Home Base Maintenance Weekend Begins this Evening

The next Home Base maintenance weekend is scheduled for August 21-24, 2020. PowerSchool is the only application that will undergo maintenance. All other Home Base applications will remain available.

The PowerSchool application will be brought down on tonight at 7 p.m. and returned to service no later than 6 a.m., Monday, August 24. If maintenance is completed prior to Monday morning, systems will be made accessible and users will be notified via email.

Note: Each year, a list of scheduled maintenance windows are published by NCDPI. This is published in advance to help teachers and administrators better prepare for temporary outages and loss of access. Please review the 2020-2021 maintenance schedule and put these dates on your calendar. In most cases, the entire window is not necessary and we can return systems to service earlier than listed.
If emergency maintenance is required in addition to these scheduled dates, all users will be notified in advance.

If you have any questions pertaining to this maintenance, please contact the Home Base Team at home_base@dpi.nc.gov.

**State ODS Sync Update**

The sync between the State ODS tables and the North Carolina PowerSchool instances is almost complete. All 3rd party applications including the Home Base suite of applications, the NCEdCloud IAM Service, and ECATS should now have the most current data.

**Attendance Expectations for Remote Learning**

As we kick off the 2020-2021 school year in remote settings, it is important that teachers and administrators maintain and submit accurate attendance records for state reporting and funding purposes. A new attendance code has been created for tracking students who are participating in remote instruction. In addition, the default present code description has been modified to specify on-site attendance. Please refer to the Attendance Requirements section of this document for more information on the attendance code changes and expectations.

After reviewing the various plans that have been submitted by North Carolina PSUs, the Professional Learning Team thought it might be beneficial to provide teachers with some resources that might assist attendance tracking. We are currently working to create a short video for teachers that will walk you through the various options within PowerTeacher Pro and the attendance screen. In the meantime, we have a few documents that are hot off the press that we’d like to share with you. The following QRDs will help teachers set up seating charts in PTPro to help differentiate between sections that have been split for partial remote and partial face-to-face learning, as well as gain a better understanding of the single and multi-day attendance functions.
