NC ELA Standards — Learning Progressions

Formative Assessment and Learning Progressions

Formative assessment is a recursive process that occurs during instruction and uses evidence of student learning to adjust instruction to improve achievement (NC Department of Public Instruction, n.d.). The best formative assessments focus on timely information teachers can use to better support students in their learning and evidence students can use to actively manage and adjust their own learning. Through formative assessment, teachers can determine the pace at which students are learning; measure students' current knowledge of the topic, concept, or skill; uncover what students still need to learn; determine if learning opportunities are effective; and identify when instruction must be adapted.

Formative Assessment:

- Highlights the needs of each student
- Supports goal setting within the classroom curriculum
- Allows for monitoring of student progress on an ongoing basis
- · Allows students to assume greater responsibility for monitoring and supporting their own learning
- Informs and targets next steps in instruction
- Allows teachers to provide descriptive feedback to students as to where they are in the learning process

Using This Resource

This resource is organized by grade-level to bring further clarity to the skills and expectations measured by the North Carolina English Language Arts Standard Course of Study (NCSCOS). Different from the Vertical Progression that shows how the standards build towards Career and College Readiness, each learning progression focuses on a singular standard and shows how the skills within the standard build towards mastery and extension.

When determining a student's skill set within each learning progression, it is important that teachers ensure the formative assessment aligns with the standards that were taught. With that in mind, if a student's skill set falls within beginning and/or progressing towards mastery of that particular standard, certain misunderstandings may be evident and/or the student may only have a simple understanding of one of more parts of that standard. If a student's skill set falls within applying, the student has shown evidence of mastery of some, if not all skills within that standard. When a student has shown consistent mastery of his/her grade-level expectations for a particular standard, then his or her skill set has moved into the extending phase, which prompts the teacher to provide more challenging learning opportunities.

Once teachers determine students' progress towards standards mastery, teachers can use this data to identify necessary strategies, scaffolds, supports, and/or extensions to meet students' needs.

*Note: Students' skill set may fall across several parts of the learning progressions. ELA educators should use their professional judgement when determining needed supports and/or extensions for students.

Other Considerations

To reach true grade-level standards' expectations, students must be provided with grade-level, complex texts, topics, and tasks. When students are only provided with or exposed to independent, reading-level texts, they are not able to fully engage with the rigor expected of the skills found within their grade-level standards.

Grade-level proficiency in and instructional alignment to the NC ELA Standards requires students to apply the skills within the standards to grade-level, complex texts.

*Note: While grade-level, complex texts should be used for core instruction, independent reading-level texts may be used for purposes of reading for enjoyment, wide reading, and/or scaffolding. Educators should use their professional judgement when determining the appropriate text for the appropriate purpose.

Disclaimer

Each learning progression shows the skills students should know and be able to do by the end of each grade and/or course. The learning progressions emphasize that standards' mastery is a growth process; the learning progressions should not be used to group, categorize, or track students. This resource is meant to help educators explore formative student data to avoid inequitable outcomes that limit the expectations held for students.

The substandards in L.3 and L.5 (K-12) are not separated from the main standard as seen in W.1 - W.3 and SL.1. The substandards are included in the progressions for L.3 and L.5 (K-12) as a whole to provide clarity on the skills and expectations of each of these grade-level standards.
