabilities Handbook*, the *Guidelines for Testing Students Identified as English Learners* publication, and published supplemental documents when accommodations will be provided to eligible students, and follow the appropriate procedures for the use of accommodations during test administrations for students with disabilities and students identified as ELs.

- Read and sign the *Test Administrator Confidentiality and Test Security Agreement* (provided by the school test coordinator) at the end of every test administration training session. All signed test security agreements must be kept on file with the school test coordinator and should be available during the monitoring process. The required *Test Administrator Confidentiality and Test Security Agreement* is included in Appendix D of this handbook.

- Read and study thoroughly the appropriate test administration guide before the test administration. Review the student directions (script) and be prepared for the variations required by the testing conditions.

- Read and study thoroughly the *Testing Code of Ethics* before the test administration.

- Maintain test security at all times during the handling of test materials.

- Ensure each student tested has access to the appropriate test materials as specified in the test administration guide.

- Follow procedures for the distribution and collection of any supplemental materials as specified in the test administration guide.

- Count and record the number of secure test materials, including supplemental materials, before and after the test administration. Notify the school test coordinator or principal immediately of any discrepancies in the counts.

- Ensure students’ personal belongings are not accessed during testing.

- Ensure all cell phones (i.e., cell phones belonging to students, test administrators, and proctors) are turned off, and they, or any other electronic devices, are not accessed at any time during the test administration, including during the break(s).

- When testing students online, usernames and passwords should never be shared (e.g., test administrator credentials given to students, written on a board). User accounts are confidential.

- Before beginning an online test administration, confirm the student’s name and the appropriate test’s name are correctly identified on the student’s device.

- Administer the test to all eligible students.
• Conduct an unbiased administration of the test according to the policies, procedures, and directions in the test administration guide and any subsequent updates developed by the test publisher.

• Read directions to the students as they are written in the test administration guide. It is a violation of the Testing Code of Ethics to omit, rewrite, or paraphrase orally or in writing the instructions presented in the test administration guide.

• Monitor the test administration by moving quietly and frequently throughout the room and scanning the students’ work areas to ensure students follow the test directions, perform the required tasks, do not share responses, and those eligible have access to required accommodations.

• Do not, at any time, modify, change, alter, or tamper with student responses during or after the test administration.

• Do not, at any time, read test questions from students’ tests or take notes or photographs of secure items or post them on the internet or social media.

• Assist students with emergencies (including restroom breaks) during the test administration.

• Remain in the room throughout the entire test administration unless there is an emergency. If an emergency arises and the test administrator must leave the room, the school test coordinator must be notified to arrange for another trained test administrator to be present for the duration of testing.

• Prohibit visitors from entering the classroom during the test administration, except when required for state or local monitoring of test administrations or under extreme circumstances (i.e., emergency situations).

• Provide a positive test-taking environment. Avoid distracting behaviors (e.g., reading, conducting other personal or professional duties, talking or texting on cell phones, or working on any other electronic device).

• Follow the directions specified in the test administration guides for returning all used and unused testing materials and supplemental materials to the school test coordinator.

• For paper tests, under the direction of the school test coordinator, the test administrator must review under secure conditions in a group setting (i.e., three or more designated school personnel) each student’s responses and then transcribe the responses into the online testing system. Students’ responses are not to be modified during the review and transcription processes.

• On the day of the occurrence, immediately document and report testing irregularities to the school test coordinator, who will ensure the irregularities are submitted in the OTISS.
Duties of Proctors
It is a local decision whether to require proctors to “serve as additional monitors that help test administrators assure that testing occurs fairly” (16 N.C. Admin. Code 06D .0311). For vendor-made assessments, test coordinators must ensure the proctor guidelines from the test publisher are followed.

For PSUs that opt to assign proctors for state tests, the following best practices should be considered:

- The principal should be responsible for selecting proctors who are school staff or responsible adult community volunteers (i.e., age eighteen or older and not enrolled as a student in the K–12 PSU).
- The proctor assigned can be either (1) a one-on-one, full-time proctor (i.e., one proctor assisting one test administrator in a single testing room) or (2) a roving proctor (e.g., one proctor assisting up to three test administrators in three testing rooms).
- A proctor should not be assigned to proctor in a room where his or her relative or ward is to be tested. Relatives and wards include children, stepchildren, grandchildren, nieces, nephews, siblings, in-laws, and persons under the proctor’s guardianship.
- Additionally, a proctor should not be assigned to proctor with a test administrator who is a personal family member or a close acquaintance.
- Students should be informed before the day of the test administration that a proctor will be assisting the test administrator in monitoring their test administration.

Proctor Training Expectations
If proctors are utilized, they must attend a proctors’ training session before proctoring a test administration and understand and agree to perform the duties described. After receiving training by the PSU test coordinator, the school test coordinator is expected to conduct proctor’s guide training with proctors at the school either on a day before testing or the morning of the test administration.

Training at the school will include the following:

- review The Proctor’s Guide Online Training Video;
- review the Testing Code of Ethics;
- provide a copy of The Proctor’s Guide (electronic or paper); and
- complete the Proctor Confidentiality and Test Security Agreement form. This form must be completed each testing cycle (e.g., fall end-of-course [EOC] testing, spring EOC testing) and signed at the conclusion of proctor training. A copy of this signed form must be kept on file at the school for each proctor serving in any test administration for the school year.
C. Policies and Procedures for Statewide Tests That Are Not Provided by a Vendor

Section C of the *North Carolina Test Coordinator’s Policies and Procedures Handbook* includes policy guidelines and procedures that apply to the administration of all tests in the Annual Testing Program except those tests provided by a vendor (i.e., ACT, WIDA™). RACs and test coordinators are expected to ensure all appropriate staff are trained on this information before administering a test. School personnel must ensure the policy guidelines and procedures outlined in this section are implemented appropriately.

*Policies and Procedures Training Courses*
Expectations for the *Policies and Procedures Training Courses* are detailed in Section B of this handbook.

**Before Testing**
*Read and follow test security procedures.* The principal shall account for all test materials and shall ensure test security within the school building (16 N.C. Admin. Code 06D .0311). The following test security procedures must be studied and discussed during test administrator training:

Copying secure test materials
- Secure tests, including all test materials and test questions, must not be reproduced in any manner.
- Secure tests must not be copied, filed, or used directly in instructional activities, or posted on the internet or social media.
- No person may copy, reproduce, or paraphrase the test materials in any manner for any reason without the prior written consent of the Annual Testing Program.

Classroom instruction and study guides
- Excerpts from secure tests must not be used at any time during classroom instruction or in resource materials such as study guides.
- Instructional materials (online or paper copies) that contain sample test questions (whether generated locally or obtained from another school system) must be shared with the principal and school system test coordinator before use.
- Teachers are not permitted to discuss any information in the tests with students or colleagues before, during, or after the test administration or to ask students about test questions.
Displays
• Displaying information (e.g., bulletin boards, instructional displays, and reference materials printed or attached to student desks or devices) that contains content being measured or test-taking strategies (e.g., “Tips for Taking Tests,” displays, thinking maps, word lists, word walls, definitions, writing formulas, multiplication tables, number lines, mathematical formulas, or theorems) in any manner or form in the room during a test administration may result in a misadministration. These displays must be covered or removed prior to testing.
• Failure to cover or remove such displays during a test administration is considered a violation of the Testing Code of Ethics.

Testing environment
• All rooms designated for testing must be quiet, orderly, comfortable, with adequate seating, lighting, and heating or cooling.
• A “Testing—Do Not Disturb” sign should be ready to post outside the testing room.
• Each student must have enough space in which to work.
• Seating must be arranged to discourage students from sharing responses.
• For online testing, ensure spare devices and power sources are available, if needed.
• Ensure that study carrels or privacy shields are permitted only under the following circumstances:
  o The students’ assigned seats are multi-student desks (i.e., desks that seat two or more students).
  o The student has the Testing in a Separate Room accommodation (i.e., in a one-on-one or small group setting).
• Test administrators must contact the school test coordinator before the test administration if they have questions related to the testing environment.

Accounting for and storing test materials
• The test administrator must count and record the number of secure test materials and supplemental materials
  o when the materials are first received,
  o before the distribution of materials to students,
  o after the test administration, and
  o when the materials are returned to the school test coordinator.
• The test administrator must immediately report any discrepancies in the count to the school test coordinator or principal.
• For online testing, devices that are open and display the students’ start screens, test material, or are paused, must not be left unattended by the test administrator at any time.
• For online testing, any information from the online test saved or cached on any network appliance or device must be purged or deleted immediately following the completion of the test administration.
• Immediately following the test administration, the test administrator must return all testing materials to the school test coordinator according to the directions specified in the test administration guide.
• The school test coordinator shall collect, count, and return all test materials to the secure, locked facility.

Access to secure tests
• Access to secure tests must be limited to school personnel who have a legitimate need.
• For online testing, NC Education usernames and passwords must remain secure and must not be shared or compromised.
• School personnel must not disclose the contents of secure tests, discuss with each other or with students any of the test questions or information contained within the tests, or write about them or post them on the internet or on social media.
• Visitors to the classroom are prohibited during the test administration except when required for state or local monitoring of test administrations or under extreme circumstances (i.e., emergency situations).

Read aloud or signing/cueing test administrations
• Test administrators who provide read aloud or signing/cueing accommodations have the added responsibility of maintaining confidentiality because of the access they are granted for these types of accommodations. It is prohibited for test administrators who give these administrations to divulge the contents of the test, generally or specifically, to anyone or to copy or record test questions.

Know local testing procedures. During test administrator training, test administrators must be informed of the following local testing policies and procedures:
• local procedures for providing additional time to students needing more than the estimated time to complete the test;
• local procedures for contacting the school test coordinator during the test administration, if needed;
• local procedures to follow at the conclusion of testing for returning students to the regular school schedule; and
• local procedures for reporting a testing irregularity.

Technical Requirements for NCTest. The technical requirements for NCTest, which is used to deliver the online tests, are found at https://center.ncsu.edu/nct. Schools must review these technical
requirements several days before online administrations occur and must make any necessary adjustments before administering an online test.

**Complete the online readiness checklist.** Before administering any secure online test, school test coordinators must:

- ensure all devices meet all the specified technical requirements listed at https://center.ncsu.edu/nct.
- ensure test administrators have an NC Education user account. For questions about NC Education accounts, school TCs should contact the Help Desk at ncdesk@ncsu.edu or (919) 515-1320.
- ensure test administrators’ NC Education usernames and passwords are working correctly and grant access to the appropriate tests and student information pages. Usernames and passwords should be checked two to three days before the test administration date to ensure they function as expected and to view the password expiration date (https://center.ncsu.edu/ncauth/).
- ensure every student participating in the online test has completed the Online Assessment Tutorial at least one time per school year before the test administration.
- ensure screen savers are disabled for all devices and that volume controls are appropriately set for students requiring the *Test Read Aloud (in English)* accommodation.
- check to ensure all students who are participating in online testing are listed in the Enrollment tab list for the correct test in NC Education. Students who are no longer in membership may appear in this list. Test administrators may disregard students who are no longer in membership but are still listed in NC Education.
- Ensure test administration windows are scheduled in NC Education. The test window scheduler must be set no later than the day before the test administration date.
- Before test day, review and edit the student interface questions (SIQs) for students who need the following interface options or documented accommodations for online testing: alternate background color, large font, *Multiple Testing Sessions* accommodation, *Test Read Aloud (in English)* accommodation, or other required accommodations. SIQ's must be completed before test day.

**Enter Student Interface Questions (SIQs) for paper administrations.** On days before a paper test administration, if designated to do so by the school test coordinator, the test administrator marks the SIQ for Transcribe Online. By checking the Transcribe Online SIQ, the student is assigned the same test form number online as he or she is administered via paper. If the Transcribe Online SIQ is not selected, the student will not be assigned the same online and paper form number; therefore, the transcriber will not be
able to transcribe the student’s answers from the test book to the online test.

**Request to use an alternate device.** Prior written permission from the NCDPI is required to use any device that does not meet the required device guidelines. Authorized device guidelines can be found at [https://center.ncsu.edu/nct](https://center.ncsu.edu/nct). Letters to request the use of an alternate device must be sent to the Senior Director of the Office of Testing and Accountability at the following address:

Tammy Howard, Senior Director  
Office of Accountability and Testing  
NC Department of Public Instruction  
6307 Mail Service Center  
Raleigh, NC 27699-6307

**Testing room, testing violations, and testing irregularities.** On days before testing, teachers are expected to announce to students which items cannot be accessed in the testing room. (Test administration guides also include information about the use of prohibited items in the testing room.) The use of prohibited items may constitute a misadministration or violation of the [Testing Code of Ethics](https://center.ncsu.edu/nct).

**During Testing**  
**Monitor students during the test.** Test administrators and proctors must remain attentive to their testing responsibilities throughout the entire test administration. A primary responsibility is monitoring the test administration, which requires the test administrator and proctor to quietly and frequently walk throughout the room and scan the students’ work areas to ensure students are following the test directions, performing the required tasks, are not sharing responses, and those eligible have access to required accommodations.

**Maximum testing time allowed.** The Annual Testing Program requires that all students are permitted ample opportunity to complete required tests. However, no administration of state tests may exceed the maximum testing time (except for students with documented accommodations, such as Scheduled Extended Time).

**Internet security, security of test materials, and online content.** Test administrators, proctors, technology staff, and students must follow rules and procedures that ensure online content is not made available to anyone for any other purpose than to conduct the test. For more information about the policies and procedures to maintain internet security and security of
After Testing

**Complete special codes and accommodations used during testing.**

After administering any secure online test, school test coordinators must:
- ensure all Special Codes in NC Education have been completed before 7:00 p.m. on the day of the test administration. Refer to the *Complete the Special Codes* section of the specific test administration guide for additional information.

**Transcription Instructions.** For students with a documented need to record test answers in a manner other than directly entering them into the online testing system (e.g., paper test administration, audiotape recording, assistive technology device, braille writer/braille paper), after completion of the test administration, the test administrator or other designated school personnel must transcribe the students’ recorded responses into the online testing system. If the responses are not transcribed into the online testing system, the student will not receive a score.

Responses to gridded-response questions for the mathematics tests and the constructed response questions for the English II EOC test must be transcribed in the manner specified in the test administration guides.

Transcription and verification must occur under secure conditions in a group setting (i.e., three or more designated school personnel):
- one individual transcribes the student’s responses,
- a second individual verifies the transcription, and
- a third individual acts as an objective observer of the process.

When transcribing a student’s answers to the online system, the following steps must be followed:
- **Step 1.** Launch the NCTest Secure Browser and click on the NCTest login button.
- **Step 2.** Enter an NC Education username and password and click login.
- **Step 3.** Choose the appropriate test name from the drop-down menu. The test name will auto-populate; then click continue.
- **Step 4.** Select the appropriate student from the list presented on the screen.
- **Step 5.** Ensure the screen is set to the start page with the correct student’s name, test name, and school name near the top of the screen.
- **Step 6.** Click the start button to begin transcribing the student’s responses.
• **Step 7.** After all responses are recorded and verified, click the end test button. A stop sign will appear on the screen after the second end test button has been clicked and the test has been closed.

• **Step 8.** All three individuals must sign the transcription box on the front cover of the student’s test book.

• **Step 9.** The test administrator or principal’s designee must purge any electronic files associated with the test administration immediately following the completion of the transcription process.

**When to enter technical issues into OTISS.** When a student(s) is not able to successfully complete the test due to online test connectivity and/or technical problems, schools must report these problems in the OTISS on the day of the occurrence.

When the same technical issue is being reported for multiple students during the same test administration on the same day, only one OTISS report should be submitted. A list of all students affected should be attached to the OTISS report.

On the day of the technical issue, schools must enter the following information about each incident into the OTISS:
- test name (subject and grade level)
- test form number (available at the top of the screen)
- description of the incident
- number of students involved
- names of all students involved
- error message(s) (document the words verbatim)
- specific question number(s), if applicable
- secure platform being used (e.g., NCTest Chrome App on Chromebooks, NCTest Secure Browser, or NCTest iPad App)
- steps taken locally to resolve the issue
- Help Desk ticket number (If the Help Desk does not provide a ticket number, the caller should request one.)
- advice or solution offered by the Help Desk
- whether the issue was resolved or not resolved

Reports do not need to be entered for students who successfully complete the test despite a technical issue.

**Pack and return paper test materials.** Districts must refer to Section I of this handbook for the requirements for storing, returning, or destroying test materials after testing ends. Charter, lab, and regional schools must refer to Section J for the requirements for storing and returning test materials after testing ends.
Return and storage of test materials for accommodations. Upon completion of test administrations with approved accommodations, test administrators must

- return all completed Review of Accommodations Used During Testing forms to the school test coordinator to keep in the students’ IEP folders, Section 504 Plans, EL Plans, or transitory impairment documentation; and
- return all test materials for accommodations (e.g., original student responses recorded in the test book, and original scribe recordings of student responses if not recorded directly in a test book) to the school test coordinator.
Section D of this handbook includes a brief overview of the tests that are produced and managed by the NCDPI’s Office of Accountability and Testing and are required as part of the Annual Testing Program. Additional information about each test is in the specific test administration guide.

- **Beginning-of-Grade 3 Reading Test**
- **Read to Achieve Test**
- **End-of-Grade Tests**
- **End-of-Course Tests**
- **North Carolina Alternate Assessments**
Beginning-of-Grade 3 Reading Test

Purposes of the Test

Article 8 Chapter §115C of the General Statutes includes Part 1A, the North Carolina Read to Achieve Program. The goal of this program “is to ensure that every student read at or above grade level by the end of third grade and continue to progress in reading proficiency so that he or she can read, comprehend, integrate, and apply complex texts needed for secondary education and career success.” The North Carolina BOG3 Reading Test is linked to the Read to Achieve Program and serves several purposes:

1. It establishes a baseline measure of beginning third-grade students’ reading comprehension.
2. It satisfies the requirements of the Read to Achieve legislation for students who score achievement level 3 or higher on the test. Students who are not proficient on the EOG test but were proficient on the BOG3 Reading Test count as proficient in the performance composite and school performance grades.
3. It is used for school accountability growth and student growth for teachers and administrators.
4. It serves as a teacher-growth tool for determining those teachers who are well-suited to teach reading camps (G.S.§115C-83.3[4a]).

Eligible Students

All students in membership at grade 3 (according to PowerSchool) are expected to participate with or without accommodations in the administration of the BOG3 Reading Test. The only exceptions are as follows:

- Students with disabilities who, according to their IEP documentation, participate in the NCEXTEND1 alternate assessment in accordance with state policies.
- Transfer students who were administered the BOG3 Reading Test at the former school before moving must not be readministered the test. For school accountability purposes, students must not be tested two or more times with secure statewide tests unless the school system discovers a misadministration.

Testing Formats

The BOG3 test must be administered online. The only exceptions to this online testing requirement are for

1. PSUs granted an approved technology hardship request or
2. individual students with disabilities who have documented accommodations that dictate a paper test format is necessary for accessibility purposes.
Testing Window
- Traditional schools: first fifteen days of the school year (days 1–15)
- Year-round schools: first fifteen days of the school year beginning July 18, 2023
- For year-round schools opening before July 18, 2023: July 18th is day one of the fifteen-day BOG3 window. NCTest does not open until July 18, 2023.
- For year-round schools opening after July 18, 2023: the first day of school is day one of the fifteen-day BOG3 window.

Testing Schedule
- The BOG3 Reading Test must be administered in one day (except for administrations involving students with documented needs requiring accommodations, such as Multiple Testing Sessions).
- Schools do not need to administer the test to all students at grade 3 at the same time on the same day.
- The test should be administered as early in the school day as the school schedule permits; however, afternoon administrations are also permissible.
- For best practices, the Annual Testing Program strongly recommends schools schedule the BOG3 Reading Test within the school day for the maximum time allowed without interfering with lunch or bus schedules. All students, including students with the Scheduled Extended Time accommodation, must be allowed to eat lunch during the school day and to travel home at their regularly scheduled time.
- No BOG3 Reading Test administration may exceed the maximum time allowed (except those involving students with documented needs requiring accommodations, such as Scheduled Extended Time).

The BOG3 Reading Test’s content is “chunked” similarly to the Read to Achieve Test (RtA). The BOG3 Reading Test passages are divided into two parts with questions following each part. Questions pertaining to the entire passage are located at the end of the passage.

Preparing Students for Testing
Before the designated test administration date, teachers may help students improve test-taking skills by
- completing the BOG3 Reading Tutorial with students who will take the online BOG3 Reading Test; or
- completing the BOG3 Reading Test Practice Activity with students who will take the paper BOG3 Reading Test.

The BOG3 Reading Tutorial and the BOG3 Reading Practice Activity are not tests. They are provided to help students understand testing procedures that
will occur during the BOG3 Reading Test administration and to minimize student anxiety and errors on test day.
Read to Achieve Test

Purposes of the Test

General Statute §115C-83.7(a) states that the State Board of Education (SBE) “shall require that a student be retained in the third grade if the student fails to demonstrate reading proficiency appropriate for a third-grade student as demonstrated on a State-approved standardized test of reading comprehension administered to third-grade students.” Students may, however, be exempt from mandatory retention in third grade for good cause by demonstrating reading proficiency appropriate for third-grade students on an alternative assessment approved by the SBE. The RtA Test is a valid and reliable standardized alternative assessment of reading comprehension that has been approved for good cause by the SBE.

Eligible Students

Students who have not satisfied the grade 3 reading proficiency requirements of the RtA law are eligible to take the RtA Test.

Students who have satisfied the requirements of the RtA law through one of the following options or who have a good cause exemption are not eligible to participate in the RtA Test.

- The student scored achievement level 3 or higher on the BOG3 Reading Test.
- The student scored achievement level 3 or higher on the first administration of the grade 3 EOG Reading Test.
- The student passed the retest of the grade 3 EOG Reading Test.

Testing Formats

The Read to Achieve Test must be administered online. The only exceptions to this online testing requirement are for

1. PSUs granted an approved technology hardship request or
2. individual students with disabilities who have documented accommodations that dictate a paper test format is necessary for accessibility purposes.

Testing Window

There are three testing windows available for the administration of the RtA Test.

1. Spring—after the first administration of the grade 3 EOG Reading Test during the last ten days of the school year.
   - Schools must offer the RtA Test, the grade 3 EOG Reading Retest, or both, to eligible students during the spring window.
2. Summer—at the end of reading camp on a day designated by the PSU.
• PSUs (not including charter schools) must offer at least one opportunity for both students participating and not participating in a reading camp to demonstrate reading proficiency appropriate for third-grade students on the RtA Test, DIBELS 8 reading camp assessment, or the local alternative assessment approved by the SBE. If a student does not demonstrate proficiency on the DIBELS 8 reading camp assessment, the student should be given the opportunity to take RtA test at the end of reading camp.

