

Tip Sheet: Preschool Settings

The preschool settings have been updated in ECATS to reflect Regular Early Childhood Programs (RECP), also known as RECP1, RECP2, RECP3, and RECP4.

1. Users will document the appropriate RECP code on the “Services” page of the IEP process.

The screenshot shows the IEP process interface. At the top right, it says "Carolina Test - CAROLINATEST | 02/12/2015" and "DPI Test School | TST". The interface is divided into two columns of cards. The left column contains "Meeting Purpose", "Student Profile", and "Assessment Summary". The right column contains "Annual Goals", "Services", and "Services Goal Integration". The "Services" card is highlighted with a yellow border.

2. On the Services page, scroll down to “Additional Service Information.”
3. Answer the following question by selecting the appropriate RECP code from the dropdown menu:
For students age less than 6 years, please indicate where services for the student will be rendered?

The screenshot shows the "Additional Service Information" section. It contains a question: "For students age less than 6 years, please indicate where services for the student will be rendered:". Below the question is a dropdown menu. Below the dropdown menu is a label "Transportation - Choose one:" followed by another dropdown menu. Below that is a label "Describe special transportation services:" followed by a text input field. In the bottom right corner, there is a small logo with the letters "abc" and a checkmark.
