State Advisory Council on Indian Education | Report to the North Carolina State Board of Education
In Pursuit of Educational Excellence for All American Indian Students in North Carolina

THE STATE ADVISORY COUNCIL ON INDIAN EDUCATION: BACKGROUND AND MEMBERSHIP

The State Advisory Council on Indian Education advocates collectively on behalf of American Indian students; examines the applicability of state and national trends in Indian education; collaborates with education practitioners, including the Title VI-IEA administrators; and re-examines its mission and goals as school reform initiatives steer the direction of the public school system in North Carolina. Council membership is comprised of parents of American Indian students in K-12 public schools, K-12 American Indian educators, representatives from both houses of the North Carolina General Assembly, the University of North Carolina Board of Governors, and the North Carolina Commission of Indian Affairs.

STATE BOARD OF EDUCATION

STATE BOARD OF EDUCATION VISION: Every public school student in North Carolina will be empowered to accept academic challenges, prepared to pursue their chosen path after graduating high school, and encouraged to become lifelong learners with the capacity to engage in a globally-collaborative society.

STATE BOARD OF EDUCATION MISSION: The mission of the North Carolina State Board of Education is to use its constitutional authority to guard and maintain the right of a sound, basic education for every child in North Carolina Public Schools.

LETTER FROM THE SACIE CHAIRWOMAN

To our Stakeholders,

Serving as the State Advisory Council on Indian Education (SACIE) Chairwoman is a great honor. On behalf of the SACIE committee, I am pleased to provide you with the 2022 report, Equitable & Intentional Practices: The Healing Power of American Indian Education. This report highlights educational data of American Indian students and their peers within the state. The following information highlights the continued need for educational equity and intentionality for American Indian students. The compiled data provided SACIE members an opportunity to refine NCDPI recommendations.

Every year, the SACIE report hits the press to be disseminated across the great state of North Carolina. On a personal note, a gut-wrenching emotion follows each time the report physically lands in my hands, including the data cavity between American Indian students and White students. As a result of the Pandemic and in the best interest of American Indian students, moving forward with equitable and intentional practices is of utmost importance. As the North Carolina Department of Public Instruction and the State Board of Education continues to work toward the equity resolution goal “to eliminate opportunity gaps by 2025”, SACIE continues to align our work in an effort of intentionality beginning with us. SACIE continues to share the Culturally Responsive Teaching about American Indians self-paced modules to ensure resource accessibility. This year, SACIE also focuses on moving beyond compliance toward intentional impact.

Historically, the Department of Public Instruction housed a position focused on American Indian Education. In 2021, the North Carolina Title VI – Indian Education Formula Grant total was \$3,630,110, serving 17,877 American Indian students. To bring healing and power to American Indian education, SACIE stresses the significance of reestablishing this position and the representation.

SACIE expresses appreciation to the tribal communities that we serve, the NC Commission of Indian Affairs, the North Carolina State Board of Education, NCDPI, Title VI programs, elected officials, parents, students, educators, and other stakeholders. The support of each division has the potential to bring forth an intentional impact that will improve educational opportunities and healing for American Indian students. Moreover, we give distinct nobility to previous SACIE members that stood in service, building a foundation that others may follow.

SACIE committee members remain faithful to our mission and the tribal communities that we serve. Thank you for your ongoing interest and support of the SACIE report.

Respectfully,

Tiffany M. Locklear, EdD

PART I: Executive Summary and Recommendations

This is the annual report of the State Advisory Council on Indian Education to the State Board of Education. As legislatively mandated, via this report, the Council is presenting a summary of American Indian student performance outcomes in specified areas and recommendations to improve academic achievement.

Legislative Requirement

In 1988, the State Board of Education (SBE) adopted an Indian Education policy to identify Indian Education issues in grades K-12. In that same year, the North Carolina General Assembly enacted Article 13A (NCGS § 115C-210 et seq.) that established the State Advisory Council on Indian Education (SACIE) to advocate on behalf of American Indian students in North Carolina. In 2015, the North Carolina General Assembly enacted SECTION 1. of NCGS § 115C-210.1 to modify the membership composition of the State Advisory Council on Indian Education. The 15-member SACIE board consists of five parents of American Indian students enrolled in K-12 public schools, including charter schools, and five American Indian K-12 public school educators. One of these members shall be a Title VI director or coordinator, to be appointed by the State Board of Education, members of the North Carolina Senate and House of Representatives, members from the UNC Board of Governors, and the North Carolina Commission of Indian Affairs (NCCIA).

The law (NCGS § 115C-201.4) requires the Council to submit to the SBE an annual report of performance outcomes and related recommendations about the achievement of American Indian students in grades K-12. Each finding in this report compares American Indian student performance with three peer groups: 1) White, 2) Black, and 3) Hispanic, except in the state-level findings where the highest performing racial/ethnic group and American Indians are compared. It is important to note that a rating of “proficiency” means that students are performing “at or above” grade-level. Conversely, “non-proficient” means that student performance falls below grade-level. Teachers, principals, and parents are advised to consider all performance percentages.

Public School Enrollment Data

As of the 2020-21 academic year, the total enrollment of American Indian/Alaskan Native (AI/AN) students in North Carolina’s public schools was 15,953 (NC Department of Public Instruction, 2020). Of this number, 13,154 students were enrolled in 18 school districts that receive funding through the Title VI Indian Education Act (IEA) of 1972 (see Appendices A, B, C, and D). One district, Hertford County, is not a Title VI grantee but does enroll Indian students of the Meherrin Tribe. This report provides performance data of all students self-identified as American Indian/Alaskan Native to include those served by Title VI programs. Enrollment data is based on the final Average Daily Membership (ADM) reported by the LEA for the 2020-21 school year.

FIGURE 1: Percentage of North Carolina American Indian Students Enrolled in the IEA Cohort vs. the Non-IEA Cohort

State-level Findings

Due to COVID-19, there is no 2019-20 EOG or EOC data to report. For the 2020–21 school year, the United States Department of Education and the North Carolina General Assembly granted North Carolina waivers from school accountability (School Performance Grades). The data reported for the 2020–21 school year is presented for educators and parents to identify where additional support is needed as students begin the 2021–22 school year. Comparing the 2020–21 data with any previous year’s data prior to COVID is cautioned.

The SACIE has decided to include 2020 -21 data with subgroup data broken out by grade level for grades 3-8 and broken out by gender for EOC assessments. 2020-21 data are included for ACT, SAT, AP course enrollment and performance,

discipline data, and current graduation data.

The table below compares the 2020-21 academic performance of American Indian students to that of White students in five academic areas. Also included are data on the four-year cohort graduation and dropout rates for the 2020-21 school year.

Data Comparisons	American Indian Students	White Students	Difference (Percentage Points)
EOG Reading	28%	58.7%	30.7
EOG Math	20.5%	54.3%	33.8
EOC Math I	15.9%	25.1%	9.2
EOC English II	43.8%	70.1%	26.3
EOC Biology	31.6%	58.6%	27.0
Four Year Cohort Graduation Rate	83.4%	90.3%	6.9
Dropout Rate	2.1%	1.1%	2.0

Recommendation

As part of the SBE vision for opportunity equity, support all efforts to secure and establish a department-level position dedicated to American Indian Education Services and the enactment of previous SACIE recommendations.

This work requires and includes consultation with and coordination across all entities whose missions seek to improve educational opportunities for American Indian students. This recommendation is consistent with requirements secured by the Every Student Succeeds Act, which requires collaboration and consultation with districts, tribes, higher education, critical state organizations, and the Department of Public Instruction. To support measurable progress towards previous SACIE recommendations, roles and responsibilities for this dedicated position will include consultation and collaboration within the NC Department of Public Instruction and across various other organizations including, but not limited to, the North Carolina Commission of Indian Affairs within the NC Department of Administration, the State Advisory Council on Indian Education, Institutions of Higher Education, tribes, and local education agencies. Additionally, we bring attention to the approved 2021 SACIE report recommendations and the significance of measurable progress. The recommendations are aligned to the State Board of Education equity resolution goals.

PART II: Discussion of State and LEA Findings

Interpreting the Findings

The 2022 State Advisory Council on Indian Education (SACIE) Report consists of state-level achievement profiles. For the 2020–21 school year, the U.S. Department of Education (USED) approved North Carolina’s request for a waiver from accountability, school identifications, and some reporting requirements; however, the USED did not waive the test administrations in reading and mathematics (grades 3–8 and at least once in high school) and science (grades 5, 8 and at least once in high school). Also not waived, was the administration of the English Language Proficiency assessment. As a condition of the waiver, the USED requires reporting of student performance on these assessments to provide information to parents, educators, and the public about student performance and to help target resources and supports. Data for End of Grade (EOG) and End of Course (EOC) assessments were not collected during the 2019-20 school year due to the instructional circumstances of the COVID-19 Pandemic. Current state-level data concerning EOG and EOC still show the three-year trend; however, data has been redesigned to show trends across grade levels instead of grade-range groupings. The State Advisory Council on Indian Education Report is intended to inform educators, policymakers, parents, and tribal communities about the annual progress of American Indian students in critical areas of school success across North Carolina. In this report, the academic achievement of American Indian students is profiled for the state in the following assessment categories. In addition, data for SAT, ACT, and AP is presented at both the state and district levels.

- 1) End-of-Grade (EOG) Reading (grades 3-8 combined and broken out by grade level)
- 2) End-of-Grade (EOG) Math (grades 3-8 combined and broken out by grade level)
- 3) End-of-Grade (EOG) Science
- 4) End-of-Course (EOC) Math I
- 5) End-of-Course (EOC) Biology
- 6) End-of-Course (EOC) English II
- 7) Cohort Graduation Rate (CGR)
- 8) Dropout Rate, grades 9-13
- 9) Scholastic Aptitude Test (SAT)
- 10) American College Test (ACT)
- 11) Advanced Placement (AP)
- 12) Short Term Suspension

Three years of data have been provided for each assessment; however, for the 2019-20 school year “N/A” is noted due to COVID-19. For more information see the 2019-20 Accountability Data Sets and Reports at <https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/school-accountability-and-reporting/accountability-data-sets-and-reports#2019-20>

The cohort graduation rate, SAT data, and AP data in the state and district profiles are provided for three years. This report highlights a three-year data trend to align with the critical transition period for the physical, emotional, and cognitive development of students in the upper elementary grades (grades 3-5) through middle school (grades 6-8). This point is particularly relevant, given research that supports a stage-theory approach for students, especially minority and disadvantaged students.