• Charter schools are not required to offer reading camp or the RtA Test at the end of reading camp.

• Students do not have to attend any instructional days of reading camp to be eligible to take the RtA Test during the summer window. PSUs (not including charter schools) must offer at least one opportunity for students not participating in a reading camp to demonstrate reading proficiency appropriate for third-grade students on the RtA Test, or the local alternative assessment approved by the SBE.

3. Fall—by the November 1 midyear promotion of students placed in a transitional third- and fourth-grade class combination or a fourth-grade accelerated class.

• Schools must offer the RtA Test or the SBE-approved alternative assessment to eligible students during the fall window. Students in a transitional third- and fourth-grade class combination or a fourth-grade accelerated class can demonstrate proficiency and have the retention label removed by passing the RtA Test, passing the local alternative assessment approved by the SBE, or by having evidence of a completed student reading portfolio by November 1.

**Testing Schedule**

• The RtA test must be administered in one day (except for administrations involving students with documented needs requiring accommodations, such as *Multiple Testing Sessions*).

• Schools do not need to administer the test to all eligible students at the same time on the same day.

• The test should be administered as early in the school day as the school schedule permits; however, afternoon administrations are also permissible.

• For best practices, the Annual Testing Program strongly recommends schools schedule the RtA test within the school day for the maximum time allowed without interfering with lunch or bus schedules. All students, including students with the *Scheduled Extended Time* accommodation, must be allowed to eat lunch during the school day and to travel home at their regularly scheduled time.
• No RtA test administration may exceed the maximum time allowed (except those involving students with documented needs requiring accommodations, such as Scheduled Extended Time).

The RtA test’s content is “chunked” so that passages are divided into two parts with questions following each part. Questions pertaining to the entire passage are located at the end of the passage.

**Good Cause Exemptions**

**General Statute §115C-83.7(b)** reads, “Students may be exempt from mandatory retention in third grade for good cause, but shall continue to be eligible to participate in reading camps and receive literacy interventions appropriate for their age and reading level. Good cause exemptions shall be limited to the following:

1. Limited English Proficient students with less than two school years of instruction in an English as a Second Language program.

2. Students with disabilities, as defined in G.S. 115C-106.3(1), and whose individualized education program indicates (i) the use of the NCEXTEND1 alternate assessment, (ii) at least a two school year delay in educational performance, or (iii) receipt of intensive literacy interventions for at least two school years.

3. Students who demonstrate reading proficiency appropriate for third grade students on the alternative assessment approved by the State Board of Education.

4. Students who demonstrate, through a student reading portfolio, reading proficiency appropriate for third grade students. Student reading portfolio and review processes used by local school administrative units shall be approved by the State Board of Education.

5. Students who have (i) received literacy interventions and (ii) previously been retained more than once in kindergarten, first, second, or third grades.”

Schools must determine all good cause exemptions no later than the end of the third-grade year. Students with retained reading labels cannot receive good cause exemptions during a transitional third- and fourth-grade class combination or fourth-grade accelerated class. However, students in a transitional third- and fourth-grade combination class or a fourth-grade accelerated class can demonstrate proficiency and have the retention label removed by passing the RtA Test, achieving a 725 Lexile on the DIBELS 8 assessment during benchmark period, passing the local alternative assessment approved by the SBE, or by having evidence of a completed student reading portfolio by November 1.
After the November 1 deadline, the student with a retained reading label can complete a reading portfolio, pass the local alternative assessment, achieve a 725 Lexile on the DIBELS 8 assessment during a benchmark period, or pass the grade 4 EOG Reading Test by the end of the year and have the retained reading label removed.

In rare cases, students deemed medically fragile because of a significant medical emergency or condition and are unable to participate in the options used to satisfy requirements of the RtA law may be granted a medical exception. If the Annual Testing Program grants a student a medical exception for the regular (i.e., first) administration of the EOG reading test, it becomes the local board’s decision as to how the student will progress in accordance with the RtA law.

Students placed in fourth grade who have transferred from a non-North Carolina public school are not held to the requirements of the RtA law and do not need to participate in the fall RtA Test.
End-of-Grade Tests: Reading and Mathematics Grades 3–8 and Science Grades 5 and 8

**Purposes of the Tests**
- The grades 3–8 EOG reading and mathematics tests measure students’ proficiency on the *North Carolina Standard Course of Study (NCSCOS)* for reading and mathematics, adopted by the State Board of Education in June 2017.
- The grades 5 and 8 EOG science tests measure students’ proficiency on the *North Carolina Essential Standards for Science*, adopted by the SBE in February 2010.
- Test results for EOG test scores are used for school and district accountability in the accountability model and for federal reporting purposes.

**Eligible Students**

**Reading and mathematics.** All students in membership at grades 3–8 (according to PowerSchool), including students who have been retained in grades 3–8, are expected to participate with or without accommodations in the administration of the EOG tests in reading and mathematics.

**Science.** All students in membership at grades 5 and 8 (according to PowerSchool), including students who have been retained at grades 5 and 8, are expected to participate with or without accommodations in the administration of the EOG science tests.

The only exceptions to these eligibility requirements are students with disabilities who, according to their IEP documentation, participate in the NCEXTEND1 alternate assessment in accordance with state policies.

**Off-Level Testing**

Off-level testing (e.g., administering the grade 4 EOG test to students not in membership as fourth graders according to PowerSchool) is not permitted.

**Testing Formats**

All EOG tests must be administered online. The only exceptions to the online testing requirement are for
1. PSUs granted an approved technology hardship request and
2. individual students with disabilities who have documented accommodations that dictate a paper test format is necessary for accessibility purposes.
**Testing Window**

The EOG tests must be administered during the final ten days of the school year. For school systems that were required to adjust their school schedules because of adverse weather conditions or other emergencies, the testing schedule should be adjusted to fall within the state-approved testing window of the adjusted school year.

**TABLE 1. Testing schedule for End-of-Grade Tests**

<table>

<tr>
<th><strong>Online and Paper Administrations</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Testing combinations.</strong> All online and paper EOG testing combinations must be approved by the RAC before they can be used on test day.</td>
</tr>
<tr>
<td><strong>Mixed mode.</strong> Students can be administered the EOGs in mixed mode formats. For example, if a student is administered the mathematics test in the paper format, the reading test can be administered in the online format.</td>
</tr>
<tr>
<td><strong>Non-school day administrations.</strong> Testing is only permitted on regular school days. Testing is not permitted on Saturdays or Sundays.</td>
</tr>
<tr>
<td><strong>Consecutive school days.</strong> Administrations of the EOG tests do not have to occur on consecutive school days.</td>
</tr>
<tr>
<td><strong>Administering more than one EOG in one school day.</strong> The EOG tests should be administered as early in the school day as the school schedule permits. Schools may elect to administer either one or two EOGs in one school day (i.e., reading and science, or mathematics and science, or reading and mathematics); however, caution must be taken when scheduling testing to ensure that the maximum time allowed for these tests does not interfere with lunch or bus schedules. All students must be allowed to eat lunch during the school day and to travel home at their regularly scheduled time.</td>
</tr>
<tr>
<td><strong>Testing window.</strong> Schools do not have to test all students in the same grade starting on the same day or the same time, but all students must be tested within the state approved testing window.</td>
</tr>
<tr>
<td><strong>Exceeding maximum time.</strong> No EOG test administration (except for those involving students with documented needs requiring accommodations, such as <em>Scheduled Extended Time</em>) may exceed the maximum time allowed.</td>
</tr>
</tbody>
</table>
End-of-Course Tests: Biology, English II, NC Math 1, and NC Math 3

Purposes of the Tests
The EOC tests are used to sample a student’s knowledge of subject-related concepts as specified in the *North Carolina Standard Course of Study* (NCSCOS) for English II, NC Math 1, and NC Math 3, and the *North Carolina Essential Standards* for Biology to provide a global estimate of the student’s mastery of the material in the content area. The EOC tests were initiated in response to legislation passed by the North Carolina General Assembly—the North Carolina Elementary and Secondary Reform Act of 1984.

Eligible Students
According to 16 N.C. Admin. Code 06D .0309:

- public school students who are enrolled for credit in courses in which EOC tests are required shall take the appropriate EOC test at the completion of the course;
- public school students who are exempt from final exams by local board of education policy shall not be exempt from EOC tests;
- public school students shall take the appropriate EOC test the first time the student takes the course requiring the test;
- public school students shall take the appropriate EOC test at the end of the course regardless of the grade level in which the course is offered;
- public school students who are identified as failing a course for which an EOC test is required shall take the appropriate EOC test; and
- all eligible students shall participate in the administration of EOC tests (standard administrations with or without accommodations or an alternate assessment).

**Students enrolled for credit in courses in which EOC tests are required and do not have a proficient EOC test score.** Students enrolled in courses that require the administration of the EOC test but have not obtained a proficient score on the EOC test prior to enrolling in the course, must take the appropriate EOC test at the completion of the course.

**Students enrolled for credit in courses in which EOC tests are required and have a proficient EOC test score.** Students enrolled in courses that require the administration of the EOC test and have obtained a proficient score previously on the EOC test may use the proficient EOC score as at least twenty percent of their final grade, or they may elect to retake the appropriate EOC test at the completion of the course and use the most recent score for the final grade calculation.
Advanced Placement (AP) Biology, International Baccalaureate (IB) Biology, Cambridge Biology II, Biology II, and General Biology II courses. Students enrolled in AP Biology, IB Biology, Cambridge Biology II, Biology II, and General Biology II courses must be administered the EOC Biology test at the completion of the course with the exception of students who have (1) previously obtained a test score from the EOC test or (2) transferred from out-of-state or from a nonpublic school in which the principal authorized course credit for having participated in the test by recording the appropriate reason code in PowerSchool. Students meeting these exceptions are not eligible to take the EOC Biology test.

Repeating a course for credit. Repeating a course for credit refers to a high school course repeated via any delivery method when the entire NCSCOS for that course is being taught to the student for a second time (SBE policy CCRE-001). Students are permitted to repeat a course for credit when they have failed a course. However, local boards of education may develop policies that define specific circumstances when students other than those who fail a course may repeat a course for credit. Students repeating a course for credit who have already scored at Level 3, 4, or 5 on the associated EOC test may elect to either retake the EOC or use the previous passing EOC score as at least twenty percent of their final grade. If the student retakes the EOC, the higher of the two scores will be used in the calculation of the final grade. Students who initially fail a high school course and repeat the course for credit, upon completion of the repeated course, must take the associated EOC, and the new course grade shall replace the previous grade for the course. When a student repeats a course for credit and passes the course, the student only earns credit towards graduation once.

Credit recovery. Per SBE policy CCRE-001(6), credit recovery refers “to a block of instruction that is less than the entirety of the Standard Course of Study for that course. Credit recovery delivers a subset of the Standard Course of Study or blueprint of the original course in order to specifically address deficiencies in a student’s mastery of the course and target specific components of a course necessary for completion. . . . When credit recovery is exercised, the original record of the course being completed and failed will remain on the transcript. The LEA shall allow a grade of pass or fail for each credit recovery course. The mark will not affect the student’s GPA. . . . The End-of-Course (EOC) exam associated with the credit recovery course may be administered no later than 30 days upon the completion of the credit recovery course.”
EOC Results Used as Twenty Percent of the Final Grade

16 N.C. Admin Code 06D .0309(c) states that “PSUs shall adopt policies and use results from all EOCs as a minimum of twenty percent of the student’s final grade for each respective course with the exception of:

1. students whose Individualized Education Programs (IEPs) created under the Individuals with Disabilities Education Act, 33 U.S.C. 1414, and regulations adopted pursuant to that Act, exclude their EOC results from their final grades;
2. English Learner (EL) students, as defined in 25 CFR 30.101, in their first year in a United States school; or
3. students enrolled in a course during the initial implementation year of the new EOC for that course where proficiency scores are not available due to standard setting.”

Withdrawal from an EOC Course
Per 16 N.C. Admin. Code 06D .0309(i), “PSU students may drop a course with an EOC within the first 10 days of enrollment in a semester block schedule or within the first 20 days of enrollment in a yearlong traditional schedule. Students who are enrolled for credit after the 10 or 20 days shall not drop a course with a required EOC and shall participate in the EOC administration at the completion of the course.”

Any changes in EOC enrollment after the tenth or twentieth day must follow the Process for Notification of Withdrawals that can be found in the 2023–24 Annual Testing Program and Accountability Requirements memo. All notifications of withdrawals are to be submitted in accordance with the memo. Any necessary schedule changes for EOC enrollment should take place following notification of the decision from the Office of Accountability and Testing.

Testing Window
Test administrators must administer the EOC test during the last five days (4x4, semester courses, and summer school) or the last ten days (traditional yearlong schedule) of the instructional period. For school systems that were required to adjust their school schedules because of adverse weather conditions or other emergencies, the testing schedule should be adjusted to fall within the final five days (4x4 or semester) or last ten days (yearlong) of the adjusted school year. Any student absent (i.e., not present) from the test administration must make up the test. The PSU test coordinator will specify how tests are to be handled at the school and will schedule dates and times for completing makeup tests in each school so that all makeups are completed within the five- (semester) or ten-day (yearlong) testing window.
**Testing Formats**
All EOCs (i.e., English II, Biology, NC Math 1, and NC Math 3) are required online administrations. The only exceptions to this online testing requirement are for
1. PSUs granted an approved technology hardship request and
2. individual students with disabilities who have documented accommodations that dictate a paper test format is necessary for accessibility.

If PSUs do not have the technology capability to support administering the required online test(s), or a paper format is necessary for accessibility for students with disabilities, see Section G, subsection Technology Hardship Requests of this handbook.

PSUs should prioritize scheduling the online administrations of the EOC tests in the following order: English II, NC Math 1, Biology, and NC Math 3.

**TABLE 2. Testing schedule for End-of-Course Tests**

<td><strong>Two tests administered in one school day.</strong> When scheduling two tests in one day, caution must be taken to ensure that the maximum time allowed for these tests does not interfere with lunch or bus schedules. All students must be allowed to eat lunch during the school day and to travel home at their regularly scheduled time.</td>
</tr>
<tr>
<td><strong>Non-school day administrations.</strong> Testing is only permitted on school days. Testing is not permitted on Saturdays or Sundays.</td>
</tr>
<tr>
<td><strong>Combining courses.</strong> Different EOC courses cannot be combined for online or paper administrations. Courses must test separately.</td>
</tr>
<tr>
<td><strong>Exceeding maximum time.</strong> No EOC test administration (except for those involving students with documented needs requiring accommodations, such as Scheduled Extended Time) may exceed the maximum time allowed.</td>
</tr>
</tbody>
</table>
North Carolina Alternate Assessments

According to 16 N.C. Admin. Code 06G .0315, all students with disabilities are required to participate in the statewide testing program by taking either the general state-mandated tests with or without accommodations or by participating in North Carolina alternate assessments with or without accommodations. To participate in alternate assessments, students must meet specific eligibility criteria established by the Annual Testing Program, and the decision to participate in the alternate assessments must be documented in the students’ current IEPs.

North Carolina’s Alternate Assessments
NCEXTEND1 Grades 3–8, 10, and 11 Alternate Assessments
The NCEXTEND1 reading and mathematics alternate assessments (grades 3–8 and 10) and the science alternate assessments (grades 5, 8, and 10) measure the North Carolina Extended Content Standards adopted by the SBE in 2011. The NCEXTEND1 at grade 11 is provided as an alternate to The ACT test as required per General Statute § 115C-174.11(c)(4). The grade 11 assessment includes English Language Arts (ELA)/reading, mathematics, and science questions. All NCEXTEND1 assessors must:

- have training in the specific content area being assessed and the contents of the alternate assessment administration guide,
- be familiar with the North Carolina Extended Content Standards (i.e., reading and mathematics) and North Carolina Extended Essential Standards (i.e., science),
- be the student’s primary teacher for the assessed content area, and
- have routine contact with the student during classroom instruction.

College and Career Readiness Alternate Assessments (CCRAA)
Grades 10 and 11
The College and Career Readiness Alternate Assessments (CCRAAs) at grades 10 and 11 are available for students with disabilities who are following a course of study that, upon their completion of high school, may not lead to admission into a college-level course of study resulting in a college degree. The CCRAA at grade 10 is the alternate assessment for the PreACT; the CCRAA at grade 11 is the alternate assessment for The ACT.

For test-specific information about the NCEXTEND1 grades 3–8, 10, and 11 Alternate Assessments, or the CCRAA at grades 10 and 11, refer to the Testing Students with Disabilities Handbook.

WIDA Alternate ACCESS
For information about the WIDA Alternate ACCESS assessment, refer to the WIDA Assessments section of this handbook.
E. Required State Tests Provided by Vendors

Section E of this handbook includes a brief overview of the tests that are required as part of the Annual Testing Program and are provided to schools by external vendors. Additional test administration information for these tests can be found in the resources provided by the vendor. The required state tests provided by vendors include the following:

- **WIDA Assessments**
  - WIDA Screener for Kindergarten
  - WIDA Screener Online
  - ACCESS for ELLs©
  - WIDA Alternate ACCESS

- **ACT Assessments**
  - PreACT
  - The ACT
  - ACT WorkKeys
WIDA Assessments

Participation in the Annual Testing Program
English Learners are expected to test per General Statute § 115C-174.11(c)(1), “The State Board of Education (SBE) shall adopt the tests for grades three through 12 that are required by federal law or as a condition of a federal grant. These tests shall be designed to measure progress toward reading, communication skills, and mathematics for grades three through eight, and toward competencies for grades nine through 12. Students who do not pass the tests adopted for eighth grade shall be provided remedial instruction in the ninth grade.” Further information about testing students identified as ELs can be found in SBE policy TEST-011.

Identification of English Learners
Per SBE policy TEST-011, “to be identified as English Learners (ELs), students indicating a language other than English on the Home Language Survey (HLS) must be assessed using the state EL identification test at initial enrollment. Thereafter, all students identified as ELs must be annually assessed using the state EL proficiency test.”

WIDA Screener for Kindergarten
The WIDA Screener for Kindergarten is the state-identified EL proficiency identification test given to students in kindergarten and in the first semester of grade 1.

WIDA Screener (Online)
The WIDA Screener Online is the state-designated EL proficiency identification test given to students in grade 1 (second semester) through grade 12.

Screener administration window
Initial assessment of both the WIDA Screener for Kindergarten and the WIDA Screener Online is required within thirty calendar days of enrollment. Note: PSUs also have the option to initially assess language-minority students up to thirty calendar days before the start of school.

WIDA Screener (Paper)
The WIDA Screener is also available in paper format; however, the paper format is permissible only to individual students with disabilities who have documented accommodations in their IEPs or Section 504 Plans that dictate a paper format is necessary for accessibility. Test materials must be requested through and approved by the RAC.
ACCESS for ELLs

The ACCESS for ELLs is the state-designated EL proficiency test administered annually to kindergarten through twelfth-grade students who have been identified as ELs.

Test design. All students identified as ELs must be administered all four test domains annually during the state-designated testing window. If one or more domains cannot be administered, schools must follow state specific guidance provided by the Office of Accountability and Testing.

Testing window. Annual testing must occur during the state-designated testing window. The testing window is January 22–March 8, 2024.

Paper tests. Online administration is required for ACCESS for ELLs testing; however, the paper format is permissible for individual students with disabilities who have documented accommodations in their IEPs or Section 504 Plans that dictate a paper format is necessary for accessibility.

Note: Kindergarten ACCESS is only available in paper format.

WIDA Alternate ACCESS. The WIDA Alternate ACCESS is the alternate assessment for the ACCESS test. The WIDA Alternate ACCESS is for students in grades 1–12 who are identified as ELs and have significant cognitive disabilities that prevent their meaningful participation in the ACCESS for ELLs test. Additional information on the WIDA Alternate ACCESS can be found at https://wida.wisc.edu/assess/alt-access or located in the Testing Students with Disabilities Handbook or the Guidelines for Testing Students Identified as English Learners publication.

Test Administrator Training

The WIDA Screener for Kindergarten, WIDA Screener (online and paper), ACCESS for ELLs, and WIDA Alternate ACCESS training courses are not provided by the Annual Testing Program; they are provided by the vendor in the WIDA Secure Portal. Each training course has specific certification requirements. Test administrators must obtain certification for each test. Certification includes the completion of the training course, all associated elements, and any quizzes.

If a staff member administers ACCESS for ELLs in the online and paper modes, both training courses (online and paper) are required to be completed, and the test administrator must have certification in both modes prior to administering any test. Test administrator certification is required annually, and test coordinators are responsible for ensuring test administrators are certified for each test and mode administered prior to the opening of the yearly testing window. Refer to the North Carolina State
Specific Guidance for WIDA Assessments for training specifics for each assessment.
ACT Assessments
All North Carolina tenth graders take the PreACT, eleventh graders take The ACT, and students who are identified as Career and Technical Education (CTE) concentrators take the ACT WorkKeys assessment.

PreACT
- The PreACT is administered annually to all eligible tenth graders.
- The PreACT is a state required test per G.S. § 115C-174.22.
- The PreACT simulates The ACT testing experience. It is shorter than The ACT but has the same four subtests as The ACT: English, reading, math, and science.
- The multiple-choice test predicts future success aligned to The ACT test and provides both current achievement and projected future ACT test scores on the 1–36 ACT score scale.
- Detailed Results and Item Response help to identify students’ specific strengths and weaknesses. Additional reporting insights on STEM, Career Readiness, and Understanding Complex Texts are provided.
- The PreACT assessment is designed to help parents and educators identify areas where students may need additional academic support or remediation. The PreACT can also help to initiate strategic conversations between parents and schools regarding dual enrollment decisions, identifying curriculum gaps, implementing interventions on behalf of students, and choosing Advanced Placement classes.
- The test administration window is October 9, 2023–November 17, 2023.

