2000/01 Public Schools Facility Needs Survey

EXECUTIVE SUMMARY

July 2001

The first paragraph of G.S.115C-521 requires: Local boards of education shall submit their long-range plans for meeting school facility needs to the State Board of Education by January 1, 1988, and every five years thereafter. The 1995 General Assembly of North Carolina authorized the School Capital Construction Study Commission and charged the Commission to conduct a comprehensive study of public school facility needs in North Carolina. Needs documented in that study helped to justify the \$1.8 billion state bond issue that was passed in 1996. It also changed the five-year cycle of the study.

The Department of Public Instruction's School Support Division, through its School Planning Section, facilitated the statewide study and tabulated the results for the current survey. Consultative services and technical support were provided in assisting the 117 school systems to identify current and projected facility needs. The Statistical Research Section of the School Business Division provided current ADM and enrollment projections.

A new computer program for evaluating and reporting needs was provided to each unit on a compact disk. The program contains a list of schools, 99/00 ADM for each school, and DPI's membership projections. Typical unit costs and building area standards from the N. C. Public Schools Facilities Guidelines are built into the program. In addition, the program does most of the math as data is entered. The program saves all information to a diskette or to E-mail for reporting. Two summary reports, to verify the electronic data, and a certification are the only paper forms used.

Local boards of education are to be commended for their conscientious efforts with a demanding process, and boards of county commissioners for their collaboration and support of the results. All one hundred seventeen-school systems have submitted needs assessments. One hundred thirteen have been approved by the local school boards. Ninety-one have been approved by county boards of commissioners. This report did not require approval by boards of county commissioners, but encouraged their review and participation in the process.

Results of the study identified total facility needs over a five-year period of \$6.2 billion. This total includes estimated needs for the four systems for which approved assessments were not received before the deadline for this report and are based upon initial data supplied by the respective boards of education. Approximately 33 percent of the total comprises new schools, 30 percent additions to existing facilities, 28 percent renovation of existing facilities, eight percent furnishings and equipment, and one percent land acquisition. Information was reported prior to current State Budget initiatives to reduce class sizes; the cost of additional classrooms to accommodate reduced class sizes is not included.

This report reflects in detail the results of the study. The exceptional collaboration that resulted in the success of this comprehensive school facility needs study clearly underscores broad-based concern for the welfare of students in North Carolina.

INTRODUCTION

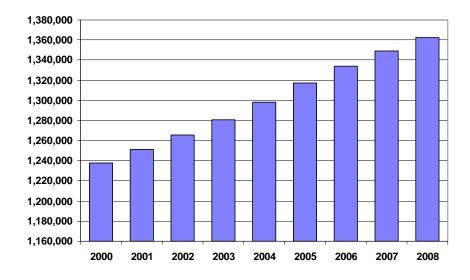

Every five years local boards of education are required by G.S.115C-521(a) to submit their Facility Needs Assessment (long-range plans) to the State Board of Education. House Bill 898 (1995 Session) created the School Capital Construction Study Commission, which was charged to conduct a statewide survey of school facility needs. Data gathered in the 1995/96 Facility Needs Survey helped to justify the Public School Building Bond Act of 1996.

School Planning, Division of School Support developed a uniform reporting system, assisted the local school units in preparing lists of needs, and tabulated the results of the survey. Student membership and projected enrollment information was provided by the Statistical Research Section of the School Business Division. Data for 2,412 schools, existing or proposed, is included in the reports.

The following indicates the magnitude of school facility needs reported:

- Total (current \$'s) five-year needs: \$6,204,103,734
- Mobile Units & Temporary Classrooms currently in use:
 5,627 (an increase of 792 or 16.4% since 1996)
 10% of all students are in mobile classrooms
- Number of K-12 students (6/00):
 1,237,794 (an increase of 84,680 or 7.2% in five years)
- Projected increase in K-12 students in the next five years:
 79,099 (6.4%)

Projected Growth

Changing enrollment growth:

The rate of growth in enrollment increased faster in high schools and middle schools than in elementary schools over the past five years. Projections indicate this trend will accelerate with high schools growing by 11.2% (36,422), middle schools growing by 8% (23,372), and elementary schools growth slowing to 3.1% (19,303) in five years; compared to 8%, 6.3%, and 7.4% respectively for the previous five years.

• Pre-K facilities:

Many units included new classrooms for Pre-K students in response to judgements in the "Leandro" lawsuit. Additions include 491 Pre-K classrooms and new schools include about 140 new Pre-K classrooms.

Class size reductions:

Information was reported prior to current State Budget initiatives to reduce class sizes for all Kindergartens and for classes in certain schools that have been performing below grade level. Few (18) units reported any needs due to class size reduction policies.

- Progress since the 1996 Facility Needs Survey which indicated \$6.21 billion (\$6.98 billion in 2000 \$'s) needs:
 - \$1.8 billion State Bond Referendum approved 11/96.
 - \$2.24 billion total local bond referenda approved since 11/96.

Costs have been standardized statewide to current (2000 \$'s) average cost of new construction. There is no allowance for inflation and no attempt has been made to account for regional cost differences. Needs addressed by projects currently under design or construction are not included. This method provides a good overall assessment of needs and relative comparisons. Actual needs for individual school systems may differ from reported amounts.

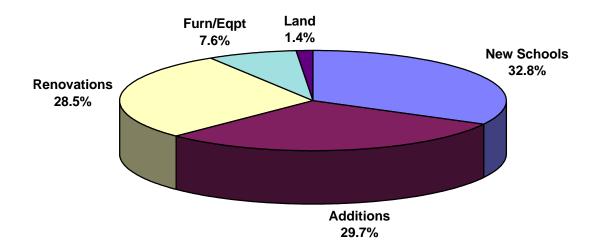

All one hundred seventeen-school systems have submitted needs assessments. One hundred thirteen have been approved by the local school boards. Ninety-one have been approved by boards of county commissioners. It is anticipated that many of the remainder will be approved after the deadline for this report.

Needs for 196 new schools were reported (needs for 218 new schools were indicated five years ago). About 82% of the needs for land and 44% of the needs for furnishings and equipment are for new schools. Reasons for needing new schools included projected enrollment growth and to ease current crowding. Twenty-two new schools are shown as replacements for older schools on the same site. Average student capacities for new schools: Elementary - 620, Middle Schools - 720, High Schools - 1060. New schools include needs for about 140 Pre-K classrooms to serve 2,500 children.

^{*} schools may have needs in several addition categories

Needs for additions were reported at 906 schools (most also had needs for renovations). The greatest need is for new classrooms, which often requires additions to core areas such as cafeteria or media center. Justifications indicated for needed additions were projected enrollment growth, ease current crowding, or replace mobile units.

Needs for renovations during the next five years were reported for 1,173 schools. Air conditioning needs at 427 schools (\$221,513,503) and roof replacement at 536 schools (\$182,606,595) are the greatest renovation needs reported. Handicapped access, hazardous materials, building code, and indoor air quality are less than reported five years ago indicating progress in these areas.