End-of-Grade (EOG) and End-of-Course (EOC) Data

Students who have a solid or superior command of course content are on target for a career-and-college ready path, have met the proficiency standard, and are performing “at or above grade-level.” To meet the proficiency standard or to perform at or above grade-level, students must attain Achievement Level 3, Achievement Level 4, or Achievement Level 5 on the EOG and EOC assessments. Students who score at Achievement Level 3 are prepared for the next grade but do not meet the career-and-college readiness standard. Students who score at Achievement Level 1 or Achievement Level 2, or Achievement Level Not Proficient (for math), have not met the

proficiency standard and are not on a trajectory to be career-and-college ready.

The single year of data in the tables and figures for EOG reading, Biology, and English II indicate the percentage of students who performed at or above Achievement Level 3. The achievement level descriptors are:

- Achievement Level 1: Students performing at this level have **limited command** of the knowledge and skills contained in the SBE-adopted ELA content standards and the *NC Essential Standards for Science* assessed at their grade-level and will need academic support to engage successfully in this content area.
- Achievement Level 2: Students performing at this level have **partial command** of the knowledge and skills contained in the SBE-adopted ELA content standards and the *NC Essential Standards for Science* assessed at their grade-level and will likely need academic support to engage successfully in this content area.
- Achievement Level 3: Students performing at this level have a **sufficient command** of grade-level knowledge and skills contained in the SBE-adopted ELA content standards and the *NC Essential Standards for Science* assessed at their grade-level, but they may need academic support to engage successfully in the content area in the next grade-level.
- Achievement Level 4: Students performing at this level have **solid command** of the knowledge and skills contained in the SBE-adopted ELA content standards and the *NC Essential Standards for Science* assessed at their grade-level and are academically prepared to engage successfully in the content area.
- Achievement Level 5: Students performing at this level have **superior command** of the knowledge and skills contained in the SBE-adopted ELA content standards and the *NC Essential Standards for Science* assessed at their grade-level and are academically well-prepared to engage successfully in the content area.

The achievement levels for EOG mathematics, Math I, and Math III were changed during the 2018-19 school year. The achievement level descriptors are:

- Achievement Level Not Proficient: Students who are Not Proficient demonstrate inconsistent understanding of grade-level content standards and will need support.
- Achievement Level 3: Students at Level 3 demonstrate **sufficient understanding** of grade-level content standards, though some support may be needed to engage with content at the next grade/course.
- Achievement Level 4: Students at Level 4 demonstrate a **thorough understanding** of grade-level content standards and are on track for career and college.
- Achievement Level 5: Students at Level 5 demonstrate **comprehensive understanding** of grade-level content standards, are on track for career and college, and are prepared for advanced content at the next grade/course.

For example, if 57 percent of American Indian students performed at Achievement Level 3 or above in a given subject, this percentage of students was “proficient” in that subject. Conversely, the 43 percent of students who performed below grade-level were not proficient in the same subject.

More detailed information regarding the achievement levels for the EOG and EOC assessments may be found at <https://www.dpi.nc.gov/data-reports>.

Cohort Graduation Rate

In July 2005, all 50 states signed the National Governors Association’s Graduation Counts Compact on State High School Graduation Data. In the compact, governors agreed to take steps to implement a standard, four-year adjusted cohort graduation rate. North Carolina’s four-year cohort graduation rate reflects the percentage of ninth graders who graduated from high school four years later. The five-year cohort graduation rate, not referenced in this report, reflects the percentage of ninth graders who graduated from high school five years later. The three years of data in the figures and tables for the cohort graduation rate reflect the cohort percentage of students, by race and gender, who graduated with a regular diploma in four years or less.

Dropout Rate

North Carolina General Statute 115C-12(27) requires the compilation of an annual report of students in the state dropping out of schools. Dropouts are reported for each district and charter school in the state, and “event dropout rates” are computed. The three years of dropout data in the state and district profiles show the percentage of students in grades 9-12, by race, and by race and gender.

SAT

The three-year trend of SAT data shows the participation rates and the mean total SAT scores of graduating seniors from 2018-19 to 2020-21. SAT performance is compared at the state, district, and racial/ethnic group levels.

Advanced Placement (AP)

The three-year trend of AP data and district profiles shows the participation rates and the percentages of AP test takers in grades 9-12 who scored a Level 3 or higher. Additional details regarding these assessments, and special abbreviations and notations, may be found in the Data Notes section of Appendix I.

ACT

The ACT college admissions assessment is given to all students in the 11th grade and the ACT WorkKeys assessment is administered to seniors who are Career and Technical Education (CTE) concentrators. Beginning in 2012-13, the ACT and the ACT WorkKeys became part of North Carolina’s school accountability program. In order to support student success on the ACT, North Carolina administers the ACT Plan assessment at 10th grade. ACT Plan is a diagnostic assessment that predicts future performance on the ACT. It also provides information to help parents, teachers, and students determine future goals. ACT scores can range from a score of 1 to a max score of 36. The overall ACT test score is the average of scores (also 1-36) in the English, Math, Reading, and Science sections of the test.

Racial/Ethnic Groups

As a way to compare the rates of academic achievement, this report presents achievement data for the following racial/ethnic groups:

- 1) American Indian;
- 2) White;
- 3) Black; and
- 4) Hispanic.

Cultural Information

There are eight American Indian tribes located in North Carolina that hold membership on the NC Commission of Indian Affairs. Under the Dawes Act of 1887, the Eastern Band of Cherokee Indians was incorporated with the state of North Carolina as a sovereign entity. Therefore, the Cherokee Tribe is both state and federally recognized. The Lumbee Tribe of North Carolina is also state and federally recognized. The Lumbee were recognized by the federal government under the “Lumbee Act of 1956” in name only. As per NCGS 143B-704, eight Indian tribes and four Urban Indian Associations hold membership on the NC Commission of Indian Affairs. Chapter 71A of the North Carolina General Statutes provides summary of the Indian tribes recognized by the state of North Carolina (see Appendix F). As part of each profile, attention is given to the major American Indian tribes represented in the statewide student population. In some cases, however, no specific tribes are mentioned, mainly because the variety is too extensive to capture in this report (NC Department of Administration, Commission of Indian Affairs, 2020).

Using the Findings

Because the enrollment of American Indians in most school districts is comparatively small, conclusions drawn from the data should be reached carefully and weighed against other evidence, including local assessments such as nine-week grades, daily classroom progress, and other teacher-administered assessments. Nevertheless, because it is safe to conclude that American Indian students, for the most part, are performing below grade-level in reading and math, extra effort must be made to increase achievement in these areas. In some districts, the level of low achievement rightly justifies the need for ongoing and intensive intervention. The State Advisory Council on Indian Education strongly encourages educators to continue collecting and reviewing achievement data and monitoring the impact of instructional strategies and approaches on American Indian students in classroom settings. Due to COVID-19 there is no 2019-20 EOG or EOC data to report; however, 2019-20 data is included for ACT, SAT, AP course enrollment and performance, discipline data, and graduation data. The SACIE has decided to include subgroup data broken out by grade levels for grades 3-8 and broken out by gender for EOC assessments.

STATE FINDINGS

END-OF-GRADE READING AND MATH (GRADES 3-8 COMBINED)

READING

MATH

Year	State	American Indian	White	Black	Hispanic
End-of-Grade Reading (Grades 3-8 Combined)					
Percent at/above Level 3					
2018-19	57.2	42.3	70.4	40.1	44.3
2019-20	N/A	N/A	N/A	N/A	N/A
2020-21	45.6	28	58.7	28.5	32.9
End-of-Grade Math (Grades 3-8 Combined)					
Percent at/above Level 3					
2018-19	58.6	44.2	70.9	39.3	50.6
2019-20	N/A	N/A	N/A	N/A	N/A
2020-21	40.0	20.5	54.3	19.1	29.2

Due to COVID-19, there is no 2019-20 EOG or EOC data to report.

EOG: Reading and Math

The number of American Indian students demonstrating proficiency on EOG reading assessments (for grades three through eight) significantly decreased, as did all subgroups, from the 2018-19 to the 2020-21 school year. The performance of American Indian students decreased 14.3 percentage points since the 2018-19 school year. The EOG reading data show that American Indian students performed 17.6 percentage points below the state average proficiency rate in 2018-19. To explain, 28% of American Indian students demonstrated grade-level proficiency in reading compared to the state average for all students of 45.6%.

American Indian students (28%) performed .5 percentage points lower in reading than their Black peers (28.5%) and 4.9 percentage points below their Hispanic peers (32.9%).

Compared to White students (58.7%), American Indians (28%) performed 30.7 percentage points lower.

Average EOG math proficiency scores decreased across grades for American Indian students, as well as other subgroups. The EOG math data show that American Indian students performed significantly lower, 19.5 percentage points, than the state average proficiency rate in 2018-19. To explain, 20.5% of American Indian students demonstrated grade-level proficiency in math compared to the state average of 40% of students who demonstrated grade-level proficiency. American Indian students (20.5%) scored 33.8 percentage points lower than their White peers (54.3%) and 8.7 percentage points lower than their Hispanic peers (29.2%).

American Indian students scored 1.4 percentage points higher than their Black peers (19.1%).

STATE FINDINGS (by grade subject and grade-level)

END-OF-GRADE READING - GRADES 3-5

READING Grade 3

READING Grade 4

READING Grade 5

Year	State	American Indian	White	Black	Hispanic
End-of-Grade Reading Grade 3					
2018-19	56.8	44.5	70.1	40.8	42.6
2019-20	N/A	N/A	N/A	N/A	N/A
2020-21	45.1	31.1	59.4	27.8	30.1
End-of-Grade Reading Grade 4					
2018-19	56.8	44.5	70.1	40.8	42.6
2019-20	N/A	N/A	N/A	N/A	N/A
2020-21	45.1	31.1	59.4	27.8	30.1
End-of-Grade Reading Grade 5					
2018-19	54.6	38.9	68.9	36.3	41.0
2019-20	N/A	N/A	N/A	N/A	N/A
2020-21	42.4	25.3	56.4	24.6	28.6

State
 American Indian
 White
 Black
 Hispanic

Due to COVID-19, there is no 2019-20 EOG or EOC data to report.