The ACT
- The ACT is administered annually to all eligible eleventh graders.
- The ACT is a required state assessment for all eligible eleventh graders per G.S. § 115C-174.11(4). (Retained eleventh graders who do not have a score from the state-sponsored administration of The ACT from their first year in eleventh grade are eligible and expected to test during the state-sponsored administration of The ACT during their second year in eleventh grade.)
- The ACT is a curriculum- and standards-based assessment that evaluates eligible eleventh graders’ college and career readiness in English, mathematics, reading, and science.
- Each section of The ACT is multiple-choice and is scored on a 1–36 point scale. The composite score is the average of the four subject test sections.
- The ACT is used for college admissions, placement, and scholarships. It is accepted by most colleges and universities in the United States.
- The ACT provides a path to increase student access to postsecondary and workforce opportunities.
• Additional reporting and insights on STEM, Career Readiness, and Understanding Complex Texts are provided.

**Test dates for The ACT.** Three test dates and windows are available for spring 2024 testing.
• The Calendar Conflict request process is no longer necessary, as all three test dates are available to all schools.
• Schools are expected to offer both an initial and makeup test date.
• It is recommended that test date one and window one are used for the initial test date(s) and test dates two and three and test windows two and three are reserved for makeup test dates.
• No additional test dates will be available, and schools should plan accordingly.

**ACT WorkKeys**

- The WorkKeys assessments are required for all eligible Career and Technical Education (CTE) concentrators per G.S. § 115C-174.25.
- The three WorkKeys assessments—Applied Math, Graphic Literacy, and Workplace Documents—are the basis of the WorkKeys National Career Readiness Certificate (WorkKeys NCRC).
- The Applied Math test measures critical thinking, mathematical reasoning, and problem-solving techniques for situations that occur in today’s workplace.
- The Graphic Literacy test measures the skills needed to locate, synthesize, and use information from workplace graphics. Workplace graphics come in a variety of formats, but all communicate a level of information. From charts to graphs, diagrams to floor plans, identifying what information is being presented, and understanding how to use it are critical to success.
- The Workplace Documents test measures the skills people use when they read and use written text such as memos, letters, directions, signs, notices, bulletins, policies, and regulations on the job. The assessment is defined through a combination of the text complexity level of a reading passage and the skill elicited by the item.
- Students who achieve qualifying scores on the Applied Math, Graphic Literacy, and Workplace Documents assessments can earn a WorkKeys NCRC at the Bronze, Silver, Gold, or Platinum levels of readiness. The nationally recognized certificate provides employers with information on the skill levels of potential employees and aids with employment, promotion, and training decisions.
- The WorkKeys standard and accommodated testing windows are as follows:
  - Fall 2023: November 6, 2023–December 8, 2023
  - Spring 2024: February 19, 2024–March 15, 2024
- All WorkKeys testing must be administered online unless a paper format is necessary for students with a documented need for accessibility purposes, or the school has an approved technology hardship request on file with the Office of Accountability and Testing. Paper test materials must be ordered through ACT during the appropriate test material ordering window.
F. Preparation for the Test Administration

Annual Testing Plans
The PSU must ensure an annual, written testing plan is developed and distributed to the school(s) before the beginning of the school year. The plan must include, but is not limited to, rules for test administrator training, test security, proper testing environment, secure test administrations, test administration audits, and preparation and return of secure test materials. Plans should also be available in electronic format and include “sample” documents that are used as supports for the testing plan. An electronic copy of the testing plan must be submitted annually to the RAC. See Appendix E of this handbook for a Sample Public School Unit Annual Testing Plan.

School Testing Environment
All test administrations must be conducted in an unbiased and uniform manner. It is essential the scores for all tests represent the best estimate of the students’ knowledge and mastery of the concepts. Before and during the test administration, the test administrator must promote an informative, positive, and supportive atmosphere to minimize student anxiety regarding the test.

When designing learning spaces, many teachers consider flexible seating choices such as adaptive seating. Adaptive seating may include, but is not limited to, round tables, standing desks, stability and yoga balls, working on the floor with a clipboard, sitting on a couch, or sitting on a floor mat at a table. Students must be positioned in a suitable manner for testing so that no other student is able to see another student’s test. For the administration of all tests in the Annual Testing Program, all rooms with adaptive seating that have been designated for testing (including those to which students may be relocated), must be approved by the RAC before they can be used on test day.

The Annual Testing Program strongly discourages large-scale administrations (e.g., those that occur in a library or cafeteria) that include large groups (multiple classes) of students. Test administrations that occur under these conditions may result in misadministrations. If testing is to take place in a facility other than a classroom, special effort may be required to establish and maintain a proper testing environment.

Visitors to the classroom are prohibited during the test administration except when required for state or local monitoring of test administrations or under extreme circumstances (i.e., emergency situations).
During all administrations of North Carolina tests, displaying information regarding content being measured or test-taking strategies in any manner or form in the room, whether printed or attached to student desks or devices, may result in a misadministration. These displays must be covered or removed. Examples include, “Tips for Taking Tests” displays, word lists, thinking maps, word walls, definitions, writing formulas, multiplication tables, number lines, and mathematical formulas and theorems. Failure to cover or remove these displays during a test administration is considered a violation of the Testing Code of Ethics. Test administrators must contact the school test coordinator before the test administration if they have questions related to the testing environment.

**Monitoring Students during Test Administrations**
A primary responsibility of the test administrator is monitoring the test administration. Each student must complete the test without assistance for the scores to reflect the student’s ability. During training, test administrators must be made aware of the types of student assistance they are permitted to provide during the test. More information about how test administrators should monitor students during testing can be found in the Testing Security Protocol and Procedures for School Personnel publication.

**Test Forms**

**Online test forms.** Different versions of a test are assigned to students testing online. The different versions are equated statistically and are parallel in content, so comparisons of performance within and across test administrations can be made.

**Paper test forms.** Since all testing is required online, there are minimal paper forms in use. The paper forms are available only to individual students with disabilities who have documented accommodations that dictate a paper test format is necessary for accessibility.

**Test Administration Training Format**
School test coordinators may conduct training virtually or in-person, using either an electronic or hard copy of the test administration guide. The test administrator must thoroughly read and study the guide (electronic or hard copy) before attending the training session, so the school test coordinator can answer any questions the test administrator may have. All test administrators must receive a hard copy of the guide before administering the test.

**Test Materials**

**Removal of answer sheets.** Effective with the 2023–24 school year and beyond, answer sheets will no longer be used for paper test administrations.
All students with a documented need for a paper format will mark their answers in the test book. When testing is complete, the test administrator or principal’s designee will transcribe the student’s answers from the test book to the online testing system. Additional information about the transcription process is located in the Transcription Instructions section of this handbook.

**Test administrations guides.** Test administrators must utilize the hard copy of the appropriate test administration guide when conducting test sessions.

**Distribution of test materials.** The PSU test coordinator provides schools with the test materials specified in the appropriate test administration guide. In turn, school test coordinators provide test administrators with these appropriate test administration materials. Test administrators must be provided with a printed version of the appropriate test administration guide before administering the test. All other test materials must be distributed to test administrators immediately before each test administration and returned to the principal or school test coordinator at the end of each test administration. Test administrators are responsible for all materials in their care.

In order to administer statewide tests to North Carolina students in a fair and equitable manner, only the testing materials that are specified in the appropriate test administration guide or are part of an approved accommodation are allowed during the test administration.

The PSU test coordinator provides schools with the test materials specified in the appropriate test administration guide. School test coordinators also provide directions to test administrators for distributing the test materials.

Placing test materials on students’ desks before the beginning of a test administration is a violation of the procedures outlined in the test administration guides and the Testing Code of Ethics.

Except for scratch paper, graph paper, periodic tables, and writing utensils, the test administrator should not give students additional materials during the test administration without the prior written consent of the Annual Testing Program. Only supplemental materials specified in the appropriate test administration guide (or published supplements or updates) may be used during the test administration. Books, textbooks, thesauruses, bookmarks, multiplication tables, number lines, music, cameras, cell phones, personal learning devices, personal computers (if not used for testing), smartpens, smartwatches, or any other electronic devices are prohibited during the administration of any test in the Annual Testing Program.
At no time are proctors to be alone with secure test materials, including devices with tests open on the screen (e.g., start screen, pause screen, questions displayed). Proctors must not pick up test materials from or return test materials to the school test coordinator at the beginning or the end of testing. Every effort must be made to minimize unauthorized access to secure state tests before and after each test administration.

**Calculator Use**

Students should use calculators that are routinely used during classroom instruction and on classroom tests during the school year when taking state tests. Students who routinely use more than one calculator during classroom activities may be permitted to use more than one calculator during the test administration. Students may use calculators with more than the minimum requirements (e.g., fraction keys, graphing capabilities), if those additional features are not prohibited. However, school systems should be cautioned that the use of these features without prior training may confuse students and adversely affect their performance during the test administration.

An online calculator is available for students testing online. The online calculator meets the minimum calculator requirements for the specific test. Both a scientific calculator and a graphing calculator are available online for grade 8 mathematics. A handheld calculator is not required for online test administrations; however, students who routinely use a handheld calculator during classroom instruction and on similar classroom tests or have not had enough practice using the online calculator, should be provided a handheld calculator during the test administration. A student may also require a handheld calculator for accessibility purposes, when appropriate.

To access the North Carolina testing version of the online calculators visit

- Four-function calculator [https://www.desmos.com/testing/northcarolina/fourfunction](https://www.desmos.com/testing/northcarolina/fourfunction)
- scientific calculator [www.desmos.com/testing/northcarolina/scientific](www.desmos.com/testing/northcarolina/scientific)
- graphing calculator [www.desmos.com/testing/northcarolina/graphing](www.desmos.com/testing/northcarolina/graphing)

All online calculators are free to use and are accessible for students who are visually impaired and blind. For more information, visit [www.desmos.com/accessibility](www.desmos.com/accessibility).

**Calculator restrictions.** Students are not allowed to share calculators during test administrations, nor are they allowed to use calculators with the following functionalities:

- calculators with wireless communication technologies (e.g., Bluetooth, Infrared, or Wi-Fi)
• calculators with built-in computer algebraic systems (CAS) capable of doing symbolic algebra (e.g., factoring, expanding, or simplifying given variable output) or symbolic calculus
• calculators built into cell phones or other electronic communication devices (Cell phones and electronic devices are not permitted during state test administrations.)
• calculators in pen input or stylus-driven devices (e.g., palm-based devices, tablets, laptops, notebooks, and computers)
• calculators requiring access to an electrical outlet (except for students approved via an Accommodation Request)
• calculators that make noises of any kind that cannot be disabled (except for students approved via an Accommodation Request)
• calculators that use a QWERTY (typewriter-style) keyboard
• calculators that use paper tape

Students requiring the use of a calculator via a handheld device (e.g., tablet or notebook computer) or laptop must be approved via an Accommodation Request. Pocket organizers with a calculator function are not permitted.

The following list includes calculators not permitted for use on North Carolina tests. The list is not all-inclusive. If the PSU test coordinator believes calculator brands other than those listed below may need to be restricted, then the RAC must be contacted for confirmation before excluding them.
• Texas Instruments: All model numbers that begin with TI-89 or TI-92, Voyage 200, Nspire CAS (TI-Nspire CX CAS and TI-Nspire CAS with touchpad)
• Hewlett-Packard: HP 48GII and all models that begin with HP 40G, HP 49G, or HP 50G
• Casio: Algebra fx 2.0, ClassPad 300, and all models that begin with CFX-9970G
• virtual calculators, downloaded calculators, calculator apps
• calculators accessible by desktop, laptop, or other devices (e.g., iPad and Chromebook)

Texas Instruments TI-Nspire calculators without CAS are allowed only in the following two cases:
1. with the TI-84 Plus keypad or
2. with the Nspire keypad using operating system 1.7 or higher with both “limit geometry functions” and “disable function grab and move” invoked in Press-to-Test mode.

Before beginning and immediately following a test administration that requires calculator use, the test administrator or principal’s designee must clear the calculator memory and all applications (including preloaded) from
all calculators that will be used during each administration of the test. Only the test administrator or principal’s designee is permitted to carry out this procedure. Procedures for clearing the calculator memory (including standard memory, ROM, and Flash ROM) that are appropriate for the specific calculator model(s) must be used. The test administrator or principal’s designee should use caution when clearing calculators because different calculators require different procedures. In some cases, the calculator’s memory and applications are cleared or disabled and in others, they are permanently deleted.

Because the memory and all applications must be cleared and all data stored in the calculator erased, students who wish to use their own calculators must be told before test day to back up all data and programs that they wish to save. After the test administration, the test administrator or principal’s designee should enable the memory and applications of the students’ calculators.

Comprehensive clearing procedures for calculators most frequently used in the state are available in the applicable test administration guide. In addition, major calculator vendors have support teams who assist test administrators in clearing calculators. Vendor contact information can be obtained through the PSU test coordinator.

Note: As curricula and technology change, the policy concerning calculator requirements on North Carolina tests will be reevaluated.

**Minimum Calculator Requirements**
The minimum calculator requirements for each state test that requires calculator use are listed in the following chart. Additional features (e.g., fraction keys, graphing capabilities) are permitted, but are not required. The NCDPI does not endorse any brand of calculator.

**TABLE 4. Minimum calculator requirements**

For additional information on the Annual Testing Program’s calculator requirements, refer to the [North Carolina Calculator Requirements Assessment Brief](https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/testing-policy-and-operations/assessment-briefs).

**Instruction Before Test Day**

During the school year, teachers shall provide instruction that meets or exceeds the state-adopted content standards to give students an opportunity to learn the objectives measured by the tests.

Before the designated test administration date and according to the [Testing Code of Ethics](https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/testing-policy-and-operations/), teachers may help students improve test-taking skills by “helping students become familiar with test formats using curricular content; teaching students test-taking strategies and providing practice sessions; helping students learn ways of preparing to take tests; and using resource materials, such as test questions from test item banks and linking documents, in instruction and test preparation.”

Before the day of the test, teachers should explain to students that the test administrator (and proctor, if utilized) will move quietly and frequently throughout the room to scan the students’ work areas to ensure students are following the test directions. While monitoring online and paper test administrations, test administrators (and proctors, if utilized) are not to read test questions from students’ test books or from devices with test questions displayed on the screen, nor are they to take photographs of, or notes about the test questions, or otherwise create a record of information contained
within them. Test administrators (and proctors, if utilized) must be made aware of what they can and cannot do to assist students during the test administration.

**Teachers must not jeopardize the security of the test forms.** Teachers are not permitted to discuss specific questions from the tests with students or colleagues before, during, or after the test administration or to ask students which test questions were difficult. For example, if students approach a teacher to ask about test questions, teachers should remind them that they are not permitted to share any of the test questions or information contained within the test or to write about them on the internet or on social media. Teachers must not use test questions or information from students as the basis for additional instruction or review. Instead, teachers should provide instruction and review on the state-adopted content standards. Excerpts from the tests must not be used at any time during classroom instruction or in resource materials such as study guides.

**Notifying Parents of Required State Tests**

According to [16 N.C. Admin. Code 06D .0307](#), “LEAs shall, at the beginning of each school year, provide information to students and parents or guardians advising them of the districtwide and state-mandated tests that students will be required to take during that school year. In addition, LEAs shall advise students and parents or guardians of the dates the tests will be administered and how the results from the tests will be used. Also, information provided to parents shall include whether the State Board of Education or the local board of education requires the test(s).”

On days before testing, the school should inform the students and parents about the purpose of the test and that students

- are scheduled to take a test(s) surveying their knowledge and mastery of skills as specified in the state-adopted content standards;
- should attempt each question or prompt on the test;
- should bring a writing utensil;
- should not bring extra scratch paper, dictionaries, thesauruses, reference books, textbooks, music, cameras, thumb drives, smartpens, smartwatches, cell phones, or other electronic devices;
- should bring a novel or any other reading material that is not a textbook or contains instructional content (e.g., magazines) to read after they complete the test administration; and
- will be informed of any local and state policies regarding the use of test results.
Suspended Students

**Short-term suspension.** According to General Statute § 115C-390.5, “the principal shall have authority to impose short-term suspension on a student who willfully engages in conduct that violates a provision of the Code of Student Conduct authorizing short-term suspension. . . . A student subject to short-term suspension shall be provided the following:

- the opportunity to take textbooks home for the duration of the suspension;
- upon request, the right to receive all missed assignments and, to the extent practicable, the materials distributed to students in connection with the assignment; and
- the opportunity to take any quarterly, semester, or grading period examinations missed during the suspension period.”

Students with short-term suspensions are required to take the appropriate state-mandated test(s). The school must arrange to test these students in a location (e.g., central office) that is mutually agreeable to parents or guardians. The school test coordinator must ensure test security is maintained and all procedures contained in the test administration guide are followed throughout the test administration(s).

**Long-term suspension.** According to General Statute § 115C-390.7, “a principal may recommend to the superintendent the long-term suspension of any student who willfully engages in conduct that violates a provision of the Code of Student Conduct that authorizes long-term suspension. Only the superintendent has the authority to long-term suspend a student.”

The PSU decides if it will provide students with long-term suspensions the opportunity to take the appropriate state-mandated test(s). If the opportunity is provided, the school must arrange to test these suspended students in a location (e.g., central office) that is mutually agreeable to parents or guardians, and the school test coordinator must ensure test security is maintained and all procedures contained in the test administration guide(s) are followed throughout the test administration(s). If a long-term suspended student is still enrolled in the school and is tested, the test results will be official and will be included in the student’s record and in accountability results. A long-term suspended student who is still enrolled in the school and is not tested will count against school participation rates.

**Hospital and Homebound Testing**

PSUs must establish policies and procedures for providing hospital and homebound services to public school students who are temporarily confined at home or in a health care facility. PSUs must ensure that students who receive hospital and homebound services participate in the EOGs, EOCs, and all other state-required test administrations. Medical exceptions may be
submitted, if appropriate. (All medical exceptions must be approved by the Annual Testing Program.) For accountability purposes, the test results of a hospital or homebound student must be included in the accountability results at the base school.

Hospital or home testing is subject to the same policies and procedures as regular test administrations.

**Scheduling.** Hospital and homebound testing must occur during the state-designated testing windows.

**Training.** Staff members administering a test to a hospitalized or homebound student must be included in the school’s test administrator training and must review the test administration guide before the test administration. The PSU test coordinator is to be contacted if there are any questions regarding the test administration.

**Before test day.** The test administrator or the school test coordinator must ensure the parent or guardian is aware of the following testing policies and procedures as they relate to test security and the testing environment:

- For the protection of the school, it is recommended that two school staff members are present on-site for the test administration. It is a local decision as to which staff members are assigned to the off-site test administration.
- For the protection of both the student and the teacher, the presence of a responsible adult is required on-site (not in the testing room). If a parent, guardian, or other responsible adult is not present on-site, then the test administrator must terminate the testing session. The parent, guardian, or responsible adult must stay on-site for the entirety of the test session.
  - During the test, only the test administrator, the proctor (if utilized), and the student being assessed are permitted in the testing room.
  - Under extreme circumstances (i.e., emergency situations, medical treatment breaks) the parent, guardian, or responsible adult may enter the testing room.
  - If a test administration must be paused because of a bathroom break or emergency, the test administrator must follow the procedures in the test administration guide for taking a break. Test materials must always remain secure.
- Home security system cameras must not record the test session.
- Electronic devices, cell phones, recording, listening, scanning, or photographic devices are prohibited in the testing room.
- The testing room should be quiet, without outside interruptions, and have appropriate supplies (e.g., table, chair).
• All pets, except for service animals, should be confined before the arrival of the test administrator.
• An effort should be made to eliminate any distractions during the test administration (e.g., doorbells, televisions, music, telephones, outside noises, siblings, pets).

Note: There may be unique circumstances that dictate the need for testing to occur outside the hospital or home setting. Decisions must be made on an individual basis. The location, such as a library conference room or a school office, should be mutually agreed upon. A responsible adult must always be on-site (not in the testing room). The hospital or homebound teacher or the test administrator is not required to transport the student.

Materials. The test administrator must check out test materials from the school test coordinator, administer the test on the designated test date, and return the materials to the test coordinator at the end of testing each day. Test materials must not be checked out overnight. All materials must be accounted for each day.

Note: On the day of a test administration, the test administrator must notify the school test coordinator immediately of any change in the student’s status or in the home or hospital conditions that may necessitate rescheduling or cancelling the test administration.

Testing in a North Carolina Juvenile Detention Center
PSUs must establish policies and procedures for providing services to public school students who are temporarily confined in a North Carolina Juvenile Detention Center. Students are often still listed on base school enrollment when served by the North Carolina Juvenile Detention Center (NCJDC) and then move into the school enrollment of the Division of Juvenile Justice and Delinquency Prevention after adjudication. PSUs must ensure that students who are housed in NCJDCs participate in all state-required test administrations. Medical exceptions may be submitted, if appropriate. For accountability purposes, the test results for a student in a NCJDC must be included in the accountability results at the base school. Testing in a NCJDC is subject to the same policy and procedures as school-based test administrations.

Scheduling. Testing must occur during the state-designated testing windows.

Training. Staff members administering a test in a NCJDC must be included in the school’s test administrator training and must review the test administration guide before the test administration. The PSU test coordinator
is to be contacted if there are any questions regarding the test administration.

**Test day.** It is a local decision as to which staff members are assigned to the NCJDC test administration. During the test, only the test administrator, the proctor (if utilized), or additional trained school staff member, and the student being assessed are permitted in the testing room. Under extreme circumstances (i.e., emergency situations, medical treatment breaks) another adult may enter the testing room.

If a test administration must be paused because of a bathroom break or emergency, the test administrator must follow the procedures in the test administration guide for taking a break. Test materials must remain secure at all times.

The testing room should be quiet, without outside interruptions, and have appropriate supplies (e.g., table, chair). An effort should be made to eliminate any possible distractions during the test administration.

**Materials.** The test administrator must check out test materials from the school test coordinator, administer the test on the designated test date, and return the materials to the test coordinator at the end of testing each day. Test materials must not be checked out overnight. All materials must be accounted for each day.

Note: On the day of a test administration, the test administrator must notify the school test coordinator immediately of any change in the student’s status that may necessitate rescheduling or cancelling the test administration.

**Unexpected School Closings, Inclement Weather, or Student Dismissals and Testing Requirements**

Unexpected school closures and student dismissals are determined locally. The NCDPI recognizes the health and safety of the school community comes first. In the event a PSU is unable to administer state tests according to designated testing windows because of unexpected school closings, inclement weather, or student dismissals, the PSU should adhere to the following procedures:

1. The PSU test coordinator must notify the RAC of the school closing, impending weather condition, or student dismissal.
2. State tests should be rescheduled as soon as possible after the school returns to a normal schedule.
3. The PSU must submit all scores to the NCDPI by the data submission deadline unless an exception is requested and granted (see number 4).
4. The PSU may request an extension for submitting scores if it has evidence that shows the unexpected school closing, inclement weather, or dismissal affected its ability to meet the NCDPI data submission deadline. The PSU superintendent, principal, or director must submit the request via receipted mail to:

Tammy Howard, Senior Director
Office of Accountability and Testing
NC Department of Public Instruction
6307 Mail Service Center
Raleigh, NC 27699-6307

The request must include the following information:
• the name of the PSU;
• the PSU code;
• an explanation why the unexpected school closing, inclement weather, or student dismissal affected the ability to submit scores by the NCDPI data submission deadline; and
• the earliest date when all scores can be submitted to the NCDPI.

