# INTRODUCTION

This Quick Reference Guide for The North Carolina Standard Course of Study is a resource for teachers as they plan instruction to implement the North Carolina Standard Course of Study across multiple content areas. There are nine Quick Reference Guides available - one for each of the grade levels from kindergarten through 8th grade. The inclusion of standards for all subject areas within single, grade-specific documents is intended to make planning for instruction more efficient and may be particularly useful for educators teaching multiple disciplines or collaborating to plan integrated instruction.

The Reference Guides contain the standards and objectives for each content area's North Carolina Standard Course of Study and North Carolina Extended Content Standards. The alternate achievement standards are designed for students with significant cognitive disabilities so they can have access to the Standard Course of Study at grade level. The North Carolina Extended Content Standards were developed for English Language Arts, Mathematics, Science, and Social Studies, and are accessible online at: https://ec.ncpublicschools.gov/disability-resources/ significant-cognitive-disabilities/nc-extended-content-standards. The NC Extended Content Standards for English Language Arts and K-8 Mathematics were adopted in 2017 and will be implemented during the 2018-19 school year.

North Carolina's Standard Course of Study defines the appropriate content standards for each grade level and each high school course to provide a uniform set of learning standards for every public school in North Carolina. These standards define what students know and should be able to do. The NC Standard Course of Study for K-12 English Language Arts and K-8 Mathematics were adopted in 2017 and will be implemented during the 2018-19 school year.

Additional information, such as introductory materials, or other narrative may be accessed by viewing the full version of the Standard Course of Study and Instructional Support Tools for each discipline, accessible online at: http://www.ncpublicschools.org/curriculum/.

# **READING STRAND**

K-12 Standards for Reading define what students should understand and be able to do by the end of each grade. Students should demonstrate their proficiency of these standards both orally and through writing. For students to be college and career ready, they must read from a wide range of high-quality, increasingly challenging literary and informational texts. One of the key requirements of the Standards for Reading is that all students must be able to comprehend texts of steadily increasing complexity as they progress through school. Students should also acquire the habits of reading closely and independently for sustained periods of time. They need to connect prior knowledge and experiences to text. They must also show a steadily growing ability to discern more from and make fuller use of text.

- RL.6.8 Not applicable to literature.
- RL.6.9 Compare and contrast texts in different forms or genres in terms of their approaches to similar themes and topics.

Students learn that a key purpose of writing is to communicate clearly and coherently. The NC ELA Writing Standards emphasize the importance of writing routinely in order to build knowledge and demonstrate understanding. The complete writing process (from prewriting to editing) is clear in the first three writing standards. These standards define what students should understand and be able to do by the end of each grade.

The NC ELA Language Standards emphasize the use of accurate language skills, not just the identification of accurate language skills. The Grammar and Conventions Grade Band Continuums allow for differentiation and re-teaching as needed. It is important that students begin to demonstrate proficiency in the lower grade(s) of each band, while students in the highest grade of the band should demonstrate proficiency of the listed language skills by the end of the school year.

NORTH CAROLINA STANDARD COURSE OF STUDY

World Geography, History & Culture: Patterns of Continuity and Change -Beginnings of Human Society to the Emergence of the First Global Age (1450)

Students will focus heavily on the discipline of geography to understand the emergence, expansion, and decline of civilizations and societies in the ancient world. Students will take a systematic look at the history and culture of various world regions including the development of economic, political and social systems through the lens of change and continuity. As students examine the various factors that shaped the development of civilizations, societies, and regions in the ancient world, they will examine both similarities and differences among these areas. A conscious effort should be made to integrate various civilizations, societies, and regions from every continent throughout the semester/ year. During this study, students will learn to recognize and interpret the "lessons of history;" those transferable understandings that are supported throughout time by recurring themes and issues. The standards are organized around five strands and these strands should not be taught in isolation, but woven together in an integrated study that helps students better understand the ancient world.