EOG: Reading

The overall proficiency rate for EOG Reading in 2020-21 decreased significantly compared to 2018-19 assessment data. The 2020-21 third grade proficiency rate (45.1%) for the state shows an 11.7 percentage point decrease, while fourth grade (45.1%) and fifth grade (42.4%) both showed a decrease of 12.2 percentage points. In 2020-21, proficiency rates for third grade American Indian students (31.1%) was below their White peers (59.4%) but above their Hispanic (30.1%) and Black (27.8%) peers. In fourth grade, the proficiency rate (25.3%) of American Indian students dropped below all subgroup rates. In fifth grade, American Indian students (25.3%) performed above their Black (24.6%) peers but remained below their White (56.4%) and Hispanic (28.6%) peers.

END-OF-GRADE READING - GRADES 6-8

READING Grade 6

Year	State	American Indian	White	Black	Hispanic
End-of-Grade Reading Grade 6					
2018-19	60.0	44.2	73.2	42.8	47.8
2019-20	N/A	N/A	N/A	N/A	N/A
2020-21	45.3	30.1	58.0	28.9	33.1
End-of-Grade Reading Grade 7					
2018-19	58.8	42.0	71.6	41.4	46.8
2019-20	N/A	N/A	N/A	N/A	N/A
2020-21	46.7	28.2	59.3	29.7	35.0

READING Grade 7

EOG: Reading

In 2020-21, overall EOG Reading proficiency rates decreased in sixth (45.3%), seventh (46.7%) and eighth (48.2%) grades and across all subgroups. Sixth grade proficiency rates decreased by 14.7 percentage points, seventh grade decreased by 12.1 and eighth grade showed a 7.4 percentage points decrease. When compared with their peers, American Indian students (30.1%) performed higher than Black students (28.9%) in grade six. However, in sixth grade, American Indian students performed lower than White (58%) and Hispanic (33.1%) students. In addition, American Indian students (28.2%) proficiency rate for seventh grade was below that of their White (59.3%), Black (29.7%), and Hispanic (35%) peers and the same was found for the proficiency rates of American Indian students (30.5%) in eighth grade.

Due to COVID-19, there is no 2019-20 EOG or EOC data to report.

EOG: Math

The 2020-21 EOG Math data for grades three through five show a decrease in overall proficiency rates. Third grade shows an overall proficiency rate of 44.5 percent, which is a 19.8 percentage point decrease from 2018-19. In fourth grade, (37.8%) overall proficiency rate decreased by 19.5 percentage points and fifth grade (42%) by 18.2 percentage points. There was a decrease in Math EOG proficiency rates across all racial groups. In third grade, Math EOG proficiency rates were 28.1% for American Indian students, 60.3% for White students, 22.1% for Black students, and 31.9% for Hispanic students. Among American Indian students the greatest decrease in proficiency occurred at the third grade level, with a 28.3 percentage point drop. Also, for all racial/ethnic groups in fourth grade there was a decrease in proficiency rates with American Indian students (17.3%) showing the greatest decrease at 24.3 percentage points. EOG Math proficiency rates for 5th grade American Indian students was 21.3 percent. When compared to their peers, American Indian students performed higher than Black students on the EOG Math in all grade levels. However, American Indian students performed lower across all grade levels than their White and Hispanic peers on the EOG Math.

State American Indian White Black Hispanic

Due to COVID-19, there is no 2019-20 EOG or EOC data to report.

EOC: Math I, Biology, and English II

In 2020-21, overall proficiency rates for American Indian students decreased in Math I (15.9%), Biology (31.6%), and English II (43.8%).

In 2020-21, proficiency rates for American Indian students decreased by 19.8 percentage points. American Indian students (15.9%) performed 9.2 percentage points lower in Math I than the state average (25.1%). In addition, American Indian students performed 19.8 percentage points lower than their White peers (35.7%), 4.3 percentage points below their Hispanic peers (20.2%), and slightly higher than their Black peers (12.6%).

A similar trend applies to proficiency rates for Biology, with American Indian students (31.6%) performing above their Black peers (25.1%) but slightly below their Hispanic peers (32.6%) in EOC Biology.

The state average in EOC Biology is 45.6%, 14 percentage points above American Indian students (31.6%). American Indian students demonstrated lower proficiency rates than White students (58.6%).

Likewise, the percentage of students demonstrating proficiency in English II reflects the same trend as Math I and Biology, with American Indian students lagging behind the state average. American Indian students (43.8%) performed 14.7 percentage points below the state average (58.5%). American Indian students achieved lower proficiency rates than White (70.1%) and Hispanic (47.5%) students and performed higher than their Black peers (40.7%).

EOC: Math I

The overall proficiency rate for EOC Math I decreased by 16.1 percentage points from 2018-19 to 2020-21. The state proficiency rate for female students (26.5%) shows a 18.6 percentage point decrease, while the proficiency rate for male students (23.8%) declined by 13.8 percentage points. Both male and female students in all racial/ethnic groups show a decline in proficiency rates from 2018-19 to 2020-21 and female students performed higher than male students in all racial/ethnic groups. American Indian female students (18.8%) outperformed American Indian male students by 5.6 percentage points. In addition, American Indian female students performed higher than both their male (10.8%) and female (14.7%) Black peers. However, American Indian females performed 18.1 percentage points below their White female peers and 2.1 percentage points below their Hispanic female peers. Male American Indian students show a 2.4 percentage point increase when compared to their Black male peers. However, American Indian males (13.2%) performed below both their White (34.6%) and Hispanic (19.6%) male peers.

EOC: Biology

The 2020-21 overall proficiency rates for female (46.5%) and male (44.6%) students show a decrease from the 2018-19 school year. Both female and male students decreased their proficiency rates in all racial/ethnic groups. Female students performed higher than male students in the White and Black subgroups but underperformed their male peers in the American Indian and Hispanic subgroups. American Indian females (31.1%) performed higher than their Black male (22.5%) and female (27.7%) peers. However, American Indian female students performed below their White female (59.6%) and male (57.7%) peers and below their Hispanic female (32.5%) and male (32.8%) peers. American Indian males' proficiency rate (32%) decreased 13 percentage points from 2018-19. In 2020-21, American Indian male students performed above their Black male (22.5%) peers, although their proficiency rate was 25.7 percentage points below their White male peers and 0.8 percentage points below their Hispanic male peers.

EOC: English II

The overall proficiency rates for male (53.6%) students increased slightly; however, female (63.5%) students decreased by 2.7 percentage points in 2020-21. Female students’ proficiency rates in EOC English II decreased in all racial/ethnic groups. American Indian female students show a decrease in their proficiency rate of 5 percentage points from 2018-19 to 2020-21. White female students decreased by 2.9 percentage points, Hispanic female students by 2.7, and Black female students had a 1.6 percentage point decrease. American Indian female (46.9%) students performed above their male (40.6%) American Indian peers by 6.3 percentage points. In addition, American Indian female students outperformed their male (33.6%) Black peers and their male (42.9%) Hispanic peers. However, American Indian female students performed lower than their female peers in all subgroups. American Indian male students’ proficiency rate (40.6%) increased 1.2 percentage points between 2018-19 and 2020-21. American Indian males performed 7 percentage points higher than their Black male peers (33.2%). However, they performed lower than both their female and male White and Hispanic peers and below their Black female peers (47.8%).

ANNUAL DROPOUT RATES (GRADES 9-13)

Four-Year Cohort Graduation Rate (CGR)

The four-year cohort graduation rate of American Indian students (83.4%) trailed all students in the state (87.0%) by 3.6 percentage points. In 2020-21, the four-year cohort graduation rate for American Indian students decreased 1.7 percentage points from the previous year. In addition, the four-year graduation rate of American Indian students (83.4%) lags behind White students (90.3%) by 6.9 percentage points and Black students (83.8%) by less than a percentage point.

Annual Dropout Rate

The dropout rate for all subgroups declined significantly during the 2019-20 school year. While the American Indian population dropout rate has been a longstanding issue of public concern, the number of American Indian students who dropped out of high school decreased by 1.01 percentage points. A moderate decrease is noted in the dropout rates for all other subgroups. The dropout rate for American Indian students in 2019-20 was 2.12 percent, which is higher than that of their Black (1.82%) and White (1.05%) peers; however, their dropout rate is slightly lower than their Hispanic (2.66%) peers. Also, the dropout rate among American Indian students continues to be higher than the state’s average rate at 1.53 percent. When comparing the dropout rates for male and female students, the data show that male students in all racial/ethnic groups tend to drop out at a higher rate than female students. The 2019-20 dropout rate for American Indian male students decreased by less than a percentage point, while female students’ dropout rate decreased by 1.2 percentage points.

Advanced Placement (AP)

From 2019-20 to 2020-21, the percentage of students taking AP exams increased slightly for all students in the state by .57 percentage points. However, the number of American Indian students taking AP exams increased by 1.92 percentage points. The number of Black students taking AP exams increased by .04 percentage points, Hispanic students' participation decreased slightly by .07 percentage points, and White students' participation remained relatively the same, only increasing by .01 percentage points. American Indian students had the second highest AP exam participation rates at 10.82 percent, with White students having the highest at 18.28 percent and Black students having the lowest rate at 6.82 percent. However, other than White students, all student racial/ethnic groups were lower than the state average participation rate (15.70%).

AP PERFORMANCE: PERCENTAGE OF STUDENTS SCORING 3, 4, OR 5

Performance

The College Board considers students who score 3 or higher on AP exams as "passing." The overall performance for the state shows an 11.71 percentage points decrease from 2019-20. All subgroups showed a decrease in students scoring 3 or higher on AP exams. Hispanic students had the highest percentage decrease of 13.5 percentage points, with White students being the second highest with a 12.35 percentage point decrease. The percentage of American Indian students (30.89%) who passed AP exams decreased 2.59 percentage points as compared to 2019-20. American Indian students scored lower than their Hispanic (38.32%) and White (55.77%) peers.

SAT

The SAT is an essential academic indicator of student preparation for college and career opportunities. Student performance in critical reading, mathematics, and writing strongly predicts college and career readiness.