The superintendent, district or charter school test coordinator, principal or director is to contact the RAC with any questions regarding these procedures.

Note: In the event a PSU is unable to administer ACT tests (i.e., PreACT, The ACT, ACT WorkKeys) according to the designated testing window(s) because of unexpected school closings, inclement weather, or student dismissals, the PSU must contact the RAC for ACT-specific makeup testing policy and procedures.

**Testing Window**
Per General Statute § 115C-174.12(a)(4), “all annual assessments of student achievement adopted by the State Board of Education pursuant to G.S. § 115C-174.11(c)(1) and (3) . . . shall be administered within the final ten instructional days of the school year for yearlong courses and within the final five instructional days of the semester for semester courses. Exceptions shall be permitted to accommodate a student’s individualized education program and section 504 (29 U.S.C § 794) plans and for the administration of final exams for courses with national or international curricula required to be held at designated times.”

All state-mandated tests have a designated test date or testing window. The testing window is outlined in the North Carolina Operational Testing Calendar, which is posted on the NCDPI’s Accountability and Testing website.
Failing to administer the secure tests on the test date or during the testing window designated by the Annual Testing Program results in a testing irregularity.

**Request to Test a Student Outside the Testing Window**
Schools are expected to test within the designated test windows; however, there are certain circumstances that may require a student to test outside of the window. The Office of Accountability and Testing provides procedural documents to districts and schools that must be submitted to the RAC when requesting to test students outside the window. For more information about the testing outside the window procedure, PSU test coordinators should contact their regional accountability office.

**English Learners’ First Year in United States (US) Schools**
State Board policy [ACCT-021 (1)(D)(1)](http://www.ncpublicschools.org/instruction/assessment/standards/standards/index.html), states that “students identified as English Learners (ELs) shall participate in the statewide testing program using either the standard test administration or the standard test administration with accommodations. . . . ELs must participate in state assessments beginning with their first year in a US school; however,

- For the first year, the requirement is for participation and for reporting (e.g., NC School Report Card), not the accountability model.
- For year two, ELs’ test scores will be included in the growth analysis for the accountability model.
- For year three and beyond, ELs’ test scores will be included in growth and the achievement indicator of the accountability model.”

**Grade 8 Students Enrolled for Credit in NC Math 1**
State Board policy [ACCT-021 (1)(A)](http://www.ncpublicschools.org/instruction/assessment/standards/standards/index.html) states, “all eligible students in membership at grade 8 enrolled for credit in NC Math 1 shall take the EOC assessment at the completion of the course. Schools shall not assess these students on the grade 8 mathematics EOG assessment. These students will take the NC Math 3 EOC assessment for federal accountability in high school.” Students in membership at grade 8 who have an NC Math 1 EOC score (e.g., granted credit from an earlier grade level) should only be assessed on the test matching the current course enrolled (e.g., NC Math 3). These students do not take the grade 8 mathematics EOG.

**North Carolina Standardized Testing and Opting Out**
All students in North Carolina (including students with disabilities and students identified as ELs) are required to participate in the Annual Testing Program per state and federal requirements. North Carolina does not allow any student to opt out of required testing unless there are extenuating circumstances, primarily related to serious health conditions. [N.C. Admin.](https://www.ncpublicschools.org/instruction/assessment/standards/standards/index.html)
Code 06G .0315 requires all students in membership (i.e., enrolled in a school) participate in the Annual Testing Program.

The Every Student Succeeds Act (ESSA) requires each state educational agency to implement in each district and school, a set of high-quality academic tests that includes, at a minimum, annual tests in mathematics, reading or language arts, and science. Mathematics and reading or language arts tests are to be administered in each of grades 3 through 8 and at least once in grades 9 through 12. Science tests are to be administered at least once during grades 3 through 5, grades 6 through 9, and grades 10 through 12. Furthermore, as amended by 1005 of Public Law 114–95, ESSA requires state tests to “be the same academic assessments used to measure the achievement of all public elementary school and secondary school students in the State.” ESSA requires all states to “provide for the participation in such assessments of all students.” These federal requirements do not allow students to be excluded from statewide tests. Rather, they define the legal requirement that all students in the tested grades must be tested.

Parents and guardians who request that their students not be tested or refuse to allow their students to test must be informed of the state’s testing requirements and any possible academic outcomes for not permitting their students to test.

If eligible students are present in the classroom on test day, the test administrator must administer tests to all eligible students in membership. If a student attends a test session but chooses not to answer any test questions, they will be assigned the lowest possible score. Schools do not have the option to remove a student’s test from scoring. The student’s grade for the course and overall grade point average calculation may be negatively affected by receiving the lowest possible score.

A sample letter that PSUs may use to address parents’ or guardians’ concerns regarding testing mandates is found in Appendix B of this handbook.

Virtual Schools and Remote Instruction
Any school providing virtual or remote instruction to students (whether the school operates virtually full-time or operates a hybrid model of in-person and remote instruction) must adhere to all testing policies, procedures, and requirements as documented in public school laws of North Carolina in General Statutes, the N.C. Admin. Code, SBE policies, and all Office of Accountability and Testing test administration guides and handbooks.
G. Online Testing

Online Test Format
All test questions are formatted specifically for online testing and presented on the screen one test question at a time. Online tests provide several tools for students to use while testing, which include: reset, flag, strike, highlight, change highlight color, unhighlight, clear highlight, notepad, electronic pen, and help. Also, navigation buttons (i.e., first, back, pause, next, and review) are located at the bottom of the screen. Scroll bars appear on test questions as needed, based on the length of the test question or font size. Students can also increase the display by clicking “Ctrl,” shift, and “+” keys at the same time. Students have an opportunity to practice using these tools when completing the online tutorial.

Online tests are available in regular or large font and in alternate background colors (i.e., white, yellow, green, grey, cream, and black) to all students. The black background color is used for high contrast. The NCDPI recommends these options be considered only for students who routinely use similar tools (e.g., color acetate overlays, colored paper, alternate background color, and large print text) in the classroom. It is recommended that students are given the opportunity to view the large font and alternate background color versions of the Online Assessment Tutorial and released forms of the test (with the device to be used on test day) to determine which mode of administration is appropriate. For students to access large font, an alternate background color, the Test Read Aloud (in English) accommodation, or the Multiple Testing Sessions accommodation, the options must be entered in the student’s SIQ before the day of testing. After the test begins, the SIQ cannot be changed.

Sample—Checklist for Online Testing Readiness
The following is a sample readiness checklist that schools may use before test day to prepare school test coordinators, test administrators, and students for online testing. The checklist is not all-inclusive, and schools may modify as needed.
1. Test coordinator preparation
   - Check that all devices used for testing meet the minimum technical requirements for 2023–24.
     - Check that the secure browser is updated and used on all devices.
       - Check that the iPad app is updated. The app will open in Automatic Assessment Configuration.
     - Ensure that Chromebooks are managed using technology requirements. It is strongly recommended that they be placed in kiosk mode.
o Verify accommodations and accessibility features in NCTest Admin are accurate before the day of testing.

o Create a plan for:
  ▪ distributing devices and ensuring the school will have enough devices available to administer all tests within the five- or ten-day window,
  ▪ tracking students who have not completed testing,
  ▪ providing each room with the appropriate number of charged devices,
  ▪ ensuring devices stay charged throughout the administration, and
  ▪ distributing materials required for online testing (e.g., calculators, headphones).

2. Test administrator preparation
   • Verify NC Education account login is successful (username and password).
   • Power on and connect all devices used for testing to the network before test day. (This will ensure any updates or software deployment needed for testing is complete before test day.)

3. Student preparation
   • Complete the required online assessment tutorial.
   • Practice using the released tests within NCTest.
   • Practice using the online calculator.

**Testing Schedule for Online Tests**
Online tests should be administered as early in the school day as the schedule permits; however, afternoon administrations are also permissible. As best practice, the Annual Testing Program strongly recommends schools schedule each online test within the school day for the maximum time allowed without interfering with lunch or bus schedules. All students, including students with the Scheduled Extended Time accommodation, must be allowed to eat lunch during the school day and to travel home at their regularly scheduled time. Schools may elect to administer two tests in one day; however, caution must be taken when scheduling such testing to ensure that students can eat lunch during the school day and travel home at their regularly scheduled time.

**Acceptable Devices for Online Administrations**

**School-issued devices.** When accessing an online test, the Annual Testing Program recommends that students use devices that are school-issued with NCTest already loaded by the school.

**Student-owned devices.** When necessary, schools may permit students to use personally owned devices. Parents, guardians, and students should
collaborate with the school test coordinator for instructions on how to download NCTest to their personal devices. Directions for downloading NCTest to student-owned devices can be located via https://center.ncsu.edu/ncinstruct/. This link may be shared with parents, guardians, and students. Technical support will not be available at the NCDPI level and must be provided locally. It is not permissible to share the TOPS Help Desk phone number or email address with students, parents, or guardians.

All devices used for online testing, whether school-issued or student-owned, must have a pointing device included. This may be a touch screen, touchpad, external mouse, or other pointing device with which the student is familiar. It is a local decision to permit the use of a student-owned pointing device such as a hardwired or Bluetooth mouse. Schools must ensure that external pointing devices are compatible with the device utilized for testing. Pointing devices with recording capability are prohibited. In addition, schools must ensure that reference material attached to student devices containing content being measured or test-taking strategies are covered or removed prior to testing.

**Technical Specifications for NCTest**

To ensure students receive a valid and reliable test administration, schools must meet specific technical requirements. The technical specifications for NCTest, which is used to deliver the online tests, are found at https://center.ncsu.edu/nct. On days before an online test administration, schools must review these technical requirements and make any necessary adjustments before administering the online test. Schools that administer an online test but do not meet the technical requirements are at risk of providing students with questions that cannot be manipulated (e.g., technology-enhanced questions), are without associated artwork (e.g., tables, graphs, symbols), and do not fit properly on the screen.

**Setting Up Devices**

Test day login procedures for online testing are locally determined. For the 2023–24 school year, student login access codes will be available for EOGs and EOCs only. It is permissible to either
1. allow students to log themselves in to the test or
2. allow teachers to log in each student at a device.

School test coordinators are expected to develop, distribute, and train on a written plan that outlines secure procedures for schools to follow when students either remain or do not remain in the room while devices are being set up. The plan must address procedures that will ensure
• students cannot see secure test administrator usernames and passwords while the test administrator logs in to devices;
• students cannot see the secure student ID numbers and student access codes of others while logging themselves in to their device;
• upon login, each device is set to the start page with the correct student’s name and PowerSchool number, test name, and school name correctly identified on the device; and
• students do not begin using their devices until instructed to do so.

This plan must become part of the overall annual testing plan for the school system submitted annually to the RAC. (See the subsection Annual Testing Plans of this handbook for more information.)

Procedures the Test Administrator Must Complete on Test Day
Steps to complete before beginning online testing. The Annual Testing Program recommends test administrators begin setting up devices used to deliver the online test thirty to forty minutes before the students are to begin testing. Test administration guides include specific steps that must be taken by test administrators before online testing is scheduled to begin.

Online Administration Login Procedures
1. Launch the NCTest Secure Browser, the NCTest Chrome App, or the NCTest iPad App and click on the NCTest login button.
2. The teacher chooses to log in each student at a device or have the students log themselves in using the directions below.
   • If the teacher logs into the test:
     o Enter a valid NC Education username and password and click login.
     o Choose the subject from the drop-down menu.
     o Choose the appropriate test name from the drop-down menu and click continue.
     o Select the student from the list presented on the screen.
   • If the student logs into the test:
     o Enter the student ID number and access code provided by the teacher.
3. After login is complete, the teacher should ensure the screen is set to the start page with the correct student’s name, test name, and school name near the top of the screen.
4. Upon direction from the teacher, the student clicks start. After the start button is clicked, a pop-up box will appear. The student confirms the information in the pop-up box and then clicks OK to begin.

Technology Hardship Requests
If public schools do not have the technology capability to support administering the required online tests to students, a hardship request can
be submitted through the Technology Hardship Request notification system in NCTest Admin. Requests should not be emailed, mailed, or faxed. In the request, PSUs should indicate if the Technology Hardship Request applies to the fall or spring semester or both. Approval from the Office of Accountability and Testing must be documented in the Technology Hardship Request notification system before paper tests can be ordered through the NC Education materials ordering page or in some cases, through a test vendor.

**Online Assessment Tutorials**
An online assessment tutorial is available for all North Carolina-developed online tests through the NCTest Chrome App for Chromebooks, NCTest Secure Browser, NCTest iPad App or by accessing [https://data.ncsu.edu/nctest/Destination.html](https://data.ncsu.edu/nctest/Destination.html).

The following rules apply for students’ participation and completion of the online assessment tutorials:
- Schools must ensure every student participating in an online state test has completed the online assessment tutorial.
- Students must complete the tutorial at least one time per school year before the test administration.
- Students can complete the tutorial either before test day or on the same day as the test administration.
- Students can complete the tutorial either in-school or as part of remote instruction.
H. Reporting and Scoring

Requirement to Report Student Scores
According to 16 N.C. Admin. Code 06D .0307 “(h) LEAs shall report scores resulting from the administration of State-mandated tests from the Annual Testing Program to students and parents or guardians no later than 30 days after the test is administered and along with available score interpretation information within 30 days from receipt of the scores and interpretive documentation from the NCDPI.”

See Appendix C of this handbook for a sample letter schools may use to share this information with parents.

General Statute § 115C-174.13(b): Public Records Exemption
“Any written material containing identifiable scores of individual students on any test . . . shall not be made public by any person, except as permitted under the provisions of the Family Educational Rights and Privacy Act of 1974, 20 U.S.C. §1232g.”

Confidentiality of Student Scores When Publicizing Test Results
It is advised that the confidentiality of test scores is always protected when publicizing or reporting test results to the public. Districts and schools should not violate confidentiality rights under the provisions of the Family Educational Rights and Privacy Act of 1974, 20 U.S.C. §1232g.

It is best practice not to publicly post or to announce student names and test results.

As stated in the Testing Code of Ethics, “Educators shall maintain the confidentiality of individual students. PSU personnel shall not publicize test scores or any written material containing personally identifiable information from the student’s educational records except as permitted under the provisions of the Family Educational Rights and Privacy Act of 1974, 20 U.S.C.§ 1232g and regulations adopted pursuant thereto. . . . In the event of a violation of this Rule, the State Board of Education may impose any one or more of the following sanctions:
1. withhold any monetary incentive awards;
2. file a civil action against the person or persons responsible for the violation for copyright infringement or for any other available cause of action;
3. seek criminal prosecution of the person or persons responsible for the violation; and
4. in accordance with the provisions of 16 N.C. Admin. Code 6C .0312,
suspend or revoke the professional license of the person or persons responsible for the violation.”

It is best practice that school staff be mindful of student confidentiality and adhere to appropriate policies and procedures when publicizing or reporting test results.

**Scoring**

**Online Tests**

**Scoring online tests without constructed response (CR) questions.** Online tests without CR questions are scored during an overnight process and sent to the SSH by 9:00 a.m. the day after the test is completed. RACs and district test coordinators are then able to generate school rosters and class rosters.

**Scoring online tests with CR questions.** For online tests with CR questions, vendors will begin scoring the first business day after the test record is received and will return the scored online test electronically to the NCDPI within approximately six business days. An additional day is required for processing the files from the scoring vendor to the NCDPI. Therefore, RACs and district test coordinators should allow approximately seven business days to receive scored online test records.

As a reminder, a school may receive scored test records across multiple days for a group of students that tested on the same day. Student responses are scored in the order they are received by the vendor.

**Paper Tests**

**Scoring paper multiple-choice tests and multiple-choice tests with gridded response questions.** On days before a paper administration, if designated to do so by the school test coordinator, the test administrator must mark the “Transcribe Online” SIQ in NCTest and mark all other documented accommodations required by the student (i.e., Multiple Testing Sessions and Other required accommodations besides Multiple Testing Sessions). By checking the Transcribe Online SIQ, the student is assigned the same test form number online as he or she is administered via paper. If the Transcribe Online SIQ is not selected, the student will not be assigned the same online and paper form number; therefore, the transcriber will not be able to transcribe the student’s answers from the test book to the online test.

The school follows the procedures outlined in the test administration guide for transcribing the student’s responses from multiple-choice tests and
multiple-choice tests with gridded response questions to the online testing system. Additional information about the transcription process is located in the Transcription Instructions section of this handbook.

The district test coordinator establishes the schedule for sending secure test materials to TOPS after testing.

**Scoring paper tests with CR questions.** For districts and schools administering paper tests with CR questions, the Transcribe Online SIQ is selected in NCTest for the student. The school then follows the directions in the test administration guide for transcribing the student’s responses from the paper test into the online testing system.

As a reminder, the window for tests with CR questions ends earlier than the window for tests without CR questions. The vendor will score all questions (i.e., multiple-choice, CR). The scoring process will begin the first business day after the test record is received by the vendor. Scored records will be returned electronically to the NCDPI within six business days of starting the scoring process. An additional day is required for processing the files from the scoring vendor to the NCDPI. Therefore, test coordinators should allow approximately seven business days to receive paper test records.

**Invalid Test Scores**
In the event that procedures specified in the test administration guides or in the state’s accommodations publications (or in subsequent updates to these documents) are not followed during the test administration, the Office of Accountability and Testing may declare the test scores invalid. If test scores are invalid, the results must not be included in a student’s permanent record or be used for accountability purposes. Invalid test scores will not be used in the accountability model.
I. District Requirements for Destroying and Returning Test Materials for the 2023–24 School Year

Section I of this handbook provides districts with requirements for the storage, return and destruction of test materials.

Guides and Handbooks
Guides (i.e., administration, assessment) and handbooks are not secure materials, and do not have to be securely destroyed.

As a reminder, some guides should be retained for future administrations:
- Store spring 2022–23 EOC guides for use in 2023 summer and fall flexible testing.
- Store spring Read to Achieve guides for use in summer and fall 2024.
- Store spring EOG guides for use in 2024 summer programs.
- Store NCEXTEND1 guides throughout the year for grades 3–8, and grade 10, and grade 11 administrations.
- Store CCRAA guides for grades 10 and 11 for use in spring 2024.
- Store fall EOC guides for use in 2024 spring, summer, and fall flexible testing.

Test Materials to Be Temporarily Stored Locally
Test materials designated in Table 5 are considered secure test materials and must be stored by the district in a locked facility with controlled access limited to one or two authorized school personnel only. After the required storage time expires, the district must destroy these materials using one of the approved methods: (1) shredding, (2) secure recycling, (3) observed landfill burial by two or more designated school personnel, or (4) incineration.

TABLE 5. Test materials designated to be stored by the district in a locked facility until locally destroyed

<table>
<thead>
<tr>

<td>Read to Achieve Test</td>
<td>Store unused test materials from spring for use during reading camp and fall administrations.</td>
</tr>
<tr>
<td>Unused EOC, EOG, and CCRAA graph paper</td>
<td>Store and use during next test administration.</td>
</tr>
</tbody>
</table>

**Online Test Materials**

All visibly used (i.e., has been marked on in some way or is not suitable for reuse during future state testing) scratch paper, graph paper, supplemental materials, and periodic tables should be securely destroyed locally.

- NCEXTEND1 Test Ticket Forms should be destroyed locally after testing.
- All unused test materials should be stored as indicated in Table 5.

**Paper Test Materials to Be Returned to the TOPS Warehouse**

After transcription into the online system, the following test materials must be returned to the TOPS warehouse within five school days of the end of the testing window for non-vendor state-mandated tests:

- Original responses recorded in a test book (i.e., EOG, EOC, BOG3, RtA, CCRAA) to include:
  - Student Marks Answers in Test book
  - Large Print Editions
  - One Test Item Per Page Editions
  - Large Print/One Test Item Per Page books
  - Braille Editions
  - Braille Writer/Slate and Stylus responses
  - Dictation to a Scribe responses (e.g., typed, handwritten)
  - Electronic Braille Notetaker responses
- All visibly used (i.e., has been marked on in some way or is not suitable for reuse during future state testing) scratch paper, graph paper, supplemental materials, and periodic tables *must be included inside the test book* used by the student when returned to TOPS.
- NCEXTEND1 test card kits and selection booklets

All used paper test books must have the transcription label completed on the front of the test book.

All unused paper test materials should be stored as indicated in Table 5.
Packing Test Materials for Return to the TOPS Warehouse
1. Test administrators should return all materials (i.e., test books, test administration guides) to the school test coordinator.
2. The school test coordinator ensures that scratch and graph paper are inserted into each student’s test book. Then return the materials to the district test coordinator.
3. The district test coordinator will package and return the secure materials as follows (top to bottom):
   - Place used test book(s) for a grade and subject or course together in a vinyl bag.
     - Place all visibly used (i.e., has marked on in some way or is not suitable for reuse during future state testing) scratch paper, graph paper, supplemental materials, and periodic tables within the student’s test book.
   - If applicable, place test materials with print errors in the box with a copy of the completed print error report form as the cover sheet.
   - Place any misadministration test books that are not to be scored in a separate, labeled vinyl bag.
   - Place NCEXTEND1 and unused test books sorted by grade and content in the box.
4. The district test coordinator will send the secure test materials to TOPS.
   - Place vinyl bags and test materials in boxes using the provided authorized return service (ARS) labels;
   - if more than one box is used for test materials, then each box should be clearly marked with “BOX <#> of <Total # of boxes>”;
   - fax or email a scanned PDF of the TOPS Return Verification Form (see Appendix L of this handbook) to TOPs, and email or carbon copy the regional accountability office staff. This form provides an area to denote the tracking number(s) for the school and TOPS to ensure test security and prompt follow-up should materials not arrive the next day at TOPS.

Note: All secure test materials must be stored in a secure, locked facility when not in use.

