#### **Overview of Master's of School Administration Program**

The Department of Educational Leadership and Cultural Foundations (ELC) is responsive to the statewide need for administrators and is committed to providing programs that are both easily accessible and appropriate for 21st century students and schools. To that end, the department is actively engaged in the field, interacting with both teachers and administrators to assess needs for revision of programs and delivery options. The program underwent a major review and re-visioning, delivering their new program proposal for the MSA program to the State Department of Instruction in spring 2017. Program review and improvement are continuous. Presently, the department offers a Master of School Administration and one Post-Master's Certificate in School Administration as well as Educational Specialist and Doctoral Programs in School Leadership.

The department faculty also provide a wide variety of professional development activities, including formal partnerships and as-needed presentations that support principals. In years 2015-17, workshops and presentations focused largely on traditional concerns for administrators, such as their own leadership knowledge and skills and building leadership capacity among their faculty and staff members. However, ELC faculty also recognized the relationships among leadership and the 21st century realities of schools and students. To address these realities, the faculty provided extended and short term coaching and professional development about inclusive practice, legal issues related to students with exceptional needs, integration and use of technology, and other topics. In addition, the faculty was actively engaged in the field, providing coaching and other support. While faculty members focus on providing coursework,

professional development and support for administrators, they have also provided workshops for teachers in partner districts and in school districts in other states.

#### Special Characteristics of Master's of School Administration Program

A central feature of the MSA program is the integration of intellectual, social, and reflective inquiry to prepare school leaders who work toward a just and caring democratic society in which schools serve as centers of inquiry and forces for social transformation. Candidates' hallmark projects help achieve this macro objective. The faculty continues to develop online/distance education components for a number of courses to add to the department's menu of online options.

Requirements for the MSA program, including internships, are aligned with the standards of the Educational Leadership Constituent Council (ELCC) and the North Carolina School Executive Standards.