Participation

According to the 2020-21 College Board data, SAT participation decreased significantly across the state. The rate of all North Carolina public school students taking the SAT in 2020-21 (21.37%) was 19.85 percentage points below the rate of test-takers in 2019-20 (41.22%). The rate of American Indian students taking the SAT in 2020-21 was 9.15% which is below the participation rate in 2019-20 (24.93). All racial/ethnic groups decreased their SAT participation rate. Black students showed the most significant decline at 23.96, followed by Hispanic students at 21.89, American Indian students (19.85), and White students (19.07).

Performance

For those taking the SAT in 2020-21, average scores for the state increased from the previous year. In addition, scores for each racial/ethnic subgroup increased. American Indian students scored 69 points higher in 2020-21 than in 2018-19. The average score for American Indians in 2020-21 was 1043, which was 104 points below the state average (1147), 125 points lower than the score of their White peers (1168), and 52 points lower than their Hispanic peers (1095).

NC AVERAGE SAT SCORES

NC AVERAGE ACT SCORES

American Indian
 White
 Black
 Hispanic

Short-Term Suspensions

In 2020-2021, there were 17,973 short-term suspensions reported statewide, a decrease of 88.2% from the 152,872 reported in the 2019-2020 academic year. However, it is significant to note that much of the year was virtual or a hybrid model. The number of short-term suspensions for American Indian (112), Hispanic (2,292), Black (7,090), and White (8,479) students decreased compared to the previous academic year. In 2020-2021, Black students had the highest rate of short-term suspensions (19), followed by White students (12). American Indian students (7) had the lowest short-term suspension rate compared to their peers in 2020-21.

LEA FINDINGS: AMERICAN INDIAN STUDENT PERFORMANCE

The American Indian Student Performance by LEA or Charter School for EOC and EOG assessments is not included in this report for the 2019-20 school year due to the COVID-19 Pandemic. However, 2019-20 data are available for AP, SAT, and ACT by LEA. To further review 2019-20 data by racial/ethnic group and level for a district or charter school please visit: <https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/school-accountability-and-reporting>

SOUTHWEST

Charlotte-Mecklenburg Schools enrolled 139,428 students in 177 schools in 2020-21, which includes a variety of theme-specific campuses. The 2020-21 enrollment reflects 177 (0.13%) American Indian students from various tribes. In 2020-21, the district proficiency rates were below the state proficiency rates on all EOG/EOC assessments except for EOC English II. The district's proficiency rate in EOC English II was 1.8 percentage points above the state's rate. American Indian students performed above the state and district averages in EOG Reading and EOC English II. However, American Indian students' performance rates were below the district and state rates in EOG Math, EOC Math I, and Biology. American Indian students demonstrated higher rates of proficiency than their Hispanic and Black peers on all EOG/EOC subjects except the EOC Math I. Conversely, American Indian students' proficiency rates were significantly lower than their White peers in all EOG/EOC assessments. The American Indian 4-Year Cohort Graduation Rate decreased significantly (15.5 percentage points) for 2019-20. However, the rate increased slightly (2 percentage points) for 2020-21 but dropped below most racial and ethnic subgroups and the state and district averages. No data have been reported for the annual dropout rate of American Indians for the last three years.

Clinton City Schools enrolled 2,583 students, including 73 (2.8%) American Indians, mainly of the Cohaire Tribe in 2020-21. In the Title VI cohort, Clinton City Schools (located in Sampson County) operates five schools, including one high school. In 2020-21, the district proficiency rates were below the state in all EOG and EOC tested areas except EOG Math. American Indian students performed below the district average in both EOG Reading and Math. Data are not available for proficiency rates for Math I, Biology, and English II EOC assessments. American Indian students demonstrated higher rates of proficiency than their Black peers in EOG Reading and Math; although, they were behind their Hispanic and White peers in both EOG assessments. The 4-Year Cohort Graduation rate for American Indian students is not reported due to insufficient data. In addition, the annual dropout rate for American Indians is unavailable due to the low number of American Indian students in the district.

SANDHILLS

In 2020-21, Columbus County Schools enrolled 4836 students of whom 223 (4.6%) are American Indians, primarily from the Waccamaw Siouan Tribe, which is indigenous to Bladen County and surrounding communities. In 2020-21 the average proficiency rate of the district was lower than the state average in all EOG/EOC assessments except Math I. American Indian students performed above the district proficiency rates in EOC English II. However, when comparing other EOG/EOC proficiency rates for Math, Reading, Biology and Math I, American Indian students were below both state and district percentages. American Indian students demonstrated higher proficiency rates than their Black peers in all EOG/EOC assessments and their Hispanic peers in EOG Reading and EOC English II. However, the average proficiency rates of American Indian students lagged behind those of their White peers on all EOG/EOC assessments and below their Hispanic peers in EOG Math, EOC Math I, and Biology. The 4-Year Cohort Graduation rate for American Indian students decreased but remained above the state and district rates as well as the rates of their White, Black, and Hispanic peers. Sufficient data are not available for comparison of the annual dropout rate of American Indians.

SANDHILLS

Cumberland County Schools serves an expansive military community, which adds to the diversity of the district. In 2020-21 the district served 47,806 students, including 649 (1.4%) American Indian students, from various tribes, but primarily the Lumbee Tribe. The district operates 89 schools, including 14 high schools, two early colleges, and two virtual learning schools. In 2020-21, the average proficiency rate for the district was below the state average in all EOG/EOC subject areas. American Indian students' average rate of proficiency was below the state in all EOG/EOC areas and below the district on all EOG/EOC assessments except EOC Biology. American Indian students demonstrated higher rates of proficiency than their Black peers in almost all EOG/EOC tested subjects, except EOC Math I. However, proficiency rates of American Indian students were below those of their White peers in all areas and below their Hispanic peers in all areas except Biology. Compared to the state, the district, and all other racial/ethnic groups, American Indian students (74.1%) have the lowest 4-Year Cohort Graduation rate. Dropout rate data for American Indian students are unavailable due to the low number of American Indian students in the district.

GRAHAM COUNTY

DISTRICT CONTACT: DALE ROBINSON
dalerobi@nc-cherokkee.com

WESTERN

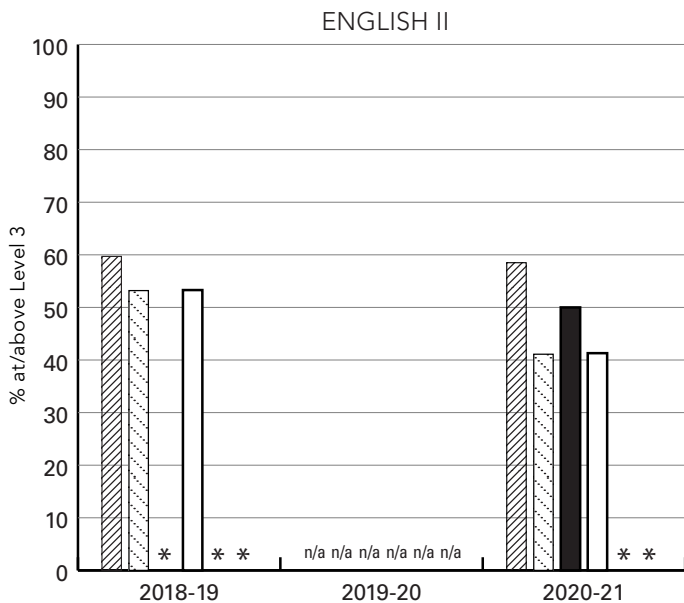

Graham County Schools is located near the Qualla Boundary (a reservation of the Eastern Band of the Cherokee). In 2020-21, the district enrolled 1086 students including 178 (16.4%) American Indians, which are mainly from the Eastern Band of Cherokee. The district operates an elementary, middle, and high school. In 2020-21, the district was below the state's average in proficiency rates in all EOG/EOC subject areas except Math I. American Indian students fell below the district in all areas except EOC English II and all state average grade-level proficiency rates except in EOC Math I. When compared to their White and Hispanic peers, fewer American Indian students showed proficiency in EOG Reading, EOG Math, EOC Math I, and EOC Biology; however, American Indian students' proficiency rate in EOC English II was higher than their White peers. Sufficient data were not available for comparison to their Black peers in any areas. In addition, the 4-year Cohort Graduation rate and three-year annual dropout data for 2020-21 were not available to report.

PIEDMONT-TRIAD

Guilford County Schools enrolled 68,197 students in 2020-21, of whom 241 (.35%) are American Indians representing both federal and state recognized tribes. Guilford County operates 124 schools, including a myriad of magnet campuses. The district's proficiency rates on all EOG/EOC assessments is below those of the state. The 2020-21 data showed the rate of American Indian students demonstrating proficiency on all EOG/EOC assessments was lower than the state and district rates. American Indian students demonstrated lower levels of proficiency than their White and Hispanic peers in all tested areas. However, they performed above their Black peers in EOG Reading but below in all EOG/EOC subject areas. The American Indian 4-year Cohort Graduation rate (92.9%) increased by 24.7 percentage points in 2021-21. For 2020-21, it was above the cohort graduation rates for the state, district, and Black and Hispanic peer subgroups. Sufficient data are not available for comparison to the dropout rate for American Indian students.

HALIFAX COUNTY

DISTRICT CONTACT: TYRANA BATTLE
<http://www.halifax.k12.nc.us>

NORTHEAST

Halifax County Schools enrolled 2,156 students in 2020-21, of whom 140 (6.5%) are American Indian, mostly from the Haliwa-Saponi Indian Tribe. There are 11 campuses across the district, including two high schools and one early college. In the EOG and EOC tested subjects, the district proficiency rates for 2020-21 remained below the state averages. In all other EOG and EOC tested areas the percentage of American Indian students who were proficient exceeded the district rate. Where data was provided, American Indian students performed above their Black and Hispanic peers in all EOG areas and slightly above their White peers in EOG Math. Data was not provided for Hispanic or White peers in EOC areas; however, American Indian students showed a higher proficiency rate in EOC Biology (20.0%) than their Black peers. The 4-year Cohort Graduation rate for American Indian students (70%) was below the state, district, and Black peer subgroup rates. The Annual Dropout rate for American Indian students was not reported at the district level due to insufficient data.