Test Materials Stored at TOPS
TOPS will store the following in a secure facility for twelve months following the test date:
- original student responses recorded (e.g., use of accommodations Student Marks Answers in Test Book, Braille Edition, Braille Writer/Braille Paper, Slate and Stylus/Braille Paper, Dictation to a Scribe, or Assistive Technology);
- paper tests (i.e., Braille Editions, Large Print Editions, One Test Item Per Page Editions, Large Print/One Test Item Per Page Editions,
Regular Print Edition) in which eligible students marked their answers in the test book;
- Braille Writer/Braille Paper or Slate and Stylus/Braille Paper student responses and photocopies of the responses; and
- original scribe recordings of student responses if not recorded directly in a test book (e.g., scribe records responses on a separate sheet of paper and transcribes after the testing session).

Vendor Test Materials
Districts should follow the directives in Table 6 to return materials as specified to vendors.

TABLE 6. Specified return of vendor materials for districts

Charter, Lab, and Regional Schools Requirements for Ordering, Receiving, Storing, and Returning Test Materials for the 2023–24 School Year

Section J of this handbook provides charter, lab, and regional schools with requirements for the ordering, receipt, storage and return of the Annual Testing Program’s secure test materials. Charter, lab, and regional schools are not allowed to securely destroy any test materials.

**Before Ordering**
Check to be sure the school contact information is correct on the NC Education ordering page. The United Parcel Service (UPS) will send an email notification to the email address listed for the test coordinator upon the shipping of an order. If the test coordinator does not receive the package on the day indicated in the notification, the test coordinator must contact the TOPS warehouse at (919) 515-4623. In North Carolina, all UPS shipments are next-day delivery. The test coordinator must be aware of the delivery date for the school to ensure there is not a security risk, and that the delivery occurs in a secured area.

**Shipping and Receiving**
Orders are typically shipped from TOPS ten days before the first test date. On the day the materials arrive at the school, the test coordinator must:

- conduct an inventory immediately upon receipt of all test materials to ensure that the packing list(s) match exactly what is included in the box(es) of materials.
- note quantities received in the appropriate column on the packing list.
- Sign all packing lists and fax (919-515-4622) or email (grouptopdocs@ncsu.edu) TOPS the packing list verifying the accuracy of or any discrepancy in the quantity received on the same day that the materials arrive in the building. See the example label which will be located on the bottom of the packing list.

Example Label:

<table>
<thead>
<tr>
<th>Date __________________</th>
<th>Checked in Correctly ____________________</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discrepancies Noted in Qty. Received Column ______________</td>
<td></td>
</tr>
<tr>
<td>Signature of Test Coordinator _____________________________</td>
<td></td>
</tr>
</tbody>
</table>

- Save all boxes for the return of all materials.
- Save the original packing list(s) to use for the return of test materials to TOPS.
Storing Materials
Upon receipt, schools must house all secure test materials in a secure, locked facility with controlled access limited to one or two authorized school personnel only (e.g., test coordinator, principal). Secure test materials should only be stored at the school for a brief period before and after the test administration.

Guides and Handbooks
Guides (i.e., administration, assessment) and handbooks are not secure materials. Test Administration Guides must be returned to TOPS after the last test administration listed below.

As a reminder, some guides should be retained for future administrations:
• Store 2022–23 EOC guides for use in 2023 summer and fall flexible testing.
• Store spring Read to Achieve guides for use in summer and fall 2024.
• Store spring EOG guides for use in 2024 summer programs.
• Store NCExTEND1 guides throughout the year for grades 3–8, grade 10, and grade 11 administrations.
• Store CCRAA guides for grades 10 and 11 for use in spring 2024.
• Store fall EOC guides for use in 2024 spring and summer 2024.

Grade 3 Student Reading Portfolio box
Store and use the 2022–23 version until Edition 2 of the Grade 3 Student Reading Portfolio box is available. Then return the 2022–23 Grade 3 Student Reading Portfolio box to TOPS along with any local copies.

Returning Materials
Charter schools must return secure test materials within two business days after the regular test administration for both online and paper tests. The test coordinator must adhere to the following procedures for the return of test materials:
• All test materials are to be returned to TOPS. This includes all used and unused test books, all visibly used (i.e., has been marked on in some way or is not suitable for reuse during future state testing) scratch paper, graph paper, supplemental materials, periodic tables, and reference tables.
• All used paper test books must have the transcription label completed on the front of the test book.
• Boxes must be packed according to the quantities on the packing lists (i.e., materials packed in a box should match the packing list exactly).
• Fax or email a scanned PDF of the TOPS Return Verification Form (see Appendix L of this handbook) and email or carbon copy the regional accountability office staff. This form provides an area to denote the
tracking number(s) for the school and TOPS to ensure test security and prompt follow-up should materials not arrive the next day at TOPS.

**Recording tracking information.** The charter school test coordinator must adhere to the following procedures for recording tracking information:
- Record information clearly on the UPS authorized return service label.
- Complete the *TOPS Return Verification Form*.
- Maintain a record of:
  - UPS tracking numbers,
  - number of boxes in the shipment,
  - packing lists involved, and
  - date shipped.

**Packing Test Materials for Return to the TOPS Warehouse**
1. Test administrators should return all materials (i.e., test books, test administration guides) to the school test coordinator.
2. The charter school test coordinator will package and return the secure materials as follows (top to bottom):
   - Place used test book(s) for a grade and subject or course together in a vinyl bag.
     - Place all visibly used (i.e., has marked on in some way or is not suitable for reuse during future state testing) scratch paper, graph paper, supplemental materials, and periodic tables within a student’s test book.
   - If applicable, place test materials with print errors in the box with a copy of the completed print error report form as the cover sheet.
   - Place any misadministration test books that are not to be scored in a separate, labeled vinyl bag.
   - Place NCEXTEND1 and unused test materials sorted by grade and content in the box.
   - Place materials from online tests (i.e., scratch paper, etc.) in the box.
3. The charter school test coordinator will send the secure test materials to TOPS.
   - Place vinyl bags and test materials in boxes using the provided authorized return service labels;
   - if more than one box is used for test materials, then each box should be clearly marked with “BOX <##> of <Total # of boxes>”;
   - fax or email the Return Verification Form to TOPs, and email or carbon copy the regional accountability office staff.

Note: All secure test materials must be stored in a secure, locked facility when not in use.
Test Materials Stored at TOPS
TOPS will store the following in a secure facility for twelve months following the test date:

- original student responses recorded (e.g., use of accommodations *Student Marks Answers in Test Book, Braille Edition, Braille Writer/Braille Paper, Slate and Stylus/Braille Paper, Dictation to a Scribe, or Assistive Technology*);
- paper tests (i.e., *Braille Editions, Large Print Editions, One Test Item Per Page Editions, Large Print/One Test Item Per Page Editions, Regular Print Edition*) in which eligible students marked their answers in the test book;
- *Braille Writer/Braille Paper or Slate and Stylus/Braille Paper* student responses and photocopies of the responses; and
- original scribe recordings of student responses if not recorded directly in a test book (e.g., scribe records responses on a separate sheet of paper and transcribes after the testing session).

Vendor Test Materials
Charter schools should follow the directives in Table 7 to return materials as specified to vendors.

K. Testing Irregularities and Misadministrations

Testing Violations and Testing Irregularities
Test administrators (and proctors, if utilized) must report any alleged testing violation or testing irregularity to the school test coordinator on the day of the occurrence. The school test coordinator must contact the district test coordinator (charter, lab, and regional schools contact the RAC) immediately with any allegation of a testing violation. The school test coordinator must then conduct a thorough investigation and complete the Report of Testing Irregularity provided through the OTISS.

It is recommended that persons reporting irregularities in OTISS view the online OTISS training video below before submitting irregularity reports. To access the OTISS training video, log in to NC Education and navigate via the following pathway:
• NC Education > Main Menu > OTISS Irregularity > Overview

The OTISS irregularity report should be submitted within five days of the occurrence. Schools cannot submit one report for several different testing violations or irregularities. With the exception of technical difficulties experienced in the same testing room or same school, different incident types are expected to be documented on separate reports of testing irregularity even when the incidents occur during the same test administration in the same room. For example, if one student is disruptive during testing and another student becomes ill during the administration of the same test, two separate reports of testing irregularity must be filed in OTISS. If a misadministration is declared, it must be documented and reported using appropriate procedures outlined in OTISS.

Note: The RAC must be contacted by the PSU test coordinator immediately upon learning of any alleged serious testing violations or irregularities that may require a misadministration and the completion of the OTISS Testing Irregularity Investigation Checklist.
**Irregularity Classifications**
Irregularity classifications include, but are not limited to, the following:

Table 8. Irregularity classifications

<table>
<thead>
<tr>
<th>#</th>
<th>Irregularity Classification</th>
<th>Level</th>
<th>Examples (include but not are limited to)</th>
</tr>
</thead>
</table>
| 1. | Staff Failed to Follow Directions               | 1     | • Tutorial or Practice Activity not administered  
• Staff started online test for student  
• Staff administered incorrect test  
• Provided incorrect materials or did not provide materials  
• Failed to follow test schedule procedures  
• Provided additional time beyond the designated time specified in the test administration guide  
• Failed to follow administration instructions  
• Test scheduling prevented student test completion |
| 2. | Eligibility Issues                               | 1 or 2| • Eligible student not tested  
• Ineligible student tested                                                                                             |
| 3. | Defective Paper Test Materials                   | 1     | • Wrong cover  
• Pages out of order  
• Duplicate pages  
• Blank or missing pages  
• Missing questions  
• Questions without answers  
• Printing error – letters or words unreadable                                                                                     |
| 4. | Online Administration Issues                     | 1     | • Test connectivity or technical problems  
• Items not displaying properly  
• Unexpected exit in NCTest                                                                                                           |
| 5. | Disruptions to the Testing Environment           | 1     | • Fire alarm or bomb threat  
• Emergency evacuations  
• Power outage  
• External noise  
• Student disruption  
• Unauthorized visitor                                                                                                                  |
### Test Administration Irregularities continued

|   | Accommodation Issues | 1 | • Not provided or not provided appropriately  
|   |                       |   | • Provided but not approved or documented  
|   |                       |   | • Test Read Aloud or signed/cued on reading  
|   |                       |   | • Student refused accommodation |

### Student-Related Irregularities

|   | Student Cheated | 1 | • Student copied answers  
|   |                 |   | • Student accessed prohibited device or resource (e.g., cell phone, cheat sheet) to access test information  
|   |                 |   | • Student used calculator during inactive portion of the math test |

|   | Student Personal Issues | 1 | • Student was ill or injured  
|   |                         |   | • Student was anxious  
|   |                         |   | • Student had a problem with medication or glasses  
|   |                         |   | • Student had family or personal circumstance  
|   |                         |   | • Student fell asleep  
|   |                         |   | • Student left early for an appointment  
|   |                         |   | • Student did not finish the test  
|   |                         |   | • Student pacing prevented completion of the test |

|   | Student Refusal to Test | 1 | • Student did not mark answers  
|   |                         |   | • Student marked test randomly |

|   | Student Did Not Follow Directions | 1 | • Student worked on wrong section of test  
|   |                                      |   | • Student possessed cell phone |
### Security Irregularities

</tr>
</tbody>
</table>

Note: If students experience a technical difficulty but successfully complete testing, no OTISS report is required.

If the same technical problem, that prohibits completion of the test, is reported for multiple students for the same test administration on the same day, only one OTISS report needs to be submitted. A list of all students affected should be attached to the OTISS report.

### OTISS Investigation Checklist and Sample Test Security Action Plan

When PSUs submit irregularity reports in OTISS, level 2 irregularities require an investigation checklist, along with an investigation summary report(s), and other pertinent documentation to be submitted to the NCDPI.

The [OTISS Testing Irregularity Investigation Checklist](#) must be used by the PSU test coordinator when collecting information and investigating an alleged testing violation. The checklist provides the necessary steps and
guidance for filing irregularities and completing investigative measures. The *Sample–Test Security Action Plan* may be used to address areas of concern in testing and to outline procedures for establishing corrective actions.
Online Testing Irregularity Submission System (OTISS) Investigation Checklist
This form and all accompanying documentation MUST be submitted electronically.

   Responsibilities:

III. Evaluation criteria
A. Measurable outcomes (e.g., reduction in number of testing
   irregularities, shorter resolution time, more comprehensive test
   administration training sessions according to workshop evaluation
   summaries, etc.)
B. Follow-up methodology (e.g., distribution of fact sheets, resources,
   activity logs, training sessions, quarterly needs assessments, etc.)
**Misadministrations**

PSUs must monitor test administration procedures. According to 16 N.C. Admin. Code 06D .0307 (e,f), “LEAs shall monitor test administration procedures. If a school employee discovers any violation of the rules in this Subchapter, he or she shall notify the principal, charter school director, or school test coordinator who shall notify the superintendent or the LEA test coordinator. If the superintendent or the LEA test coordinator determines that the violation affected the validity of the test for its intended purpose, he or she shall have the authority to order the affected students to be retested. If NCDPI determines that the failure to administer a test in accordance with the rules in this Subchapter produced a result which is invalid for measuring student achievement, then NCDPI may remedy the error or order the LEA to remedy the error, including requiring retesting students.”

For online tests, after a misadministration is declared and indicated in NC Education, a different form of the test will be loaded for the student, if available. For paper tests, when a misadministration is declared, the affected student(s) must be administered another secure form of the test (i.e., a different letter or form number, if available). The PSU test coordinator will specify how misadministrations are to be handled at the school and will schedule dates and times for readministering the tests in each school so that all misadministration retests are completed within the state-designated testing windows, if possible.

Only scores resulting from a valid test administration should be included in students’ permanent records or used for accountability purposes. All misadministrations must be documented and reported using the appropriate procedures outlined in the OTISS.
L. State Monitoring

Assessment Monitoring Visits
Per the US Department of Education Assessment Peer Review Process, Critical Element 2.4—Monitoring Test Administrations requirements, “the State adequately monitors the administration of its State assessments to ensure that standardized test administration procedures are implemented with fidelity across districts and schools. Monitoring of test administration should be demonstrated for all assessments in the State system: the general academic assessments, the general ELP assessments, the AA-AAAS and the AELPA.” Alternate assessments are assessments in academic content areas aligned with alternate academic achievement standards (AA-AAAS). Alternate English Language Proficiency assessments (AELPA) are based on alternate achievement standards of English language proficiency.

Annual Process for Assessment Monitoring Visits
The NCDPI Office of Accountability and Testing conducts assessment monitoring. The purpose of monitoring test administrations is to ensure the Annual Testing Program is meeting Peer Review requirements and that all testing is conducted in a manner that is fair, consistent, and equitable for all students, including students with disabilities and students identified as ELs. The annual process for assessment monitoring consists of three components: (1) desk monitoring, (2) on-site monitoring, and (3) feedback and assistance.

Schools selected for monitoring will be identified by random stratified electronic sampling. This method ensures site visits are distributed in a fair and equitable manner. The following steps outline the process for coordinating and conducting an assessment monitoring visit.

Desk monitoring. Assessment monitoring observations begin with desk monitoring. To facilitate this process, the observer will request the following documents from the district or school test coordinator:

- annual testing plan
- test-material distribution list or documents related to secure material distribution procedures
- test administration training rosters
- signed test security agreements
- test meeting agendas and notes
- testing calendar

The observer may also access the following reports internally for review:

- the Expect Test File,
• the ACCOM file, and
• OTISS reports

If concerns are noted during the desk monitoring review, they will be included in the follow-up email to the superintendent or director.

**On-site monitoring.** The initial observation notification will inform the PSU of the visit and the second notification will request specific monitoring documentation. (If the observer will be visiting a school within a district, the observer may request the district test coordinator participate in the visit.) Within at least one week of the monitoring visit, the observer will contact the PSU test coordinator regarding specific details for the monitoring visit (e.g., arrival time, special circumstances).

The assessment monitoring visit may include observing either a full or partial PSU assessment day. The visit may include monitoring the following activities:
• visiting the secure location for test materials
• observing test materials’ distribution procedures (checking out or checking in, or both)
• observing test-day policy and procedures of the school test coordinator, test administrators, or proctors (if utilized)
• monitoring the school’s testing environment
• monitoring the reporting of testing irregularities (if applicable)

Interviews may be conducted to gain additional information if time and schedules permit. Interviewees may include:
• district test coordinator;
• principal or assistant principal, or both;
• school test coordinator;
• test administrators;
• proctors (if utilized); and
• other PSU staff members participating in the test administration.

**Feedback and assistance.** During the observation, assessment monitoring checklists are completed by the observer. The checklists are designed to provide specific feedback to the superintendent or director, the school administrators, and the school test coordinators. A copy of each checklist that was completed by the observer is emailed to the superintendent or director within forty-five calendar days of the visit.

As part of the feedback, the observer will indicate if concerns were noted either during the desk monitoring or during the in-person visit. In situations where concerns are noted, the feedback will include plans to observe the site
again either in the current or the next school year. If this circumstance should arise, the observer will include specific remedies or actions that should be completed before the next observation. The observer will ensure that the concerns are corrected as part of the next observation and noted in the follow-up feedback to the superintendent or director.

**Monitoring of Prior School Year’s Cohort Graduation Rate**
The Office of Accountability and Testing uses a formalized state monitoring plan to verify the withdrawal of students reported in the PSU’s prior school year’s cohort graduation rate. Teams of state-level and regional staff members conduct the monitoring. Team members are tasked with conducting electronic monitoring by requesting written evidence or documentation to verify the withdrawals of students from the cohort. For additional details and information regarding the monitoring process, access the [Cohort Graduation Rate Manual](#) that is located on the School Accountability and Reporting section of the NCDPI website.

M. Data Security

According to 16 N.C. Admin. Code 06D .0307 the definition of “secure test” is “any test developed, adopted, or provided by the State Board of Education that has not been released under G.S. § 115C-174.13.” SBE policy TEST-004 specifies that “secure tests, including all test materials and test questions, are not to be reproduced in any manner or for any reason without the express written consent of the test publisher. School personnel must not disclose the contents of secure tests. They must not discuss with each other, or with students, specific test questions or information contained within the tests or write about them on the internet or on social media sites. In addition, excerpts from the tests must not be used at any time during classroom instruction or in resource materials such as study guides. Access to the tests shall be limited to school personnel who have a legitimate need. Persons who have access to secure test materials shall not use their access to those materials for personal gain.”

Secure state tests shall not be copied, reproduced, paraphrased, filed, or used directly in instructional activities or for professional development. Copying, reproducing, or paraphrasing test materials represents a breach of test security and is a violation of federal copyright laws, 16 N.C. Admin. Code 06D .0311, SBE policy, and the Testing Code of Ethics.

Copies of any documents suspected of containing secure test questions or information from secure tests must be submitted to the NCDPI through the RAC for clearance before use in the PSU. Appropriate items for review would be any material of which the origin is not known, including test questions discovered on the internet. Individuals are not permitted to create or save electronic files of secure test questions, including answers, or save or post them through a vendor, Google drive, email, social media, web posting, or any other method. The NCDPI will review any materials a PSU submits. PSUs and the Office of Accountability and Testing must work together to maintain the security of the testing program.

Third-Party Service Providers and Personally Identifiable Information

PSUs can contract with third-party data-sharing vendors. In doing so, the third party can be designated a “school official” as defined by the Family Educational Rights and Privacy Act (FERPA). According to the FERPA, “a ‘school official’ includes a teacher, school principal, president, chancellor, board member, trustee, registrar, counselor, admissions officer, attorney, accountant, human resources professional, information systems specialist, and support or clerical personnel.”
Whether a third-party provider, such as Google Apps for Education or Dropbox Business, is designated a school official as defined by the FERPA, is at the discretion of the PSU. The legal relationship with third-party service providers is by and between the PSU and the third-party service providers. The NCDPI does not endorse or prohibit the use of any third-party vendors. However, PSUs are encouraged to consult with their legal counsel and leadership when determining what third party meets their specific requirements. Such requirements must include certification that the third-party vendor is FERPA compliant. The PSU is responsible for the security of students’ personally identifiable information (PII).

Only PSU-contracted sharing services that provide the FERPA compliance certification should be used when sharing PII via shared files. Personal email or personal sharing services accounts must never be used to transfer student data or PII.

**Handling and Transmitting Personally Identifiable Information**

PSUs and the NCDPI staff frequently need to share information from individual student records to resolve data issues and answer program area questions. Employees of PSUs, the NCDPI, or other education institutions are legally and ethically obliged to safeguard the confidentiality of any private information they access while performing official duties. Confidential information regarding students and staff should always be transmitted securely.

The [FERPA (20 U.S.C. § 1232g; 34 CFR Part 99)](https://www.ed.gov/policy/foia/laws/ferpa.html) is a federal law that applies to all educational agencies and institutions (e.g., schools) that receive funding under any program administered by the US Department of Education. Among several purposes, FERPA was enacted to protect the privacy of students’ educational records.

For those PSUs with full encryption capabilities, transported data and other electronic transporting devices containing NCDPI data should be encrypted. This requires the recipient of the data to have corresponding decryption capabilities.

To protect the confidentiality of individuals from those who are not authorized to have access to individual-level data, PII should be encrypted during transmission using the following method:

- **Secure FTP** server on SFTP or FTPS protocols.
  - **Preferred method** and most widely acceptable standard for transmitting encrypted data.
Fax machines and printers used to send and receive secure data must be located in secure areas.

Secure test questions, answer choices, or portions of secure test questions and answer choices must not be sent via email. Use email only if encrypted or password protected.

PSUs should not use private or personal accounts to store students’ PII. PSUs who wish to use the Google Workspace for Education should consult with their legal team to ensure compliance with FERPA and state security guidelines.

Furthermore, it is recommended that PSUs use the Data Leak Protection feature of Google Workspace to protect data, even though FERPA compliance does not require Data Leak Protection.

For additional information, see the publication *Best Practices Guide: PII and Email* at Data Management Resources | NC DPI.

**Viewing Secure State Tests and Obtaining Data for Research**

General Statute § 115C-174.13 (a) states that “until the State Board of Education designates that a test is released, any test developed, adopted, or provided by the State Board of Education, as provided in this Article, is not a public record within the meaning of G.S. §132-1. The State Board of Education may develop rules to allow inspection of a test prior to release, but shall require that individuals inspecting the test meet the same standards for confidentiality required for employees of local boards of education in test administration. As used in this section, the term ‘test’ includes both the test and related test materials.”

The Annual Testing Program releases to PSUs and to the public one test form for most grade levels and subjects tested. Visit https://www.dpi.nc.gov/testing-documents for all released test forms and additional testing information.

Otherwise, the *Testing Code of Ethics* (16 N.C. Admin. Code 06D .0311) states that “the PSU shall designate the personnel who are authorized to have access to secure test materials. ‘Access’ to the test materials by school personnel means handling the materials, but does not include reviewing tests or analyzing test items. Persons who have access to secure test materials shall not use those materials for any purpose other than the test administrations.”
Secure test materials include, but are not limited to, blueprints; test layout forms; item pools; operational and field test books, and test questions, or test book sections. Secure test materials may be in either electronic or paper format. North Carolina test materials are costly to generate; every precaution must be taken to ensure all test materials remain secure at all times.

The normal course of the test development process includes educator and stakeholder involvement in the following processes: test specifications, test development, question-writing and reviews; experimental form and section, bias, and operational form reviews; standard setting; and alignment studies. During these processes, educators and stakeholders are asked to view secure test materials but are bound by a signed test security agreement.

In special circumstances, exceptions can be made for parents or guardians. Parents or guardians who request the opportunity to view secure test materials must send a letter of request to the Senior Director of the Office of Accountability and Testing at the following address:

Tammy Howard, Senior Director  
Office of Accountability and Testing  
NC Department of Public Instruction  
6307 Mail Service Center  
Raleigh, NC 27699-6307

Letters of request should include
- the specific test requested to view,
- why the request is being made, and
- what will be done with the information after it is reviewed.

For parents and guardians granted permission to view secure test materials, the review must occur at the NCDPI in Raleigh under secure conditions with NCDPI staff present throughout the viewing period. Parents and guardians may not view secure test materials at the district or school sites nor duplicate, scan, copy, photograph, or otherwise create a record of information contained within them. The Testing Code of Ethics may be referenced for information relative to test security requirements.

Parents and guardians granted permission to view secure test materials will not be able to view the same test form that was administered to their child, but it will be a parallel and equivalent form of the test. Parents and guardians will not be able to view their student’s completed test. Before viewing secure test materials, information will be provided to describe how tests are developed. Several public documents about the process may
be shared. The NCDPI staff member(s) may also have on hand a copy of additional documentation, such as standard-setting reports, technical manuals, or a report of test results that the parents and guardians may view during the meeting.

While parents and guardians may take notes about the information shared before viewing the secure test materials, notetaking is not permitted during the viewing. Also, before viewing secure test materials, each parent and guardian is required to read and sign a test security agreement form. One copy of the form will be retained by the NCDPI; each parent and guardian will receive a copy. Parents and guardians who refuse to sign the test security agreement form may not view secure test materials.

**Research Data Requests**

Private companies, higher education staff, and students may request school data for research purposes. Test coordinators and other school officials must never release test data beyond what is publicly available on the NCDPI website. Researchers should be referred to the reports and data posted at the following link: Data & Reports | NC DPI.

Information regarding the NCDPI research data request process is available at https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/school-accountability-and-reporting/research-data-requests.

If more data is requested than is publicly available, the individual should contact the NC Education Research Data Center at https://childandfamilypolicy.duke.edu/north-carolina-education-research-data/ or K.C. Elander, NCDPI Education and Policy Consultant, at kc.elander@dpi.nc.gov.

**Maintaining the Confidentiality and Security of Testing and Accountability Data**

PSU test coordinators are responsible for handling confidential North Carolina testing and accountability data. Extreme caution and care must be taken to maintain the confidentiality and security of this data. Access and use of these data must comply with the FERPA https://studentprivacy.ed.gov/ferpa as well as all portions of North Carolina General Statute § 115C that pertain to the use of educational data. Violations may result in the withdrawal of US Department of Education funds and constitute misdemeanors under North Carolina law.

Confidential data must be transferred using secure methods (e.g., Secure File Transfer Protocol or receipted parcel delivery services, such as the US Postal Service, UPS, or Federal Express). When placing confidential data on
portable devices (e.g., laptops, thumb drives), the portable device must be protected by encryption or password protection.

In certain limited situations, confidential student, school, or district data may be used in presentations related to school or district improvement. However, this is permissible only when such presentations are made to the leadership or instructional personnel in the school or district who would normally have access to the confidential data of the students for purposes of improving instruction. Even in such situations, caution must be taken to ensure the data remain secure at all times.

Some specific examples of confidential data that must not be released to anyone include the following:
- **WinScan files.** WinScan files contain data that are for test development and accountability purposes only, and their release would violate test security. See the [Security of WinScan Data Records](#) subsection in this handbook for additional information on the release of WinScan files.
- **Free and reduced meal data and direct certified data for the identification of economically disadvantaged students (EDS).** The EDS data are property of the NCDPI and School Nutrition Services. The Office of Accountability and Testing has access to the data through a Memorandum of Understanding. Test coordinators are bound by the requirements of the Memorandum of Understanding and FERPA to preserve the confidentiality of this data. Releasing this data to anyone in any manner that would allow the identification of the EDS status of an individual student would be a violation of federal law.

PSUs must not release secure data to the public. If persistent requests are made, the test coordinator may instruct the requestor to send a letter of request to the Senior Director of the Office of Accountability and Testing at the following address:

Tammy Howard, Senior Director  
Office of Accountability and Testing  
NC Department of Public Instruction  
6307 Mail Service Center  
Raleigh, NC 27699-6307

Letters of request must include
- the specific data requested,
- why the request is being made, and
- what will be done with the data.
Additional information may be required to facilitate a reply to such a request.
Security of WinScan Data Records

WinScan data records are student education records that contain sensitive information. Access to these records must be restricted to individuals with a legitimate need to access these data. These data are not for personal use and should not be distributed in such a way that can identify individual student scores. When producing summaries of student performance, any group with less than ten individuals must not be reported because it might be possible to identify the individual students that make up that group. Instead, the report should show a "*" or "N/A" (or other symbol) with an appropriate explanation (Data Management Group (DMG), DMG-2009-004-SE).

In any group where the percentage of individuals is greater than ninety-five percent or less than five percent, the actual values may not be displayed because of FERPA privacy regulations. In these cases, the results will be shown as >95% or <5%. This ensures that student information remains anonymous. The policy further ensures compliance with the interpretation of FERPA that small cell sizes must be removed from statistics made public or offered to outside organizations or persons to avoid the disclosure of personally identifiable data.

Individual student records must not be sent via email because this is not considered a secure means of transferring information.

The FERPA (20 U.S.C. § 1232g; 34 CFR Part 99) protects the privacy of student education records. Under this law, parents have certain rights to inspect their children’s education records. Usually, schools must have written permission from the parent or eligible student to release any information from a student’s education record. However, FERPA allows schools to disclose those records, without consent, to the following parties or under the following conditions (34 CFR § 99.31):

- school officials with legitimate educational interest
- other schools to which a student is transferring
- specified officials for audit or evaluation purposes
- appropriate parties in connection with financial aid to a student
- organizations conducting certain studies for or on behalf of the school
- accrediting organizations
- to comply with a judicial order or lawfully issued subpoena
- appropriate officials in cases of health and safety emergencies
- state and local authorities, within a juvenile justice system, pursuant to specific state law
**N. National Assessment of Educational Progress**

The National Assessment of Educational Progress (NAEP) is the only nationally representative and continuing assessment of what America’s students know and can do in various subject areas. The NAEP has two types of assessments, main and long-term trend. Main assessments are conducted in a range of subjects with fourth, eighth, and twelfth graders across the country. Assessments are given most frequently in mathematics, reading, science, and writing. Other subjects, such as the arts, civics, economics, geography, and US history, are assessed periodically.

Long-term trend (LTT) assessments measure student performance in reading and mathematics, using some questions repeatedly to ensure comparability across the years. The LTT assessments allow the performance of today’s students to be compared with those from more than forty years ago and inform the development of new assessment instruments that reflect current educational content and assessment methodology. The LTT assessments are administered every four years.

Since NAEP assessments are administered uniformly using the same sets of test questions across the nation, NAEP results serve as a common metric for all states and select urban districts. The assessments stay the same from year to year, with only carefully documented changes. This uniformity permits the NAEP to provide a clear picture of student academic progress over time.

**Participation and Sampling**

In accordance with the ESSA, NAEP administrations in reading and mathematics (which began in 2003) are required at grades 4 and 8 every other year in all states. In North Carolina, 16 N.C. Admin. Code 06D .0307 requires all selected schools to participate in the NAEP; however, at the student level, participation in the NAEP is voluntary. ESSA allows either students or parents to refuse to participate.

For each main NAEP administration, a sample of students is drawn from both public and nonpublic schools at grades 4, 8, and 12. (ESSA requires reading and mathematics assessments at grade 12 on a nationally representative basis at a minimum of every four years.) For each LTT assessment, a sample of students at ages 9, 13, and 17 is drawn from both public and nonpublic schools. All sampling for the NAEP assessments is conducted at the national level. The sample of schools and students is chosen in a two-stage sampling process. First, the sample of schools is selected by probability sampling methods. Then, within the participating schools, random samples of students are chosen.
To ensure the integrity of the NAEP, every effort must be made to include selected students in the test administrations. The NCDPI recommends IEP teams and Section 504 committees use the accommodation(s) listed in the District and State Assessment section of the respective plans during the administration of the NAEP. Although the NAEP is a required assessment for schools, students’ scores are not included in the school’s accountability results. Using the documented accommodations listed in the District and State-Assessment section of the IEPs and Section 504 Plans will provide increased access for students with disabilities.

**NAEP accommodation procedures.** The IEP team or Section 504 committee refers to the accommodations listed in the District and State Assessment portion of the plan and determines if those accommodations are appropriate and allowable according to the NAEP guidelines. To determine the allowable accommodations according to the test publisher (i.e., the National Center for Education Statistics [NCES]), contact the school test coordinator for the most recent list of approved accommodations designated by the NAEP.

If the team or committee determines after consulting with the school test coordinator that a student cannot access the NAEP, a student may be excluded from participating in the administration of the NAEP. Before excluding a student based on an accommodation need, the school test coordinator is to send an email to the North Carolina NAEP State Coordinator, Dr. Andrea Faulkner, at Andrea.Faulkner@dpi.nc.gov. The email should include the school’s name, the school test coordinator’s contact information, and a summary of the student’s accommodation needs. Confidential student-identifying information should not be included in the email. The NAEP State Coordinator will review the email and respond with a follow-up email or phone call to discuss the student’s accommodation needs.

The NCDPI is committed to including as many students as possible in the NAEP. The NAEP results for North Carolina should represent the entire student population. The IEP team and the Section 504 committee should consider ways to offer accommodations for students to enable participation in NAEP, and every effort should be made to identify an accommodation that will facilitate students’ participation. The NAEP publicly reports highlight results at the state level. Student and school reports are never shared publicly.

**NAEP Test Results**
The NAEP test results include data on subject-matter achievement, instructional experiences, and school environment for populations of students (e.g., all fourth graders) and groups within those populations (e.g.,
female students, Hispanic students). The NAEP does not provide scores for individual students or schools, although states can report NAEP results for selected, large urban districts. NAEP results are based on representative samples of students at grades 4, 8, and 12 for the main assessments or samples of students at ages 9, 13, and 17 years for the LLT assessments. These grades and ages were selected because they represent critical junctures in academic achievement.

**NAEP Assessment Schedule**
All Trial Urban District Assessments (TUDA), main, and state assessments take place from mid-January through March. All LLT assessments take place from October through May. Results for NAEP assessments are reported in The Nation’s Report Card. Results are published for math, reading, science, and writing assessments six months to a year after the assessment is complete.

**Additional Information on NAEP**
For more information on NAEP, visit the following websites:

O. Resource Documents

North Carolina’s Implementation Guide for Credit by Demonstrated Mastery (CDM)
North Carolina’s Implementation Guide for Credit by Demonstrated Mastery (CDM) is provided by the SBE and the Office of Advanced Learning to help PSUs implement CDM policy CCRE-001. The Implementation Guide for Credit by Demonstrated Mastery offers specific implementation guidelines addressing how students can earn course credit in a manner that does not require specific seat-time. The Implementation Guide for Credit by Demonstrated Mastery, Frequently Asked Questions, and the CDM Toolkit may be found on the NCDPI’s Credit by Demonstrated Mastery webpage. The Procedural Guidelines for Implementing Credit by Demonstrated Mastery are provided by the Office of Accountability and Testing to help PSUs understand the requirements of demonstrating mastery in Phase I through testing, the generation of scores, and how/when CDM scores are utilized.

Process for Requesting Testing Exceptions Based on Significant Medical Emergencies, Conditions, or Both
There may be rare instances in which a student is unable to participate in a state assessment during the testing window, including makeup dates, because of a significant medical emergency, condition, or both. Examples include, but are not limited to, circumstances involving students who are (1) in the final stages of a terminal or degenerative illness, (2) comatose, or (3) receiving extensive short-term medical treatment due to a medical emergency. Under these circumstances, a school may request from the Office of Accountability and Testing a testing exception for the student. If a medical exception is granted, the student remains enrolled in the school during this period; however, the student does not take the assessment(s), and the student is not included in accountability data when calculating participation rates.

Failure to adhere to the process for requesting a testing exception or not including all requested information may result in the need to resubmit the request or cause a delay in the response. All requests must be submitted for consideration through the online Medical Exception Request System in NC Education’s NCTest Admin. The requests must be submitted by the PSU test coordinator and have the superintendent’s or school director’s approval prior to submission in NC Education’s NCTest Admin system. Once a medical exception request is successfully submitted securely to the Office of Accountability and Testing, the NCDPI medical exception review committee will evaluate the request and securely transmit a decision notification to the PSU.
Information that can be shared with parents, guardians, or students can be found on the NCDPI Testing Policy and Operations webpage at 2023-24 Request for Testing Exceptions Based on Significant Medical Emergencies and/or Conditions.

**Policies and Procedures for Students Receiving Services at a Visited School**
Accountability policies and procedures regarding students receiving services at a visited school apply to all public school students in grades K–12.

Per General Statute § 115C-366(a), “All students under the age of twenty-one (21) years who are domiciled in a school administrative unit and who have not been removed from school for cause, or who have not obtained a high school diploma, are entitled to all the privileges and advantages of the public schools to which they are assigned by the local boards of education.”

Per General Statute § 115C-107.1(a)(2), “any child with a disability who is receiving special education and related services and has not graduated from high school with a regular diploma is eligible to continue to receive a free, appropriate public education until the end of the school year in which that child reaches the age of twenty-two (22).” IDEA participation regulation 34 CFR 300.116(e) specifies that in determining the educational placement of a student with a disability, “each public agency must ensure that a child with a disability is not removed from education in age-appropriate regular classrooms solely because of needed modifications in the general curriculum.” To exercise this responsibility for determining the least restrictive environment, the teams’ decision-making process would need to begin within the context of an age-appropriate classroom.

It is the responsibility of the district to assign a base school for each child of school age residing within the district who qualifies under the laws of North Carolina for admission to a public school. A school administrative unit may decide that it is in the student’s best interest to receive services at another school or from a service provider that is not part of the school system. These courses or services may be educational or special needs, such as those for children with disabilities or for ELs. In these instances, the base school still assumes responsibility for the student’s education.

With the permission of the local school administrative unit, a school has the right to allow a non-North Carolina public school student to attend. In doing so, the school accepts responsibility for the student’s education.

It is important that districts and schools understand the policies and procedures for including all students attending a school (whether in membership, cross-enrolled, or visiting) in the Annual Testing Program.
• Students who are cross-enrolled or are visiting a school are required to participate in the state’s testing program, if eligible.
• Eligibility is determined by the Annual Testing Program and includes grade-level and course enrollment. Specific eligibility requirements are published each year and can be found in the test administration guides.

The policies and procedures for reporting test results apply.
• If there is a base school, test results go back to the base school and are included in the accountability results of the base school.
• If there is no base school, test results remain at the visited school and are included in the accountability results of the visited school.

Definition of Terms
1. Average daily membership (ADM). Average daily membership is the count of students in membership who receive an elementary, middle, or secondary education at public expense. To be included in ADM, a student must have a class schedule that is at least one-half of the school’s instructional day. Students who have a schedule less than one-half of an instructional day must be assigned as visiting students and are not included in ADM.
2. Base school. The base school is the school in which the student is reported for ADM (i.e., in membership). A district cannot serve as a base school. Each local board of education is authorized and directed to provide for the assignment to a public school (i.e., base school) of each child residing within the district who is qualified under the laws of North Carolina for admission to a public school.
3. Cross-enrolled school. A cross-enrolled school is a school other than the student’s base school that provides a course(s) or educational services to the student that are not available at the student’s base school.
4. Cross-enrolled student. A cross-enrolled student is in membership at the base school but is taking a course(s) or receiving educational services at another school.
5. Visited school. The visited school is the school in which the student takes a course(s) or receives educational services. The student is not reported in ADM (i.e., membership) at the visited school. A district cannot serve as a visited school.
6. Visiting student. A visiting student is not in ADM at a base school but is taking a course(s) or receiving educational services at a visited school.
7. Community residential centers, developmental day centers, or contracted service providers. Districts and schools “furnishing special education and related services to children with disabilities may contract with private special education facilities or service providers to furnish any of these services that the public providers are unable to furnish” (pursuant to G.S. § 115C-111.2).
8. **Clustered exceptional children (EC) students (term for accountability purposes).** Clustered exceptional children students are students with disabilities (with current IEPs) who may be grouped in a school other than their school attendance area. EC students must be administered all required state tests. The test results of these students may be electronically moved to an attendance area school determined by the district whereby test results will be included in the accountability results of that school.

**Cross-enrolled students within the same districts.** A cross-enrolled student’s test results are included in the accountability results at the base school. There are several contexts in which students may be cross-enrolled (i.e., attending two different schools). For accountability purposes, the base school and visited school should adhere to the following procedures regarding cross-enrolled students:

- The base school should have a master schedule for the cross-enrolled student. The master schedule for the cross-enrolled student should
  - include all classes and courses taken at the base school and include each class and course taken at the visited school, and
  - use appropriate state course codes.
- The base school is responsible for ensuring the cross-enrolled student is administered all required state tests.

**Visiting students.** A visiting student’s test results are included in the accountability results at the visited school. There are several contexts in which a student may be a visiting student (i.e., attending a school without a base school). For accountability purposes, the visited school should adhere to the following procedures for students who are visiting but do not have a base school:

- PowerSchool should record the student as visiting and not in ADM.
- The visited school should have a master schedule for the student. The master schedule for the student should
  - include all courses taken at the visited school, and
  - use appropriate state course codes.
- The visited school is responsible for ensuring the student is administered all required state tests.
  - If the visited school administers a state test to the student, the student’s test results (e.g., EOC, EOG) remain at the visited school and are included in the visited school’s accountability results. For paper administrations, administrators or other designated school personnel are to transcribe the student’s answers circled in the test book into the online testing system under the visited school; the student’s responses are included in the visited school’s accountability results. If the responses are not transcribed into the online testing
Examples for Clarification

The following are examples and guidelines regarding requirements to test cross-enrolled and visiting students:

1. **Foreign exchange students.** The district and school are responsible for ensuring all required state tests are administered to foreign exchange students. The student is enrolled in a visited school as a visitor and not counted in ADM. Test results remain at the visited school and are included in the visited school’s accountability results.

2. **Private school or home-schooled students.** The district agrees to allow a private school or home-schooled student to take a class(es) or course(s) at the visited school. The district and school are responsible for ensuring all required state tests for the class or course the student is enrolled in are administered to the visiting student. Because there is no base school, test results remain at the visited school and are included in the visited school’s accountability results.

3. **Nondomiciliary students attending a North Carolina school pursuant to an agreement with a district or school.** In some instances, pursuant to an agreement with the district or school, students may be admitted to a North Carolina school in which they are not domiciliary. For example, a student’s family may live in Virginia and one of the parents teaches in North Carolina. The student (pursuant to an agreement with the district or school) attends the school in which the parent teaches. The student is not reported in ADM but is eligible to take state tests in the class(es) or course(s) the student is taking through the school. The district and school are responsible for ensuring all required state tests are administered to the student. Test results are used for accountability results at the visited school. Note: The student is eligible for a North Carolina high school diploma.

Nondomiciliary students meeting specific requirements. A student who is not domiciliary of a local school administrative unit may attend, without payment of tuition, the public schools of that school administrative unit if the student resides with an adult domiciliary of that unit as a result of the death, serious illness, or incarceration of a parent or legal guardian; the abandonment by a parent or legal guardian; the inability of the parent or legal guardian to provide adequate care and supervision because of a physical or mental condition; or the loss or uninhabitability of the student’s home as a result of a natural disaster. The student must not be under a term of suspension or expulsion, and affidavits must be completed by the adult with whom the student resides and the student’s
parent, guardian, or legal custodian (G.S. § 115C-366). If a student meets the requirements of G.S. § 115C-366, the student is in ADM. Therefore, this is the student’s base school. The district and school are responsible for ensuring all required state tests are administered to the student. Test results are used for accountability results at the base school.

4. **Nondomiciliary students attending a NC school as due to the parents’ or legal guardians’ active military deployment.** Pursuant to General Statute § 115C-366 (1) (g), a student who is a nondomiciliary of North Carolina as a result of the parents’ or legal guardians’ active military deployment may attend, without payment of tuition, the public schools within a district or a specific school if the student meets the following requirements: (1) the student resides with an adult who is a domiciliary of that district or school, (2) the period of deployment is thirty days or longer, and (3) the school is provided evidence of the deployment along with the affidavits required under subdivision (3) of subsection (a3) of this Statute. If a student meets the requirements of General Statute § 115C-366, the student is in ADM at a base school within the district or school. Therefore, the district or school is responsible for ensuring all required state tests are administered to the student. Test results are included in the accountability results at the base school.

5. **Special education services.** Districts and schools furnishing special education and related services to children with disabilities may contract with community residential centers, developmental day centers, or contracted service providers to furnish services that the public providers are unable to furnish (pursuant to General Statute § 115C-111.2). Title VIII, General Provisions, Part A, Sec.8101(1)(D) of the Every Student Succeeds Act (ESSA) states:

“(D) CHILDREN WITH DISABILITIES. If a local educational agency makes a tuition payment to a private school or to a public school of another local educational agency for a child with a disability, as defined in section 602 of the Individuals with Disabilities Education Act, the Secretary shall, for the purpose of this Act, consider the child to be in attendance at a school of the agency making the payment.” The child is not considered to be in attendance at a school of the agency receiving the payment. All agencies not associated with local school administrative units, the Department of Health and Human Services, or the Division of Juvenile Justice must meet standards that apply to state and local educational agencies and secure the rights the students would have if served by the state or local educational agency.

a. Community residential centers. Pursuant to General Statute § 115C-366 (a1), children living in and cared for and supported by an institution established, operated, or incorporated for the purpose of rearing and caring for children who do not live with
their parents are considered legal residents of the district in which the institution is located. These children are eligible for admission to the public schools of the local school administrative unit as provided in this section. For additional information that outlines in more detail the steps community residential centers are to follow, see Section O, subsection Community Residential Centers—Testing Policy of this handbook.