NORTHEAST

Approved as a charter school by the State Board of Education in 2000, the Haliwa-Saponi Tribal School had a total enrollment of 154 students, 110 (71.4%) of whom are American Indian, in 2020-21. The school is committed to the preservation of the Haliwa-Saponi traditions and integrates their customs and values across the curriculum. The school serves students in grades K-12 and is located in Warren County. There was insufficient data for reporting the American Indian students' EOG/EOC assessment data and annual dropout rate data. The 4-Year Cohort Graduation for 2020-21 was 83.3 percent which dropped 1.3 percentage points from 2018-19.

Hoke County Schools enrolled 8,406 students, which included 657 (7.8%) American Indians in 2020-21. Students attend one of 14 schools, which include one high school, one alternative school, and an early college. In 2020-21, the district proficiency rate was lower than the state rate for all EOG/EOC tested subjects. For American Indian students, deficits were noted in each EOG/EOC tested subject. The proficiency rates for American Indian students in all EOG/EOC subjects were lower than all racial and ethnic groups in the district except for EOC English II where American Indian students (43.8%) performed above their Black peers (40.8%). The 4-Year Cohort Graduation rate for American Indians (67.9%) was lower than both district (82.6%) and state (87%) rates. The annual dropout rate for American Indians was not reported due to insufficient data.

WESTERN

Located on land contiguous with the Qualla Boundary, Jackson County Schools in 2020-21 enrolled 3,485 students of whom 252 (7.2%) are American Indian, mainly of the Eastern Band of Cherokee. The Jackson County school district operates nine campuses, including one high school, two early colleges, and one alternative school. In 2020-21, the district performed below the state on all EOG assessments. However, the district's performance on all EOC assessments showed proficiency rates above the state. The proficiency rates for American Indians were lower than the state and district on all EOG/EOC assessments. American Indian students performed above their Black peers on EOG Reading, however, they remained below their Black, Hispanic, and White peers on all other reported EOG/EOC subject areas. The 4-Year Cohort Graduation rate for American Indians increased by 4.9 percentage points, although it remained below the state and district rates. The annual dropout percentage rate for American Indians has not been provided for the last 4 years.

NORTH CENTRAL

Johnston County Schools in 2020-21 enrolled 36,014 students, of whom 101 (0.28%) were American Indians of various tribes. The district operates 45 schools, including nine high schools, one early college, and one career technical school. Compared with the state, 2020-21 data showed that the district proficiency rates were lower in all EOG/EOC subject areas. The percentage of American Indian students at the proficient level was above the state and district in EOG Reading and Math. Proficiency rates for American Indian students compared to their Black and Hispanic peer groups were higher in all EOG assessments. However, American Indian students performed below their White peers in EOG Reading areas and showed comparable proficiency in EOG Math. The American Indian 4-Year Cohort Graduation rate (78.6%) dropped 8.9 percentage points in 2020-21 and was below the state, district, and all subgroups rates. The annual dropout rates for American Indian students have not been included for the last 3 years.

* = Indicates that the student population in the subgroup is too small to report the value (Fewer than five students in the cohort. Beginning in 2015-16, this increased to fewer than ten students.)

n/a = Current year data are unavailable or contain no scores for the selected test.

<5 or >95 = The percentage and number of students are not shown if the percentage is greater than 95 percent or less than five percent.

PERSON COUNTY

DISTRICT CONTACT: JOSEPH WARREN
warrenj@person.k12.nc.gov

NORTH CENTRAL

Person County Schools enrolled 4,274 students, of whom 20 (0.47%) were American Indians, mainly of the Sappony Tribe, in 2020-21. Students attend one of 12 schools, including one high school, an early college, and a virtual academy. Other campuses include a preschool center and a program that focuses on early intervention and family services. 2020-21 data showed that district proficiency rates were lower than state rates in all EOG/EOC subjects. American Indian data for EOG assessments is not available and the sparse enrollment of American Indian students above the eighth grade restricts meaningful data analysis of EOC assessments. Additionally, data are not available for the 4-Year Cohort Graduation and annual dropout rates of American Indian students.

RICHMOND COUNTY

DISTRICT CONTACT: PAM PATTERSON
<http://www.richmond.k12.nc.us>

SANDHILLS

Richmond County Schools in 2020-21 enrolled 6638 students, of whom 193 (2.9%) were American Indians representing the Lumbee, Eastern Band of Cherokee, Tuscarora, Sioux, and the Pee Dee Indians of South Carolina. The district operates 15 schools with one high school, an alternative school and one early college. In 2020-21, the district proficiency rates were lower than the state in all EOG/EOC assessments. The proficiency rates of American Indian students were higher than the district rate in the EOG Math and EOC English II assessments but below the state rate in all subject areas. American Indians demonstrated higher rates of proficiency than their Black peers in all EOG areas and in EOC English II. In all EOG/EOC tested areas, fewer American Indians were proficient compared to their White peers and in all but English II when compared to their Hispanic peers. The 4-Year Cohort Graduation rates for American Indians decreased 9 percentage points in 2020-21, and those rates are below state and district averages as well.

ROBESON COUNTY

DISTRICT CONTACT: DR. CONNIE LOCKLEAR
<http://www.robesson.k12.nc.us>

SANDHILLS

The Public Schools of Robeson County enrolled 20,741 students, including 8,319 (40.1%) who are identified as American Indians, mainly of the Lumbee Tribe. The district operated 36 schools. The proficiency rates of American Indian students are below the state rates in all tested areas; however, American Indian students' rates are above the district in EOG Math and all EOC subject areas. The proficiency rates of American Indian students lagged behind their White peers on all EOG/EOC assessments and behind their Hispanic peers in EOG Reading and EOC Math I. However, American Indian students demonstrated higher rates of proficiency than Black students in all areas. The 4-Year Cohort Graduation rate for American Indian students (84.8) remained below the state (87%) and district (87%) rates. In 2020-21, American Indian student's graduation rate decreased by a .6 percentage point. The annual dropout rate for American Indian students decreased significantly since 2018-19 and dropped below the district and all ethnic and racial peer rates.

SWAIN COUNTY

DISTRICT CONTACT: BRANDON SUTTON
<http://www.swain.k12.nc.us>

WESTERN

In 2020-21, Swain County Schools enrolled 1,787 students of whom 364 (20.4%) are members of the Eastern Band of Cherokee. Located on land contiguous to the Qualla Boundary, the district operates five schools including two elementary, one middle, one high school, and one K-12 extension school. In 2020-21, district proficiency rates were below the state in all EOG/EOC assessments except for EOG Math. American Indian students demonstrated a lower proficiency rate than the state and district in all EOG/EOC tested subjects except for EOC Math I. American Indian students performed better than Hispanic students in EOG Reading but below in EOG Math. White students outperformed American Indians in all EOG/EOC tested areas. The 4-Year Cohort Graduation rate for the district was lower than the state. American Indian students had a lower graduation rate than the state, district, and their White peers. Sufficient data for American Indian students are not available for comparison of the annual dropout rates.

NORTH CENTRAL

Wake County Public Schools in 2020-21 enrolled 158255 students in 177 schools, including 24 high schools, and a cadre of early colleges and special-focus schools. Richly diverse, Wake County Public Schools enroll 383 (0.24%) American Indian students representing 78 tribal affiliations. The 2020-21 EOG and EOC data showed the district proficiency rates were higher than the state rates in all areas except EOC Math I. The proficiency rates for American Indian students were above the state averages in all EOG/EOC tested areas except EOC Math I. American Indian students performed above the district in all tested areas of the EOC but below in all EOG areas. In comparison to their Black and Hispanic peers, American Indian students performed higher in all EOG/EOC tested subject areas; however, they lagged behind their White peers in these same tested areas. The data shows that the 4-Year Cohort Graduation rate of American Indians lagged behind the rates for the state, district and their White and Black peer groups. Data were insufficient to calculate a dropout rate for American Indian students.

> = Scores changed due to data corrections.

* = Indicates that the student population in the subgroup is too small to report the value (Fewer than five students in the cohort. Beginning in 2015-16, this increased to fewer than ten students.)

n/a = Current year data are unavailable or contain no scores for the selected test.

<5 or >95 = The percentage and number of students are not shown if the percentage is greater than 95 percent or less than five percent.