Example: A student residing in County A goes to live at a residential center in County B. As soon as the student becomes the ward of the residential center in County B, the student is no longer in membership in County A. County B must select a school within County B and enroll the student as a visitor. County B is responsible for the educational services of the student. All required state tests must be administered to the student. Test results are used for accountability results at the base school.

b. Developmental day centers. Special education and related services are provided to eligible children with disabilities who are placed in accredited developmental day centers by local school administrative units.

Example: If the district cannot provide services for a student, the district may place the student in a developmental day center. In this case, the student is enrolled at a base school in the district; the developmental day center becomes an extension of the school. The district is responsible for testing the student on all required state tests. The test results are included in the accountability results at the base school.

Example: If a district has made a free and appropriate public education available in the district and the parents of a child elect to place the child in a developmental day center for educational services, the district is not responsible for the cost of education, nor is the student required to be tested.

c. Contracted service providers. Local school administrative units may contract with service providers to furnish services that public providers are unable to furnish.

Example: A student in County A needs an educational service that is only available in County B. County A contracts with County B for the service. ADM for the student remains in County
A. County A is responsible for ensuring all required state tests are administered to the student. Test results are used for accountability results at the base school in County A.

d. Parentally placed private or home school students. Parentally placed private or home school students who receive services through a service plan are not required to be tested.

Example: Districts and schools are required to ensure equitable participation for students with disabilities. In cases where a parentally placed student in a home school attends a public school through a service plan, such as speech therapy, the student may be enrolled as a visitor. The student is not eligible for participation in the Annual Testing Program unless the student also enrolls in a content area course. In this case, refer to letter e below.

e. Parent or legal guardian contracts with the PSU for a course. If the parent or legal guardian contracts with the local school administrative unit for a course, then the student needs to be tested. The school administrative unit is responsible for ensuring all required state tests are administered to the visiting student. Because there is no base school, test results remain at the visited school and are included in the visited school’s accountability results.

f. North Carolina publicly places a student in a private facility. In a situation in which North Carolina publicly places a student in a private facility during the school year, the district and base school are responsible for ensuring all required state tests are administered.  
   - The district and base school are responsible for notifying the private facility of the required tests, policies, and procedures, and for arranging the test administration date and location. If the private facility will administer the state test(s), the district and base school must ensure all security policies and procedures are maintained.  
   - For accountability purposes, the test results of such a student must be included in the accountability results at the base school.

6. **Summer program students taking EOC and EOG tests.** The summer program is an additional learning opportunity that occurs outside of the regular academic calendar. Tests taken at the end of a summer program must be completed before the end of the current accountability year and
uploaded to the Office of Accountability and Testing by the defined end of
the accountability year date. Accountability results will be attributed to
the base school for the student in the spring of the accountability year.

7. **Summer school students taking EOC tests.** Summer school takes
place during the summer and provides students the opportunity to
participate in a high school course in one of two ways:
   a. Course for credit. Students receiving instruction in courses that require
the administration of the EOC test and having obtained a proficient
score previously on the EOC test may use the proficient score as at
least twenty percent of their final grade, or they may elect to take the
appropriate EOC test at the completion of the course. Students who
have not obtained a proficient score on the EOC test before 2023–24
must take the appropriate EOC test at the completion of the course.
   b. Credit recovery. Students receiving instruction in credit recovery
courses may be administered the appropriate EOC test no later than
thirty days after completion of the course.
   c. Summer school test scores. Summer school test scores are returned
to the base school the student attended in the spring for inclusion in
the accountability results for the new accountability year.

Example: Student A attended school at School X in the spring of 2023–
24. This student then attended summer school at School Y in July of
2024. The student’s resulting EOC score will be attributed to School X
in the 2024–25 school year.

8. **Clustered EC students.** Clustered EC students—a term used for
accountability purposes—are students with disabilities (with current IEPs)
who may be grouped in a school other than their school attendance area.
Clustered EC students must be administered all required state tests. It is
a district’s decision as to where test results from EC students’ scores will
count for accountability purposes. If students are appropriately cross
enrolled in PowerSchool to a school within a district for instructional
purposes, the students will have their scores sent to the base school as
defined in PowerSchool. If a student is not scheduled in this manner,
districts may complete the ACCHOME process to have the student’s
accountability measures attributed to the appropriate school.

9. **Hospital or homebound students.** Educational services for hospital or
homebound students are typically provided at a home or hospital by
school or district personnel. If a student is confined at home or in a
hospital, is unable to attend the base school, and is receiving homebound
instruction from the base school or district, the student is considered
hospital or homebound. Once PSU personnel have made contact (i.e., a
face-to-face meeting) with the student to provide instruction, the student
should be counted present for the span of time during which regularly
scheduled hospital or homebound instructional services are delivered. (Supporting documentation should be maintained at the school.) The base school is responsible for ensuring that all required state tests are administered. Medical exceptions can be submitted, if appropriate, and must include the current hospital or homebound documentation with current service dates noted. For accountability purposes, the test results of a hospital or homebound student must be included in the accountability results at the base school.

10. **North Carolina virtual public school.** The North Carolina Virtual Public School is not responsible for administering state tests. The base school is responsible for administering all required state tests. Test results shall be included in the accountability results at the base school.

11. **Learn and earn early college high schools.** Learn and earn early college high schools provide students with the opportunity to complete high school with a high school diploma and an associate degree or two years of transferable credit at no cost to the student. To participate in learn and earn, students must meet the course prerequisites set by the participating college or university. The base school is responsible for administering all required state tests. Test results shall be included in the accountability results at the base school. The graduation data is reported for the school where the student is included in ADM.

12. **Community college courses.** A public school student taking a community college course must be enrolled with the appropriate state course code designated for community college courses. Community college officials have the responsibility for verifying eligibility and acceptance of the articulated course or courses on a student’s high school transcript. For credit to be awarded in any individual course, all criteria of the Southern Association of Colleges and Schools Commission on Colleges must be met. The base school is responsible for administering all required state tests. Test results shall be included in the accountability results at the base school.

13. **Teacher-in-treatment programs.** Teacher-in-treatment programs are located at centers across the state, but the centers are not affiliated with a district or school. Students who are participating in a teacher-in-treatment program should remain in membership in their base school. Days of participation at the center should be posted as absences. The base school is responsible for administering all required state tests. Test results shall be included in the accountability results at the base school.

14. **North Carolina Department of Public Safety Division of Juvenile Justice and Delinquency Prevention (DJJ).** The DJJ facilities are responsible for administering all required state tests. Scores are not included in accountability results.

15. **Extended day program.** For students who attend an extended school day program and are in membership at a base school, the base school is
responsible for administering all required state tests. Test results shall be included in the accountability results at the base school.

16. **Vocational and career centers.** Students can take special vocational courses as well as academic courses at vocational and career centers. The student must be enrolled in the course at the base school. The base school is responsible for administering all required state tests. Test results shall be included in the accountability results at the base school.

17. **Schools housed in the same building.** There are several instances where two schools, each having different school codes, are housed in the same building (e.g., a S.T.E.M. school and a traditional school). For example, School A has school code XXX and School B has school code YYY. If a student is enrolled in School A and walks down the hall to take a class in School B, the student should be cross enrolled at School B. School A assumes responsibility for the education of the student and must ensure the student is administered all required state tests. Test results shall be included in the accountability results at School A, which is the base school.

**Community Residential Centers—Testing Policy**

Per General Statute § 115C-366 (a1), "Children living in and cared for and supported by an institution established, operated, or incorporated for the purpose of rearing and caring for children who do not live with their parents are considered legal residents of the local school administrative unit in which the institution is located. These children are eligible for admission to the public schools of the local school administrative unit as provided in this section." All required state tests must be administered to these students. Test results are used for accountability results at the base school.

The steps local school administrative units should follow for testing students at community residential centers are as follows:

1. Assign students at community residential centers to a base school.
   a. Assign the students at grades 3–12 who are served by a community residential center to a base school that includes their grade configuration. Grades 3–12 cannot use school code 292 or any other school code under 300. Students must be assigned to a school in the district. The district can determine which base school the scores will go to.
   b. Only students at grades PP, PK, K, 1, 2, and 12 or 13 (for students with disabilities who have completed the twelfth grade but have not graduated from high school and continue to receive a free appropriate public education until the end of the school year in which they reach the age of twenty-two) can use school code 292 as their base school number.
2. The district is responsible for ensuring all required state tests are administered to the students. Test results are included in the accountability results at the assigned base school.

3. The district test coordinator is responsible for ensuring all testing policies and procedures are implemented at the community residential centers and test security is maintained at all times.

4. Districts have two options available for assigning test administrators at community residential centers:
   a. Designated staff who are employed by the district and have received training in the appropriate test administration(s) can administer the required tests to the students residing at the community residential centers.
   b. Community residential staff members who provide instruction to the student(s) residing in the center may attend test administrator training provided by the district accountability staff and administer the required test(s) to their students. The following procedures apply for this option:
      i. Community residential staff must attend face-to-face test administration training (including training on the guidelines for the use of accommodations) conducted by the district before the administration of any state-required test(s).
      ii. A test security agreement by and between the district and community residential center and its employee(s) must be signed at the time of training and kept on file at the district. The agreement is to ensure compliance with all state policies and procedures pertaining to the administration of secure state tests, test administrator training, irregularities reporting, materials handling, and test security. (The district assumes responsibility for test security.)
      iii. For online tests and NCEXTEND1, the district will need to collaborate with each community residential center test administrator to create an NC Education account. District test coordinators must ensure that these accounts have proper roles and permissions. On days before testing, the district test coordinators must go under the district tab on the enrollment screen and add students to the appropriate course. District test coordinators must ensure all pre- and post-test activities are completed for online tests as described in the appropriate test administration guides (e.g., scheduling test windows, ensuring proper entry of SIQs, and meeting all technology requirements).
      iv. For students with a documented need to record answers in a manner other than directly entering them into the online testing system (e.g., paper test administration, audiotape recording, assistive technology device, braille writer/braille paper), test
administrators or other designated school personnel must transcribe the student’s recorded answers into the online testing system. The students’ responses are included in the school’s accountability results. If the responses are not transcribed into the online testing system, the student will not receive a score. Transcription and verification must occur under secure conditions in a group setting (i.e., three or more designated school personnel). Note: For steps to follow when transcribing students’ responses, see the Transcription Instructions subsection in this handbook.

v. In some instances, in which the district has a current, signed security agreement between the community residential center and the district ensuring the security of all student data, the community residential center employees who are trained as test administrators may be provided access to the Every Child Accountability and Tracking System (ECATS). The district assumes responsibility for test security. For community residential center employees who are trained as test administrators but have not been given access to ECATS, the district test coordinators must plan to provide community center teachers with the necessary student accommodation information for testing purposes.

**NC School Report Cards**
The North Carolina School Report Cards provide information about K–12 public schools for local school systems and for the state.

Each report card includes a school or district profile and information about student performance, safe schools, access to technology, and teacher quality. By reviewing report card data, parents and others can learn more about school progress and resources.

**State Testing Results**
Reports of student performance for the EOG, EOC, and NCEXTEND1 tests are published annually in one publication, the Green Book.

Results from The ACT and ACT WorkKeys administrations are available at https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/school-accountability-and-reporting/act-reports.

The annual academic achievement of American Indian students is available at https://www.dpi.nc.gov/students-families/student-support/american-indian-education.
Appendix A: Directions for Accessing the Policies and Procedures Training Courses for Online and Paper Test Administrations

Directions for accessing the course:
1. Use the following link to access NC Education and the virtual training courses:  https://center.ncsu.edu/training/
2. Log in to NC Education with your username and password.
3. In the Navigation box, click Courses.
4. Select the appropriate course name based on the test format to be administered. Test administrators giving both online and paper tests must enroll and complete both courses.
   a. Policies and Procedures Training Course—Online Test Administrations
   b. Policies and Procedures Training Course—Paper Test Administrations
5. Click Enroll me.
6. Click Enter in the middle of the page to begin the course.
   a. “Pop-ups” will need to be allowed to access the course. The course will open in a separate window.
   b. The course will track the participant’s progress in the event the participant needs to log out and finish later. To save course progress, the participant must click the Exit Course button in the top right corner of the screen. If this button is not clicked, course progress will not be saved.
   c. The last page of the course displays a certificate of completion. The participant must type in his or her name and the date of completion. There are instructions on the bottom of the screen to assist participants with saving and printing a copy of the certificate of completion.
   d. After obtaining the certificate of completion, a hand-waving icon will appear on the screen and the browser may be closed.
Appendix B: Sample Parent or Guardian Letter—Opting Out of Required State Testing

School letterhead

Date

Dear (Parent or Guardian) ______________,

Thank you for taking the opportunity to express your concerns regarding the testing mandates of the Annual Testing Program. Having received your request for a waiver, __________County Schools/charter school is truly sympathetic to your concerns.

State and federal laws require all public school students in membership (i.e., enrolled in a school) in grades 3 through 8 and high school courses requiring an end-of-course test, to participate in the Annual Testing Program. North Carolina does not allow any student to opt out of required state testing. The only exceptions granted are for a limited number of students who meet certain eligibility requirements or have extenuating circumstances primarily related to a significant medical emergency or condition and are unable to participate in a specific test administration. Additionally, homeschooled students are required to be assessed annually on a nationally normed standardized test.

N.C. Admin Code 06D .0309 requires schools to use end-of-course tests as “at least twenty percent (20%) of the student’s final grade.” As such, a student’s grade for these courses and overall grade-point-average calculation may be negatively impacted by not taking the required end-of-course state tests. Schools have the flexibility to use end-of-grade test scores as necessary.

Please know that _____________ County Schools/charter school is trying to be responsive to parents’ concerns, yet we must adhere to state and federal guidelines that address the educational needs of all children.

Sincerely,
Appendix C: Parent’s Right to Know—Sample Letter

School letterhead

Date

Dear Parent or Guardian ______________,

This letter is intended to inform you that your student will take districtwide and state-mandated tests this school year as reflected on the attached test calendar, which is also posted online at ____________.

Per 16 N.C. Admin Code 06D .0307—Test Administration in Public Schools, “(g) LEAs shall, at the beginning of each school year, provide information to students and parents or guardians advising them of the districtwide and State-mandated tests that students will be required to take during that school year. In addition, LEAs shall advise students and parents or guardians of the dates the tests will be administered and how the results from the tests will be used. Also, information provided to parents shall include whether the State Board of Education or the local board of education requires the test(s). (h) LEAs shall report scores resulting from the administration of State-mandated tests from the Annual Testing Program to students and parents or guardians no later than 30 days after the test is administered and along with available score interpretation information within 30 days from receipt of the scores and interpretive documentation from the NCDPI.”

N.C. Admin. Code 06G .0315 requires all public school students in membership (i.e., enrolled in a school) in grades 3 through 8 and high school courses requiring an end-of-course assessment, to participate in the Annual Testing Program. North Carolina does not allow any student to opt out of required state testing. The only exceptions granted are for a limited number of students who meet certain eligibility requirements or have extenuating circumstances primarily related to a significant medical emergency or condition and are unable to participate in a specific test administration.

N.C. Admin Code 06D .0309 requires schools to use end-of-course tests as “at minimum of twenty percent of the student’s final grade for each respective course.” As such, a student’s grade for these courses and overall grade-point-average calculation may be negatively impacted by not taking the required end-of-course state tests. Schools have the flexibility to use end-of-grade test scores as necessary.

Sincerely,

Enclosure: Test calendar
Appendix D: Confidentiality and Test Security Agreements

Test coordinators will find the following confidentiality and test security agreements on the subsequent pages:

- District Test Coordinator—Confidentiality and Test Security Agreement
- Principal or Director—Confidentiality and Test Security Agreement
- School Test Coordinator—Confidentiality and Test Security Agreement
- Test Administrator—Confidentiality and Test Security Agreement
- Proctor—Confidentiality and Test Security Agreement
This form must be completed annually by the district test coordinator and kept on file with the regional accountability coordinator. If a new person is employed in this position, then the new person must complete this form as soon as possible.

District Test Coordinator—Confidentiality and Test Security Agreement

In performing my assigned duties and responsibilities as the district test coordinator, I understand that

1. maintaining test security and student confidentiality is critical to the mission of the North Carolina Department of Public Instruction (NCDPI).

2. my compliance with federal and state laws is crucial to maintaining the public’s trust in North Carolina public schools.

3. my assigned duties and responsibilities may involve the use of the North Carolina Department of Public Instruction’s data, local data, or other information that is confidential.

4. federal and state laws prohibit me from including or disclosing personally identifiable information (PII) in any form of communication with any unauthorized individual or entity, except as required in the performance of my assigned duties. Such communication includes, but is not limited to, email, instant messaging, or social media account posts (e.g., Facebook, Twitter, Instagram, Snap Chat).

5. I acknowledge that all North Carolina test materials are the property of the NCDPI and that these test materials must remain secure at all times.

6. in order to ensure test security, I will not discuss or share information relating to the contents of any test, testing process, or test scoring. This restriction applies to discussion with mass media, including, but not limited to, print, radio and television media, and social media.

7. I will not publish any secure testing or scoring material or share this material outside of the secure work site.

8. I am obligated to read the Testing Code of Ethics in its entirety annually and always understand and act in accordance with the test coordinator’s obligations described therein.

My signature below indicates my agreement to abide by and fulfill the obligations and duties described above. I understand that violation of this agreement constitutes personal misconduct and may result in disciplinary action, up to and including, dismissal, without prior warning. Further, I understand that violation of this agreement could lead to additional legal liability to me.

Principal or Director—Confidentiality and Test Security Agreement

In performing my assigned duties and responsibilities as the principal or director, I understand that

1. maintaining test security and student confidentiality is critical to the mission of the North Carolina Department of Public Instruction (NCDPI).

2. my compliance with federal and state laws is crucial to maintaining the public’s trust in North Carolina public schools.

3. my assigned duties and responsibilities may involve the use of the North Carolina Department of Public Instruction’s data, local data, or other information that is confidential.

4. federal and state laws prohibit me from including or disclosing personally identifiable information (PII) in any form of communication with any unauthorized individual or entity, except as required in the performance of my assigned duties. Such communication includes, but is not limited to, email, instant messaging, or social media account posts (e.g., Facebook, Twitter, Instagram, Snap Chat).

5. I have read and will follow school policies and procedures to ensure all eligible students are tested fairly.

6. I am responsible for ensuring all necessary school personnel are identified and trained prior to any test administration.

7. I acknowledge that all North Carolina test materials are the property of the NCDPI and that these test materials must remain secure at all times.

8. I am responsible for ensuring a procedure is in place at my school to assure that all test materials are accounted for and secure at all times while they are in the school’s possession.

9. in order to ensure test security, I will not discuss or share information relating to the contents of any test, testing process, or test scoring. This restriction applies to discussion with mass media, including, but not limited to, print, radio and television media, and social media.

10. I will not publish any secure testing or scoring material or share this material outside of the secure work site.

11. I am obligated to read the Testing Code of Ethics in its entirety annually and always understand and act in accordance with the principal’s obligations described therein.

My signature below indicates my agreement to abide by and fulfill the obligations and duties described above. I understand that violation of this agreement constitutes personal misconduct and may result in disciplinary action, up to and including, dismissal, without prior warning. Further, I understand that violation of this agreement could lead to additional legal liability to me.

*To include charter, lab, and regional test coordinators
This form must be completed and signed by the test administrator at each test administrator training session and kept on file with the school test coordinator.

Test Administrator—Confidentiality and Test Security Agreement

School Name: ________________________ Test Name: ________________________

In performing my assigned duties and responsibilities as the test administrator, I understand that

1. I must administer the test listed above according to all state and local regulations and policies as printed in the test administration guide, the Testing Code of Ethics, and other information provided in the training session(s) conducted by the school test coordinator.

2. My compliance with federal and state laws is crucial to maintaining the public’s trust in North Carolina public schools.

3. I must review, study, and understand the test administration guide and the Testing Code of Ethics that was given to me by the school test coordinator.

4. I must count and record the number of secure test materials, including supplemental materials, before and after the test administration and notify the school test coordinator of any discrepancies in the counts.

5. I must maintain test security at all times while test materials are in my possession.

6. I will not copy, post, or reproduce test items in any manner or in any medium for any reason.

7. I will not modify, change, alter, or tamper with student responses during or after the test administration.

8. I will conduct an unbiased administration of the test according to the policies, procedures, and directions (as written) in the test administration guide.

9. I must remain in the room throughout the entire test administration.

10. I will report any testing irregularities to the school test coordinator on the day of the occurrence.

My signature below indicates my agreement to abide by and fulfill the obligations and duties described above. I understand that violation of this agreement is constitutes personal misconduct and may result in disciplinary action, up to and including, dismissal, without prior warning. Further, I understand that violation of this agreement could lead to additional legal liability to me.

If proctors are utilized, this form must be completed each testing cycle and signed at the conclusion of proctor training. A copy of this signed form must be kept on file at the school with the school test coordinator.

Proctor—Confidentiality and Test Security Agreement

In performing my assigned duties and responsibilities as the proctor, I understand that

1. I cannot be assigned to test sessions where my relatives or wards are testing and where the test administrator is a personal family member or close acquaintance.
2. I cannot distribute or collect test materials, read directions, assist students on the test, or review student information or responses.
3. I cannot use a cell phone or electronic device during testing, including breaks. Test administrators and students are not allowed to use cell phones or electronic devices during testing, including breaks. (Students testing online may use approved electronic devices.)
4. I will assist school personnel in maintaining test security at all times by ensuring secure test materials are not discussed or disclosed in any manner (copying, posting, or reproducing).
5. I will assist in monitoring the testing environment and minimize distractions and interruptions in the testing environment.
6. I will assist school personnel in ensuring appropriate test administration procedures are followed.
7. I will assist students with emergencies and restroom breaks.
8. I will assist school personnel in ensuring accommodations are provided appropriately. School staff will discuss the type of accommodation(s) student(s) will receive, how the test administration will differ from what is considered standard administration, and the specific procedures necessary to provide the accommodations(s) prior to the test administration.
9. I will monitor the distribution of materials as specified by the script in the test administration guide. (Exceptions include approved supplemental materials or designated features such as highlighters, colored pencils, color acetate overlays, and students who receive a sample copy of the English II constructed response space or mathematics grid.)
10. I will monitor students during the test session.
11. I will maintain student confidentiality and must not disclose any personally identifiable information (PII) about individual students. (Student information is protected by federal privacy laws.)
12. I will report all testing irregularities or testing violations to the school test coordinator or principal on the day of occurrence.
13. I have reviewed and understand the Testing Code of Ethics (found in the back of The Proctor’s Guide) before proctoring a test administration.

My signature below indicates my agreement to abide by and fulfill the obligations and duties described above.

Appendix E: Sample 2023–24 Public School Unit (PSU) Annual Testing Plan

PSU Name: ________________________________ PSU Code: __________________________

PSU Test Coordinator: ______________________________

PSU test coordinators shall ensure a written annual testing plan for the school is developed and duly disseminated before the beginning of the school year. Plans should also be available in an electronic format and include “Sample” documents that will be used for testing throughout the year. The annual testing plan clarifies local procedures. Testing staff are still required to read and follow all of the NCDPI’s Annual Testing Program’s testing publications related to state tests. The superintendent or school director ensures that the public school unit (PSU) accountability contact, and school test coordinators (STCs) are accurately coded in the Educational Directory and Demographical Exchange (EDDIE) throughout the school year. PSUs may use or modify this template to develop their annual testing plan.

Test Administrators and Proctors

- Proctors (will or will not) be utilized. If utilized, include a description of local proctor requirements, including the bullets below:
  - Proctors assigned: (1) a one-on-one, full-time proctors and/or (2) roving proctors.
  - The school will use the following procedures for roving proctors, who can assist up to three test administrators in three testing rooms:
    - Roving proctors will not be responsible for more than three, centrally located classrooms.
    - Roving proctors will spend _____________ minutes in each room before rotating to the next room to proctor.

Training

- All school staff (i.e., principal, school test coordinator, test administrators) who handle secure test materials must sign a confidentiality and test security agreement.
- Signed confidentiality and test security agreements will be kept (location).
- The STC will provide annual accommodations and security training to all instructional staff.
- Training materials and sign-in sheets will be kept (location).
- The STC trains all proctors, if utilized, before testing. Proctors sign a confidentiality and test security agreement. Signed proctor agreements are kept on file at the school with the STC.
- The STC trains all potential test administrators at least one week before the first day of testing. Administrators will sign a sign-in sheet and a confidentiality and test security agreement. The school principal or director is encouraged to attend test training.
- Before testing, the STC trains all test administrators on the use of the specific accommodations that will be provided to students in their assigned test settings.
The following chart provides the name of each required test security document, the person(s) required to sign each document, and when each document must be signed.

* Charter school test coordinators (STC) must submit all documents to their regional accountability office, except for the signed Proctor—Confidentiality and Test Security Agreements which are kept on file at the charter school with the STC.
Test Materials Security
• The STC stores materials in a locked, secure, limited-access facility until needed for testing. Include a brief description of where secure materials will be stored. Include a list of all personnel granted access to this location.
• Describe the procedures and timeline for the secure checking out and checking in of test materials to ensure that at each level of distribution and collection all secure materials are tracked, returned, and accounted for.
• Describe the procedures and timeline for returning test materials to the district TC (TOPS for charter schools).

Testing Environment
• Food and drink (are or are not) permitted in test sessions. For vendor tests, consult the test administration manual for permitted food and drink policies.

Accommodations Documentation
Accommodation Entry in PowerSchool. Accommodation information in PowerSchool derives from two sources:
1. IEP: (Name of person or position) is responsible for entering and updating the IEP details and accommodations information into ECATS for students identified as exceptional children (EC).
2. Section 504 Plan and English Learner (EL) documentation: (Name of person or position) is responsible for entering the special program participation and the accommodation information in the appropriate pages in PowerSchool for students with a Section 504 Plan or EL documentation. For each school year, the initial entry of special program assignment and accommodations must be completed by October 1 for returning students. PowerSchool entries for special program participation and accommodations must be made by the first of each month following initial assignment to a special program, annual review of the plan, and/or the addition of accommodations.

School Testing Plans and Self-Monitoring Procedures
• The STC securely submits a school test plan to the PSU TC (for districts) or the RAC (for charter, lab, and regional schools) at least two weeks before the first day of testing for each test, such as RTA, BOG3, ACCESS, and no later than May 1 for end-of-year testing.
• (Persons designated) completes monitoring during testing with the goals of preventing any avoidable irregularities and ensuring that there are no errors in the coding. These staff members need to have access to the testing plan and should use the following self-monitoring procedures:
  ✓ Make sure the TC is accessible.
  ✓ Inquire about students’ test preparation. Before testing starts, ask a couple of students in online test settings if they watched the online tutorial video and if they had a chance to do the sample test items on the device they will use for testing.
  ✓ Check to see if the bells are turned off.
  ✓ Check that each testing site has a DO NOT DISTURB sign on the door.
  ✓ Check to see if there is a test administrator in each room.
  ✓ If utilized, check to see if there is a proctor (one-on-one or roving) serving where designated.
  ✓ Observe whether each test administrator is providing a positive test-taking environment.
✓ Check to see if there are enough testing materials (e.g., scratch paper, calculators, etc.).
✓ Be sure the test administrator and proctor (if utilized) remain in the room throughout the testing and move frequently and quietly around the room monitoring students.
✓ Check to be sure that classroom displays that provide information regarding the content being measured by the test or test taking strategies are covered or removed.
✓ Ensure that visitors are not allowed into the testing site during testing. (Monitoring staff are not visitors.)
✓ Report any noise or disruptions.
✓ Randomly select (the number or percent is a local decision) students receiving accommodations during each testing period. Pull the IEP, EL Plan, Section 504 Plan, or transitory impairment documentation. Make sure that the accommodation(s) each student is receiving matches those listed on the plan/documentation and on the Review of Accommodations form. Record (1) the information from the IEP, EL Plan, Section 504 Plan, or transitory impairment documentation, (2) the accommodations listed on the Review of Accommodations form; and (3) the accommodations observed in the testing site on the Self-Monitoring Report Form.
✓ Complete the Self-Monitoring Report Form for each testing period and keep it on file at the school.

Testing Irregularities Reporting Procedures

• (Name and Role) follows all state procedures for submission of testing irregularity reports into the Online Testing Irregularity Submission System (OTISS).

• If a student refuses to use a documented accommodation or if the student is not provided a documented accommodation, the school must obtain a written statement from the parent or guardian before receiving score results. The statement indicates whether the parent waives the right to have the student retested or will accept the score results from the initial administration. (See the sample Testing Irregularity Parent or Guardian Notification Form.)

Online Testing

• Schools ensure every student participating in an online assessment has completed the appropriate Online Assessment Tutorial at least one time before test day. The process for verifying completion of the tutorial is (describe procedures).

• The test administrator ensures any information from the test saved or cached on any network appliance or computer is purged or deleted immediately following the completion of the test administration. To ensure this step, all devices are shut down after each test administration.

Online Testing Log In Flexibility

• The Annual Testing Program’s policy for online test administrations recommends test administrators begin setting up devices thirty to forty minutes before students begin testing. School test coordinators are expected to develop, distribute, and train on a written plan that outlines secure procedures for schools to follow when students either remain or do not remain in the room while devices are being set up.
• List the secure, locally determined test day login procedures for online testing. Determine if test administrators will log in each student at a device or if students will log in to the test themselves using an access code. The plan must outline procedures that ensure (1) students cannot see secure test administrator usernames and passwords while the test administrator logs into the devices; (2) students cannot see the secure student ID numbers and student access codes of others while logging themselves in to their device; (3) upon login, each device is set to the start page with the correct student’s name and PowerSchool number, test name, and school name correctly identified on each device; and (3) students do not begin using their device until they are instructed to do so.

• The school (will or will not) allow students to log themselves in to the test.

• The school (will or will not) allow teachers to log in each student to the test.

• The school (will or will not) allow both students to log themselves in to the test and allow teachers to log in students to the test.

Arrangements for Completing Makeups

• Each test administrator takes attendance and reports absences by (describe procedures) before starting the test session.

• The STC designates someone to contact all students absent from the test session. (Person responsible) will contact all students who are absent from the test session on the day of testing.

• The STC lists all students ABSENT from makeups.

Family Educational Rights and Privacy Act (FERPA) Protocol

• To protect the confidentiality of individuals from those who do not have access to individual-level data, personally identifiable information (PII) should be transmitted using the following method:
  o Secure FTP server based on SFTP or RTPS protocols.

Include a brief description of how the PSU will use secure transfer protocols to share PII.

PSU Testing Templates. All templates that are used in conjunction with the PSU’s annual testing plan, must be included in the annual testing plan. PSUs can use all or some of the sample templates located in the Appendixes of this handbook. The templates provided may be modified for local use, or the PSU may develop other documents that suit their needs.

- What locked, secure storage area in the school will be used for storing test materials? Materials will be stored in the vault room in the main office. During testing, all keys will be collected, so that only the school test coordinator and the director can access this space.
- Where will test administrators pick up and return test materials? Test administrators will pick up/return materials in the media center.
- What are the procedures (who, when, where and how) for transcribing students’ test responses? Ensure three or more school personnel are present for the transcription process. After testing ends, in group of three school personnel or more, students’ recorded responses will be entered into the online testing system.

Appendix H: Sample Materials Checkout/Check-In Sheet

Complete before the Testing Session

I acknowledge that I have attended training for the _________________ test and have received and read a copy of the test administration guide. I further acknowledge that I am responsible for information provided during training and for understanding and adhering to the contents of the test administration guide, including the Testing Code of Ethics.

Teacher Signature: __________________________ Date: __________________

Please note the number of materials received for each item:

<table>
<thead>
<tr>
<th>Materials</th>
<th>Number at Sign-out (Completed by test administrator before test administration)</th>
<th>Number at Sign In (Completed by checker after test administration)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test books</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Check off any of the following items received:

- blank paper
- writing utensils
- testing sign
- graph paper
- periodic tables
- Review of Accom. forms

Signature of test administrator (teacher) at checkout: __________________________

Signature of person checking in materials after the test (Checker): __________________________

Students absent from this test session:

1. ___________________  2. ___________________  3.  ____________________

Complete after the Testing Session:

I, __________________________, affirm that I adhered to the following rules and procedures during the students’ test administration.

1. I read and complied with all the procedures in the Testing Code of Ethics.
2. I maintained test security at all times.
3. I administered the tests according to the directions in the test administration guide and any subsequent updates developed by the test publisher.
4. I administered the test to all eligible students.
5. I reported all testing irregularities to the school system test coordinator.
6. I provided a positive test-taking climate.

Teacher Signature: __________________________ Date: __________________
Proctor Signature: __________________________ Date: __________________
Proctor Name (Please Print Clearly): __________________________
Appendix I: Sample Testing Irregularity Parent or Guardian Notification Form

Student: ___________________________  Grade: ____________

Test and Subject: _______________________  PowerSchool ID: __________________

Teacher: ____________________________  Test Date: ____________

School Test Coordinator (STC): ________________  STC Phone: ________________

The following testing irregularity occurred during testing today, which invalidates your child’s test results.

Your child’s test will not be scored, and your child is scheduled to retake the test on

_______________________________________________________________________________________

Description of Testing Irregularity:

_______________________________________________________________________________________

_______________________________________________________________________________________

_______________________________________________________________________________________

_______________________________________________________________________________________

Waiver of Right to Retake the Test

In some cases, you may choose to waive the right for your child to retake the test and accept the scores from the test already taken. Please sign and return this form to the school test coordinator before the retake test date listed above. If this form is not returned by the retake date, the test will be readministered to your child as indicated. Note: The test already taken is deemed invalid and will not be scored unless you choose to waive the right for your child to retake the test.

☐ I would like my child to retake the test. I understand we will not receive results from the original test.

☐ I do not want my child to retake the test. I understand that the results from the test already taken will be used. Furthermore, I understand I am waiving the rights for my child to retake the test.

Appendix N: State Board of Education Policies, North Carolina Administrative Codes, and Legislative Requirements

This section contains SBE policies, N.C. Admin. Codes, and other legislative requirements related to the Annual Testing Program.

Appropriate Use of State Tests and Testing Program Documents

- **TEST-009**—Policy regarding rules, guidelines, and procedures governing the Annual Testing Program.
- **TEST-013**—Policy delineating the test development process for multiple-choice tests.
- **TEST-015**—Policy outlining time devoted to standardized testing.
- **16 N.C. Admin. Code 06D .0310**—Policy delineating the appropriate use of state tests.

Test Security

- **16 N.C. Admin. Code 06D .0311**—Policy of administrative testing procedures and Testing Code of Ethics.

End-of-Course Tests

- **CCRE-001**—Policy defining “Course for Credit”.
- **16 N.C. Admin. Code 06D .0309**—Policy specifying the requirements for end-of-course testing (eligibility, participation, dropping a course, use of results). Note: For additional clarification on students excluded from the twenty percent grade calculation, see SBE policy **TEST-003**.

Testing Students Who Are English Learners

- **TEST-011**—Policy outlining EL identification, participation in the Annual Testing Program, eligibility for testing accommodations, exit criteria, ACCESS for English language learners proficiency levels and performance definitions.

Graduation Requirements

- **ACCT-039**—Policy delineating the cohort graduation rate.
- **GRAD-001**—Policy giving the local school boards of education the authority to exceed minimum graduation requirements.
- **GRAD-004**—Policy delineating state graduation requirements.

Academic Achievement Standards and Achievement Level Descriptors

- **TEST-033**—Policy defining the academic achievement standards and achievement level descriptors for the Beginning-of-Grade 3 Reading Test,
the Read to Achieve Test, and the end-of-grade tests in reading, mathematics, and science.

- **TEST-036**—Policy defining the academic achievement standards and achievement level descriptors for end-of-course tests.
- **TEST-037**—Policy defining the academic achievement standards and achievement level descriptors for NCEXTEND1 alternate assessments.

**Accountability Model**

- **ACCT-020**—Policy delineating the components of the accountability model.
- **CHTR-001**—Policy delineating charter school accountability requirements.
- **16 N.C. Admin. Code 06G .0315**—Policy delineating the accountability annual performance standards.
- **16 N.C. Admin. Code 06G .0314**—Policy delineating the alternative schools’ modified accountability system.

**Use of Test Results**

- **GS §115C-288 (a)**—Law granting principals the authority to grade and classify students; this law instructs principals not to make the decision solely based on standardized test scores.
- **16 N.C. Admin. Code 06D .0309**—Policy requiring schools to use results from all operational EOC tests as at least twenty percent of the student's final grade for each respective course (with exceptions).

**Other Policies Related to the Annual Testing Program**

- **16 N.C. Admin. Code 06D .0307**—Policy governing test administrations in public schools.
- **16 N.C. Admin. Code 06D .0308**—Policy governing the role of the testing coordinator.
Appendix O: Testing Code of Ethics

Introduction to the Testing Code of Ethics

In North Carolina, standardized testing is an integral part of the educational experience of all students. When properly administered and interpreted, test results provide an independent, uniform source of reliable and valid information, which enables:

- **students** to know the extent to which they have mastered expected knowledge and skills and how they compare to others;
- **parents** to know if their children are acquiring the knowledge and skills needed to succeed in a highly competitive job market;
- **teachers** to know if their students have mastered grade or course-level knowledge and skills in the curriculum, and if not, what weaknesses need to be addressed;
- **community leaders and lawmakers** to know if students in North Carolina schools are improving their performance over time and how the students compare with students from other states or the nation; and
- **citizens** to assess the performance of the public schools.

In order to achieve those objectives, teachers and administrators must conduct testing in a fair and ethical manner, which includes:

**Security**
- assuring adequate security of the testing materials before, during, and after testing and during scoring
- assuring student confidentiality

**Preparation**
- teaching the tested curriculum and test-preparation skills
- training staff in appropriate testing practices and procedures
- providing an appropriate atmosphere

**Administration**
- developing a local policy for the implementation of fair and ethical testing practices and for resolving questions concerning those practices
- assuring all students who should be tested are tested
- utilizing tests which are developmentally appropriate
- utilizing tests only for the purposes for which they were designed

**Scoring, Analysis, and Reporting**
- interpreting test results to the appropriate audience
- providing adequate data analyses to guide curriculum implementation and improvement

Standardized test scores are only one of the many indicators of how well the student is learning. Test scores should be used in conjunction with all other available information about a student to understand student progress and improve student learning. When administering tests, school administrators and teachers must comply with applicable statutes, rules, and policies. In particular, administrators and teachers must comply with the Testing Code of Ethics (16 N.C. Admin. Code 6D .0311), which is printed on the following pages.
16 NCAC 06D .0311 TESTING CODE OF ETHICS

(a) This Rule shall apply to all public school unit (PSU) employees or agents while they are administering the Annual Testing Program defined in Rule .0307(c) of this Section.

(b) The PSU shall develop local policies and procedures to ensure maximum test security in coordination with the policies and procedures developed by the test publisher.

(c) The PSU shall require all testing coordinators, school test coordinators, test administrators and proctors to be trained as required in Rule .0308 of this Section.

(d) The PSU shall designate the personnel who are authorized to have access to secure test materials. "Access" to test materials by school personnel means handling the materials but does not include reviewing tests or analyzing test items.

1. Persons who have access to secure test materials shall not use those materials for any purpose other than test administration.

2. No person shall copy, reproduce, or paraphrase the test materials without the express written consent of the test publisher.

(e) The principal shall store test materials in a locked facility to which only the principal has access. The principal shall not allow anyone access to the test materials except as necessary for administration.

(f) When PSU personnel discover loss of materials, failure to account for materials, or any evidence of unauthorized access to the materials, they shall report the discovery without delay to the principal, school test coordinator, school system (LEA) test coordinator, or charter school director.

(g) PSUs shall ensure that test coordinators:

1. plan and implement training for school test coordinators, test administrators, and proctors;

2. ensure each school test coordinator and test administrator is trained in accordance with Rule .0308 of this Section; and

3. in conjunction with program administrators, ensure test accommodations to students entitled to testing accommodations as defined in 16 NCAC 06G .0315; are documented and provided.

(h) The principal or the principal’s designee shall serve as school test coordinator.

(i) The principal shall ensure the school test coordinator maintains test security and accountability of test materials, including taking the following actions:

1. before each test administration, the school test coordinator shall count and distribute test materials;

2. after each test administration, the school test coordinator shall without delay collect, count, and return all test materials to the locked storage facility;

3. establishes procedures to assure all students participating in the Annual Testing Program have an equal opportunity to demonstrate their knowledge on the test; and

4. identifies and trains personnel, proctors, and backup personnel for test administrations.

(j) Teachers may help students improve test-taking skills by:

1. helping students become familiar with test formats using curricular content;

2. teaching students test-taking strategies and providing practice sessions;

3. helping students learn ways of preparing to take tests; and

4. using resource materials such as test questions from test item banks and linking documents in instruction and test preparation.

(k) With respect to test administration, PSUs shall:

1. assure each school establishes procedures to ensure all test administrators comply with test publisher guidelines;

2. inform the local board of education of any breach of this code of ethics; and

3. inform test coordinators and principals of their responsibilities.
(l) The school test coordinator shall:
   (1) assure school personnel know the content of rules in this Section and local testing policies;
   (2) implement the school system and local testing policies and procedures to assure all students participating in the Annual Testing Program have an equal opportunity to demonstrate their knowledge on the test;
   (3) ensure proctors are trained; and
   (4) ensure all violations of rules in this Section and local testing policies are reported to the school system (LEA) test coordinator.

(m) Test administrators shall:
   (1) administer tests according to the directions in the assessment guide and any subsequent updates developed by the test publisher;
   (2) administer tests to all students enrolled in a grade or course that requires a test in the Annual Testing Program;
   (3) report all violations of rules in this Section and local testing policies to the school test coordinator; and

(n) Proctors shall serve as additional monitors to help the test administrator assure that students have an equal opportunity to demonstrate their knowledge on the test.

(o) Scoring. The school system test coordinator shall:
   (1) ensure each test is scored according to the procedures and guidelines defined for the test by the test publisher;
   (2) maintain quality control during the entire scoring process, which consists of handling and editing documents, scanning answer documents, and producing electronic files and reports. Quality control shall address scoring accuracy and scoring consistency.
   (3) maintain security of tests and data files at all times, including:
      (A) protecting the confidentiality of students at all times when publicizing test results; and
      (B) maintaining test security of answer keys and item-specific scoring rubrics.

(p) Educators shall use test scores as one piece of information to be interpreted together with other scores and indicators when determining a student's grade. The PSU shall ensure that school personnel analyze and report test data within the limitations described in this Paragraph.
   (1) Educators shall maintain the confidentiality of individual students. PSU personnel shall not publicize test scores or any written material containing personally identifiable information from the student's educational records except as permitted under the provisions of the Family Educational Rights and Privacy Act of 1974, 20 U.S.C. 1232g and regulations adopted pursuant thereto.
   (2) Staff development relating to testing must enable school personnel to respond knowledgeably to questions related to testing, including the tests, scores, scoring procedures, and other interpretive materials.

(q) Unethical testing practices include the following practices:
   (1) encouraging students to be absent the day of testing;
   (2) encouraging students not to do their best;
   (3) using secure test items or modified secure test items for instruction;
   (4) changing student responses at any time;
   (5) interpreting, explaining, or paraphrasing the test directions or the test items;
   (6) classifying students for the purpose of avoiding State testing;
   (7) not testing all students enrolled in a grade or course that requires a test in the Annual Testing Program;
   (8) failing to provide required accommodations during testing to students entitled to testing accommodations as defined in 16 NCAC 06G .0315;
(9) modifying scoring programs including answer keys, equating files, and lookup tables;
(10) modifying student records for the purpose of raising test scores;
(11) using a single test score to place a student in a grade or a course; and
(12) providing inaccurate test results and interpretations to the public.

(r) In the event of a violation of this Rule, the State Board of Education may impose any one or more of the following sanctions:
(1) withhold any monetary incentive awards;
(2) file a civil action against the person or persons responsible for the violation for copyright infringement or for any other available cause of action;
(3) seek criminal prosecution of the person or persons responsible for the violation; and
(4) in accordance with the provisions of 16 NCAC 06C .0312, suspend or revoke the professional license of the person or persons responsible for the violation.

History Note: Authority G.S. 115C-12(9); 115C-174.11; 115C-174.12; 115C-218.85(a)(3);
Emergency Adoption Eff. August 20, 2019;