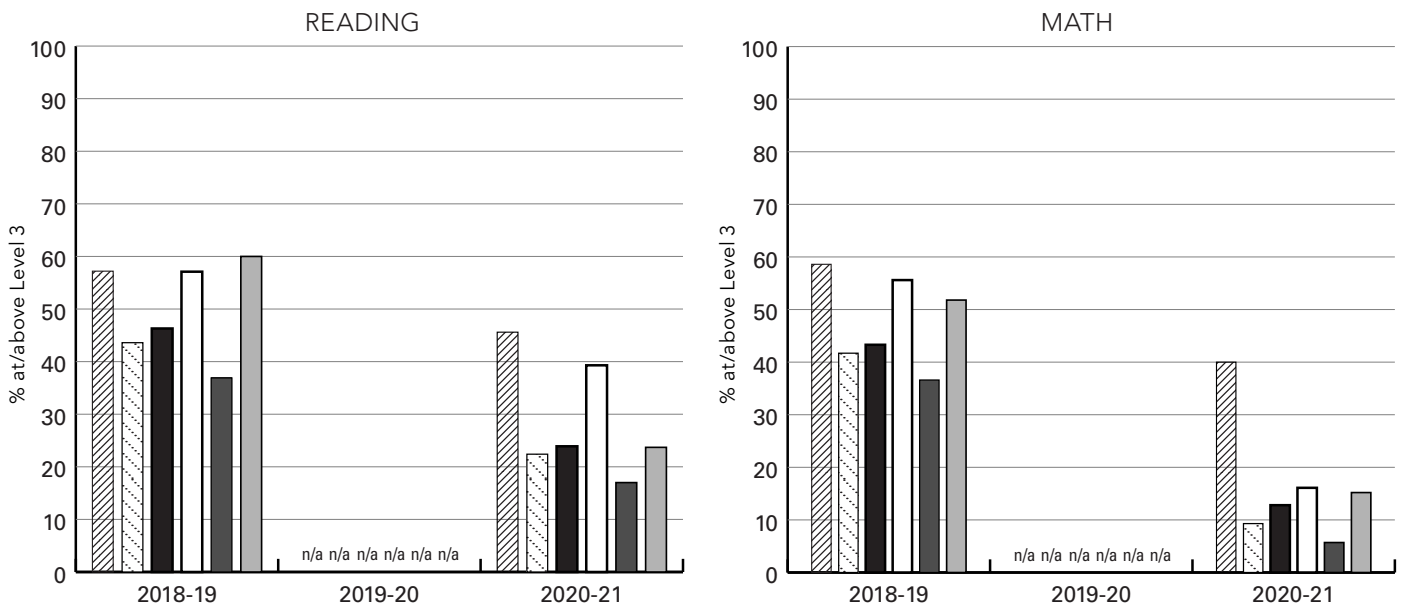

NORTH CENTRAL

Warren County Schools enrolled 1,714 students, including 124 (7.2%) American Indian students, mainly of the Haliwa-Saponi Tribe, in 2020-21. Warren County operates seven schools. In 2020-21, district proficiency rates in all EOG/EOC tested subjects were below the state rates. The proficiency rates of American Indian students exceeded the district rates in all EOG tested subjects but below the district in EOC English II where data are available. However, American Indian students fell behind the state rate in all reported EOG/EOC subjects. American Indian students outperformed their Black peers in all reported testing areas; however, they lagged behind their White peers in all EOG/EOC assessments and behind their Hispanic peers in EOG Reading and EOC English II. There was insufficient data for American Indians to compare proficiency rates on EOC Math I and Biology. The 4-year Cohort Graduation rate for American Indian students (92.9%) decreased somewhat but remained above the rate for the state, district, and all subgroups. There was not sufficient data for the annual dropout rate for American Indians students.

Students Taking AP Exams by District

Data indicates that participation of American Indian students in AP classes still remains low across most districts with five out of the 19 districts reporting in 2020-21. Out of the five districts reporting AP data, two had more than a 10 percentage point increase of American Indian students taking AP exams. In Guilford County Schools (42.1%), American Indian students' participation rate increased 12.9 percentage points in Wake County Public Schools (50.8%) there was an increase of 11.9 percentage points. Charlotte/Mecklenburg (30.5%) American Indian students' participation rate decreased by 0.7 percentage points. American Indian participation rate in AP classes in these three districts was also above both the state and district rates. American Indian students had a higher representation rate than all their peers in Wake County Public Schools and Guilford County Schools, and above both their Black and Hispanic peers in Charlotte/Mecklenburg.

AP Performance by District

American Indian participation rates in AP classes are too small to analyze for most districts. In 2020-21, only five (Charlotte-Mecklenburg, Guilford, Robeson, Scotland, and Wake) of the 19 districts identified in this report reported American Indian students scoring a 3, 4, or 5 on AP exams. Participation rates ranged from 47.8 percent in Wake County Schools, to 7.7 percent in Scotland. All five districts showed a decrease in the percentage of students scoring a 3, 4, or 5. American Indian students in Guilford County Schools saw the greatest decrease in ACT scores, decreasing 11.5 percentage points. ACT scores among American Indian students in Wake County Schools decreased 11.4 percentage points. Of the five districts with data, American Indian students taking AP exams scored higher than Black students in all districts except Scotland. However, American Indian students scored lower than Hispanic and White students taking AP exams in all districts except Robeson and Wake, where American Indian students scored above their Hispanic peers.

Students Taking the SAT by District

In 2020-21, two out of the 19 districts had sufficient data to report the SAT participation rate among American Indian students. Out of the two, American Indian students' participation rate was lower than the state average in Robeson (4.1%) but above the state average in Wake (42.9%). American Indian students participated in the SAT at lower rates than their White peers in the two reporting districts but above their Black and Hispanic peers in Wake County.

SAT Performance by District

The SAT performance for American Indian students cannot be fully analyzed and reported because in 17 of the 19 districts the American Indian student population taking the SAT in 2020-21 was too small. However, of those school districts that did have sufficient data regarding American Indian student performance on the SAT, the data show that American Indian students scored higher than their Black peers in Wake County (Robeson lacked sufficient data for Black and Hispanic subgroups); however, they scored below both their White peers in both Robeson and Wake. American Indian students' average SAT score was lower than the district and state averages in the two reporting districts.

ACT Performance by District

In 2020-21, 12 of the 19 school districts reported average ACT scores for American Indian students. Out of the 12, one school district (Wake) had American Indian students (19.8%) performing above the state average and the Warren school district showed American Indian students performing above the district average. Ten districts show American Indian students scoring above their Black peers and three districts show American Indian students scoring above their Hispanic peers.

APPENDIX A

2021 SACIE REPORT RECOMMENDATIONS

The North Carolina State Advisory Council on Indian Education (SACIE) recommends that the NCDPI work closely with school districts and Title VI Indian Education coordinators to implement the following recommendations:

1. As part of the State Board of Education vision for opportunity equity, establish a department-level position dedicated to consultation with and coordination across all entities whose missions seek to improve educational opportunities for American Indian students. This recommendation is consistent with requirements secured by the Every Student Succeeds Act, which requires collaboration and consultation with districts, state and federal tribes, higher education, critical state organizations, and the Department of Public Instruction.
2. Ensure senior leadership who participated in the National Center’s American Indian and Alaska Native (AI/AN) Education Project’s Circles of Reflection Pilot acts on recommendations prioritized in three core areas: (1) Native culture and language; (2) tribal consultation and sovereignty; and (3) targeted DPI efforts to recruit effective American Indian teachers and leaders.
3. Implement formal protocols to ensure DPI collaboration and consultation with SACIE regarding the revision of content standards. Consultation will include the development of 21st century instructional resources that specifically reference American Indian history, the current affairs of culture, and the expansion of innovative programming similar to the Native Voices piloted by NC DPI.
4. The COVID-19 Pandemic has created new challenges that have revealed deeply rooted, barriers to increased student achievement, most noticeably inequitable access to technology. To this end, SACIE recommends the following:
 - increase advocacy for access to broadband internet both in students’ homes and schools, particularly in rural areas and tribal communities;
 - increase digital literacy efforts to ensure American Indian students can successfully engage in an increasingly virtual world; and
 - ensure that COVID relief dollars adequately address gaps resulting from learning-loss during the 12-month school closure. State and federal dollars should support recovery in reading, mathematics, and comprehensive services in social-emotional learning. Mitigating the long-term impact of the 2020 Pandemic on the education of American Indian students must remain paramount.
5. Urge all public school administrators and boards of education to review and implement local policies related to the selection of athletic mascots, and to educate all school personnel on the long-term, damaging effects to students when inappropriate images and messages dishonor the American Indian culture.
6. Explore new venues for disseminating the self-paced modules titled, Culturally Responsive Teaching about American Indians. This resource aligns with North Carolina Teaching Standard II. The modules will ensure that all educators have access to instructional resources that teach about and celebrate state and federal American Indian tribes, their histories, and their achievements. Culturally responsive teachers are the greatest assets in raising the achievement of American Indian students.

APPENDIX B

Native Education Collaborative

Connecting partners | Cultivating resources

The National Center's American Indian and Alaska Native (AI/AN) Education Project's Circles of Reflection Pilot Update

In October 2020, senior leadership of the NC Department of Public Instruction, in an effort to be reflective and gain greater insight into the effectiveness of its support for American Indian students agreed to participate in the National Center's American Indian and Alaska Native (AI/AN) Education Project's Circles of Reflection Pilot. NC was one of four states, along with Washington, Oklahoma, and Idaho, selected to participate in the pilot. The Circles of Reflection Pilot launched in North Carolina on November 10, 2020. The AI/AN Education Project developed the Circles of Reflection, a process to engage SEAs, LEAs, and TEDs in rich, reflective discussions and action planning to provide high quality, motivating educational experiences that improve Native students' academic attainment. Circle participants described the state's efforts relative to specific, topical question prompts, organized by six overarching categories of state support. Then, they determined the current level of effort and its impact within each category on a continuum ranging from not present to strong.

North Carolina Reflections/North Carolina Identified Priorities

The Circles of Reflection process was organized around six over-arching categories of state support. Based on information gathered during the National Center's American Indian and Alaska Native (AI/AN) Education Project's Circles of Reflection Pilot, from tribal representatives and the SEA State Advisory Council on Indian Education Liaison, and senior DPI leadership at the time (3) categories were identified as priorities: Effective Teachers and Leaders, Native Culture and Language, and Tribal Consultation and Sovereignty, as detailed in the following:

Outcomes/Updates

To date, senior leadership of the NC Department of Public Instruction, in partnership with the NC Commission of Indian Affairs, is supporting legislative efforts to secure a position within the agency dedicated to managing work that supports the education of American Indian students. This work would include addressing the recommendations prioritized in three core areas: (1) Native culture and language; (2) tribal consultation and sovereignty; and (3) targeted DPI efforts to recruit effective American Indian teachers and leaders.

	Effective teachers and leaders
	Tribal consultation and sovereignty
	Native culture and language

APPENDIX C

THE ELEMENTARY AND SECONDARY EDUCATION ACT Title VI – INDIAN, NATIVE HAWAIIAN, AND ALASKA NATIVE EDUCATION

PART A – INDIAN EDUCATION

SEC. 7101. STATEMENT OF POLICY

It is the policy of the United States to fulfill the Federal Government's unique and continuing trust relationship with and responsibility to the Indian people for the education of Indian children. The Federal Government will continue to work with local educational agencies, Indian tribes and organizations, postsecondary institutions, and other entities toward the goal of ensuring that programs that serve Indian children are of the highest quality and provide for not only the basic elementary and secondary educational needs, but also the unique educational and culturally related academic needs of these children.

SEC. 7102. PURPOSE

- (a) **PURPOSE:** It is the purpose of this part to support the efforts of local educational agencies, Indian tribes and organizations, postsecondary institutions, and other entities to meet the unique educational and culturally related academic needs of American Indian and Alaska Native students, so that such students can meet the same challenging State student academic achievement standards as all other students are expected to meet.
- (b) **PROGRAMS:** This part carries out the purpose described subsection by authorizing programs of direct assistance for:
- (1) meeting the unique educational and culturally related academic needs of American Indians and Alaska Natives;
 - (2) the education of Indian children and adults;
 - (3) the training of Indian persons as educators and counselors, in other professions serving Indian people; and
 - (4) research, evaluation, data collection, and technical assistance.

APPENDIX D

LEGISLATIVE HISTORY OF THE INDIAN EDUCATION ACT OF 1972

Date	Event
1969	Release of the seminal study, <i>Indian Education: A National Tragedy, A National Challenge</i> . This study drew national attention to the educational disparities that had resulted from many years of failed policies at the highest levels of government.
1972	Congress enacts the Indian Education Act (IEA) and establishes the Office of Indian Education and the National Advisory Council on Indian Education.
1974	Public Law 93-380 amends the Act to add teacher training and a fellowship program.
1988	Public Law 100-97: Congress extends eligibility to Bureau of Indian (BIA) schools.
1994	Public Law 103-382: Congress reauthorizes Indian Education as Title IX Part A of the Elementary and Secondary School Act.
2001	Public Law 107-110: Congress reauthorizes Title VI Part A of the No Child Left Behind Act. Formula grants are to be based on challenging state academic content, and standardized tests are the tools for improving the quality of teaching and learning.
2015	Public Law 114-95: Congress reauthorizes the Elementary and Secondary Education Act (ESEA) of 1965, now cited as the Every Student Succeeds Act (ESSA). As part of this reauthorization Indian Education now falls under Title VI and includes requirements for tribal consultation and meaningful collaboration as it relates to federal programs to serve and improve educational outcomes for American Indian students.

Source: US Department of Education-Office of Indian Education

	Tribal Consultation 8538	Title VI Meaningful Collaboration 6114(b)(7)	Title VI Open Consultation (including Public Hearing) 6114(c)(3)(C)	Title VI Indian Parent Committee 6114(c)(4)
Summary	The consultation requirements under ESEA section 8538 apply to <i>affected</i> LEA(s) that educate AI/AN students. Affected LEAs are required to consult with local Indian tribes prior to submitting a plan or application under covered ESEA formula grant programs and Title VI.	For Indian Education Formula Grants, LEA and BIE-school applicants must describe the process used to meaningfully collaborate with Indian tribes located in the community in a timely, active, and ongoing manner in the development of the comprehensive program and the actions taken as a result of such collaboration. (ESEA 6114(b)(7))	The program must be developed in consultation with specified individuals. The hearing is an opportunity for all of these entities to understand the program and to offer recommendations regarding the program. (ESEA 6114(c)(3)(C)).	For Indian Education Formula Grants, ESEA section 6114(c)(4) requires the program to be developed and approved by a parent committee composed of, and selected by specified individuals
Who must do this?	"Affected LEAs," which are defined as LEAs with 50% or more AI/AN students or who receive \$40,000 in Title VI formula grant funds in the previous fiscal year.	LEA and BIE-funded school Title VI formula grantees with tribes located in the community.	All Title VI formula grant applicants.	Only LEA Title VI formula entities.

APPENDIX E

TITLE VI – THE INDIAN EDUCATION ACT OF 1972 IN NORTH CAROLINA: A BRIEF DESCRIPTION

In an effort to develop a comprehensive model to meet the unique needs of American Indian and Alaskan Native students, Congress adopted the Indian Education Act of 1972. The Act is based on the following premises: 1) American Indians have unique academic needs, especially with respect to language preservation; 2) a continuum of services, pre-school through post-secondary education, is imperative; 3) the trust relationship between the federal government and Indian people must be reinforced across governmental agencies; and 4) every Indian student, regardless of federal recognition status, deserves equal access to federal funding aimed at educational improvement. Even though the Indian Education Act of 1972 has undergone several Congressional reauthorizations, the foundation upon which tribes, local educators, and parents have developed successful programs is stable (see Appendix B).

Since the Indian Education Act was adopted, several school systems with a significant American Indian population have benefited. Some school systems benefited through direct classroom support, college/career planning, after-school programs, cultural enrichment, or a mixture of some or all of these. Funding through Title VI has enabled school districts' efforts to close the achievement gap and improve the awareness of American Indian culture in North Carolina. Title VI program directors are responsible for budget management, project development, resource planning, and other activities aimed at improving achievement of every American Indian student one day and one year at a time.

Prior to students' receipt of services under Title VI, a formal application (506 Form) must be completed by a parent or legal guardian (see Appendix E), which is reviewed by district-level personnel responsible for Indian Education services. Since Title VI funding is based on these 506 forms informing parents and guardians about the procedure, enrollment in the program is viewed as an ongoing process.

APPENDIX G

ED 506 Form

Indian Student Eligibility Certification Form for Title VI Indian Education Formula Grant Program

Parent/Guardian: This form serves as the official record of the eligibility determination for each individual child included in the student count for the Title VI Indian Education Formula Grant Program. If you choose to submit a form, your child could be counted for funding under the program. The grantee receives the grant funds based on the number of eligible forms counted during the established count period. You are not required to complete or submit this form unless you wish for your child(ren) to be included in the Indian student count. This form should be kept on file with the grant applicant and will not need to be completed every year. Where applicable, the information contained in this form may be released with your prior written consent or the prior written consent of an eligible student (aged 18 or over), or if otherwise authorized by law, if doing so would be permissible under the Family Educational Rights and Privacy Act, 20 U.S.C. § 1232g, and any applicable state or local confidentiality requirements.

Student Information

Name of the Child _____ Date of Birth _____ Grade level _____

Name of School _____ School District _____

Tribal Membership

The individual with Tribal membership is the (select only one): child child's parent child's grandparent

If the individual with Tribal membership is **not** the child listed above, name the individual (parent/grandparent) with tribal membership: _____

Name and address of Tribe or Band that maintains updated and accurate membership data for the individual listed above:

Name _____ Address _____

City _____ State _____ Zip Code _____

The Tribe or Band is (select only one):

- Federally Recognized Tribe
- State Recognized Tribe
- Terminated Tribe
- Alaska Native
- Member of an organized Indian group that received a grant under the Indian Education Act of 1988 as it was in effect October 19, 1994.

Proof of membership in Tribe or Band listed above, as defined by Tribe or Band is:

- Membership or enrollment number establishing membership (if readily available) or
- Other evidence establishing membership in the Tribe listed above (describe and attach)

Membership or enrollment number establishing membership (if readily available) or other evidence establishing membership in the Tribe listed above (describe and attach). _____

Attestation Statement

I verify that the information provided above is true and correct to the best of my knowledge and belief.

Printed Name of Parent/Guardian _____ Signature _____

Address _____ City _____ State _____ Zip Code _____

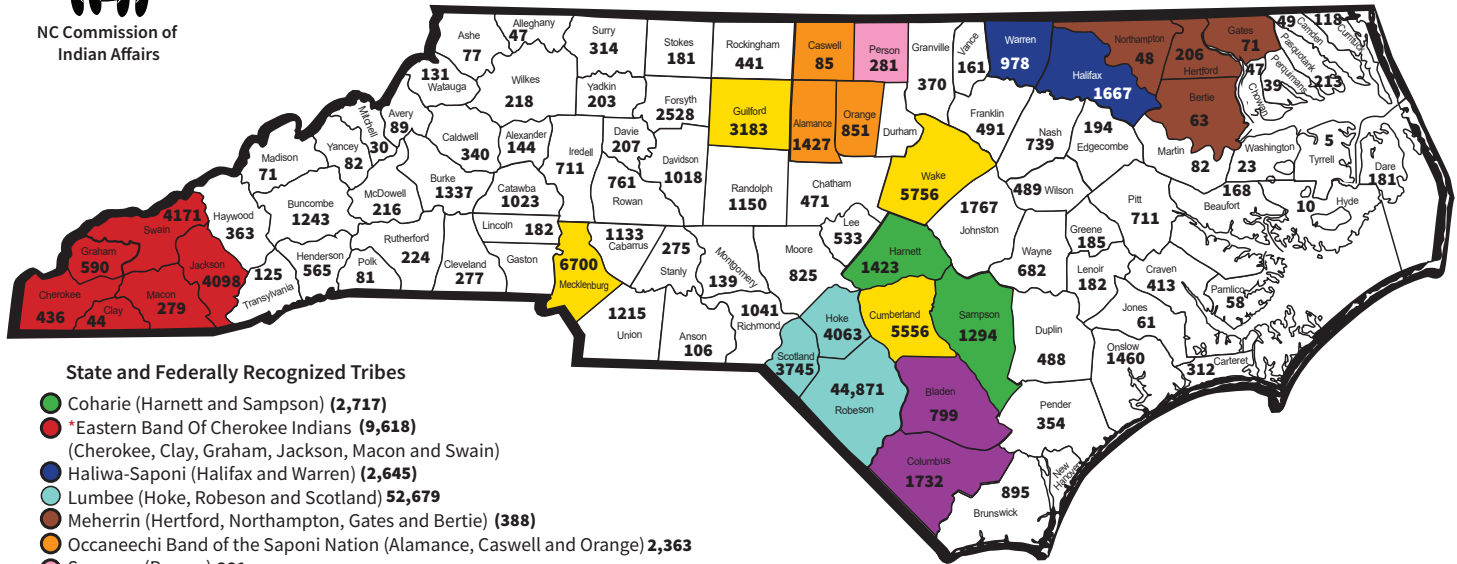

Phone Number _____ Email _____ Date _____

APPENDIX I

DEFINITION OF TERMS

American Indian is any individual who is (1) a member (as defined by the Indian tribe or band) of an Indian tribe or band, including those Indian tribes or bands terminated since 1940, and those recognized by the state in which the tribe or band resides; or (2) a descendant in the first or second degree (parent or grandparent) as described in (1); or (3) considered by the Secretary of the Interior to be an Indian for any purpose; or (4) an Eskimo or Aleut or other Alaska Native; or (5) a member of an organized Indian group that received a grant under the Indian Education Act of 1988 as it was in effect on October 19, 1994. The US Department of Education has adopted this definition as eligibility policy in Title VI of the IEA.

The Elementary and Secondary Education Act (ESEA) of 1965 became a keystone of federal education policy during the Johnson administration. Believing that poverty is linked to school achievement, Congress appropriated massive funding to improve school libraries, language laboratories, learning centers, and support services in poor school districts. Since the passage of this legislation in 1965, the funding of Native American schools has increased dramatically. In 2002, Congress amended and authorized ESEA as the No Child Left Behind (NCLB) act. In December 2015, Congress again reauthorized the ESEA to become the Every Student Succeeds Act (ESSA).

End-of-Course (EOC) assessments of Math I, English II, and Biology assess knowledge and skills outlined in the North Carolina Standard Course of Study for Mathematics and English Language Arts and the North Carolina Essential Standards for Science. These tests are administered within the final 10 instructional days of the school year for year-long courses and within the final five instructional days of the semester.

End-of-Grade (EOG) assessments in reading and mathematics (grades 3-8) and science (grades 5 and 8) assess grade-level knowledge and skills outlined in the North Carolina Standard Course of Study for Mathematics and English Language Arts and the North Carolina Essential Standards for Science. These assessments are administered within the final 10 instructional days of the school year.

Every Student Succeeds Act (ESSA) is the latest reauthorization of the 1965 Elementary and Secondary Education Act (ESEA) and was approved by the U.S. Congress and signed into law in December 2015. ESSA reauthorizes the nation's national education law and longstanding commitment to equal opportunity for all students and replaces the No Child Left Behind Act of 2001.

Federally recognized refers to an Indian or Alaska Native tribe, band, nation, pueblo, village, or community acknowledged by the Secretary of the Interior to exist as an Indian tribe pursuant to the Federally Recognized Indian Tribe List Act of 1994 (U.S.C. § 479a.).

Holistic Education promotes the belief that each person finds meaning and purpose through connections to the community, to the natural world, and to the humanitarian values of empathy, individual responsibility, and personal sacrifice. Holistic education calls forth a high regard for life and a passion for learning. Holistic education differs in its application; however, the core belief guiding the theory is that students will deepen their knowledge only when abstract ideas are transferred to practice.

Indian Education Act (IEA) of 1972 is considered landmark legislation in that Congress established, for the first time, a comprehensive approach for educating American Indian/Alaska Native students (AI/AN). Since its enactment in 1972, the IEA has continued through subsequent re-authorization procedures with No Child Left Behind being the latest of the statutes. Allotments to states are made possible through Title VI of the Elementary and Secondary Education Act (ESEA) which is now known as the ESSA.

Literacy Development generally refers to fluency in reading, writing, and speaking and suggests an interdependent relationship between the modes of communication. Literacy development is seen as emerging from children's oral language development and their initial attempts at reading and writing. Within an emergent literacy framework, children's early unconventional attempts at reading and writing are respected as legitimate beginnings of literacy.

Local Educational Agency (LEA) is a county or city entity legally authorized to administer educational programs funded by the North Carolina General Assembly governed by the State Board of Education and carried out by the Department of Public Instruction.

Low-Performing Schools are those that receive a school performance grade of D or F and a school growth score of "met expected growth" or "not met expected growth" as defined by G.S. §115C- 83.15(115C-105.37).

North Carolina Commission of Indian Affairs (NCCIA) was established by the North Carolina General Assembly in 1971. The Commission is organized under the North Carolina Department of Administration and strives to address the concerns of Indian citizens in communities across the state. Pursuant to the General Statutes of North Carolina 143B-404-411, the Commissioners collaborate with state education officials in areas that impact American Indian students in grades K-12.

North Carolina Department of Public Instruction (NCDPI) administers all policies adopted by the State Board of Education and employs instructional, financial, and technological personnel to assist public schools in developing and implementing local policies and programs consistent with SBE policies and goals.

The North Carolina Standard Course of Study (NCSCOS) defines the appropriate content standards for each grade or proficiency level and each high school course to provide a uniform set of learning standards for every public school in North Carolina. These standards define what students are expected to know and be able to do by the end of each school year or course.

Parent Advisory Committee is part of Title VI of the Indian Education Act. This committee lends support to the system-wide Title VI initiative through project advisement, volunteer support, and resource development.

Proficiency is a technical term in the READY accountability model that means a student has mastered the content sufficiently and is on track for career-and-college readiness. For accountability purposes, a student demonstrates proficiency when he or she scores an achievement level of 3, 4, or 5 on the assessment. Achievement Level 3 identifies students who have sufficient command of grade-level knowledge and skills in the tested content areas (English language arts, math, and science) to move on the next grade, but who may need additional academic support to be on track for career-and-college readiness (grade-level proficiency). Achievement levels 4 and 5 indicate students are on the track to be career-and-college ready by the time they graduate from high school (career-and-college ready proficiency). Proficiency statistics (e.g., Percent Proficient) provide an estimate of a student group's performance or a school's aggregate proficiency.

State Advisory Council on Indian Education dates back to 1988 when the North Carolina General Assembly enacted Article 13A (NCGS § 115C-210) to establish a body to advocate for American Indian students enrolled in the public schools. Composed of 15 members, the Council consists of parents, state legislators, UNC Board of Governors appointees, public school practitioners, and representatives of the North Carolina Commission of Indian Affairs.

State Board of Education (SBE) is charged with supervising and administering "the free public school system and the educational funds provided for its support." The Board consists of the Lieutenant Governor, the State Treasurer, and eleven members who are appointed by the Governor and confirmed by the General Assembly during a joint session (NCDPI, 2012).

State-Recognized Indian Tribe is one that meets the eligibility criteria established by an agency of state government. The US Census Bureau relies on a state-appointed liaison to provide the names of tribes that states officially recognize. Acting as this liaison, the North Carolina Commission of Indian Affairs reports to the Census Bureau seven state tribes: 1) Coharie, 2) Haliwa-Saponi, 3) Lumbee, 4) Meherrin, 5) Occaneechi of the Saponi Nation, 6) Sappony, and 7) Waccamaw Siouan. Note: The Eastern Band of the Cherokee is a federally designated tribe.

STEM (Science, Technology, Engineering, and Mathematics) is an acronym designating the fields of study in science, technology, engineering, and mathematics. The acronym is in use regarding access to United States work visas for immigrants who are skilled in the STEM fields. This special condition for granting visas has drawn attention to the deficiencies in preparing students in this country for high-tech jobs. Maintaining a citizenry that is proficient in the STEM areas is a key portion of the public school agenda for the United States.

Tribal Consultation Under the Elementary and Secondary Education Act Under the Elementary and Secondary Education Act (ESEA), some districts are required to consult with tribal governments on the development of their education plans.¹ This practice brief is intended to serve as an overview of district-level ESEA tribal consultation requirements and as guidance for local education agencies (LEAs). This brief does not discuss state-level consultation for Title I, Part A planning or how ESEA applies to schools that fall under the jurisdiction of the U.S. Secretary of the Interior and the U.S. Bureau of Indian Education. Affected Districts ESEA also requires districts with an enrollment of 50% or greater American Indian or Alaska Native students² and/or a Title VI Indian Education grant of more than \$40,000 to consult with tribal nations and communities "for a covered program under [ESEA] or for a program under Title VI of [ESEA]" (Elementary and Secondary Education Act [ESEA] of 1965, 20 U.S.C. § 7918, 2015). The act requires tribal consultation to be (a) timely and (b) meaningful, but it does not define these terms, only that it "shall be done in a manner and in such time that provides the opportunity for such appropriate officials³ from Indian tribes or Tribal organizations to meaningfully and substantively contribute" (ESEA, 20 U.S.C. § 7918, 2015).

APPENDIX J

AMERICAN INDIAN MASCOTS, DESCRIPTORS, AND NICKNAMES IN PUBLIC SCHOOLS ACROSS NORTH CAROLINA

In February 2002, the NC State Advisory Council on Indian Education passed a resolution calling for the elimination of American Indian mascots and related imagery in North Carolina’s public schools. In its resolution, the Council stressed that American Indian descriptions naming mascots, logos, and sports team nicknames are detrimental to the self-identity, self-concept, and self-esteem of American Indian students. The Council also stressed that these descriptions work contrary to the State Board of Education’s strategic priorities that schools provide a welcoming, caring, and inviting place for student learning, and that student achievement is high in schools for all students. The State Board of Education approved a recommendation in June 2002 that strongly encouraged all educators in the public schools of North Carolina to educate themselves on the educational, curricular, and psychological effects of using American Indian sport mascots and logos. In addition, the Board agreed that all public school administrators and local boards of education should review their policies and procedures toward the use of American Indian sport mascots, logos, and other demeaning imagery.

At the direction of the State Board of Education, several local education agencies (LEAs) across the state have reviewed and revised their policies for using American Indians or other existing ethnic groups as mascots, nicknames, or descriptors for school-related teams, clubs, and organizations. In 2002, 73 North Carolina schools in 43 districts had American Indian mascots or imagery. In 2012, 43 schools in 20 districts used Indian sports mascots, logos, or nicknames. In July 2017, a review of all NC Public School district websites revealed that 22 school districts, a total of 36 schools, in the state of North Carolina still have American Indian-themed mascots/logos/names. This includes 10 elementary schools, 1 K-8 school, 1 intermediate school, 10 middle schools, and 14 high schools. There are also a number of other schools that use terms such as Warriors and Braves but do not have an Indian-themed mascot/logo.

Most recently, a review was conducted in March of 2021. This review revisited the 36 schools within the 22 school districts, which were included in the 2017 data and found to still have American Indian-themed mascots/logos/names. Upon examination, it was found that two of the 36 schools no longer have an American Indian-themed logo; however, their names (Warriors and Braves) remain unchanged. Therefore, 34 schools were found to still have an American Indian- themed logo/mascot.

APPENDIX K

A PATHWAY FORWARD: GUIDANCE FOR THE ELIMINATION OF AMERICAN INDIAN MASCOTS IN NC PUBLIC SCHOOLS

Given the State Board of Education’s commitment to the well-being of American Indian students, to eliminating opportunity gaps by 2025, and to making schools and educators more culturally relevant and equity-focused, it is important for the State Board to reaffirm its opposition to American Indian mascots, nicknames, and logos, particularly those that employ and perpetuate offensive stereotypes about American Indians by:

- sending a letter to all public school superintendents and school board members reiterating and recommitting to the State Board’s 2002 resolution, using the letter sent in October 2002 as a template;
- restating the expectation that all local education agencies (LEAs) report annually on their efforts to review their mascots and educate personnel on the effects of American Indian mascots;
- designating a staff person within the Department of Public Instruction responsible for compiling LEAs’ reports and ensuring participation of all LEAs; and
- if allowable by statute, strengthening the State Board’s resolution, thereby requiring the elimination of all American Indian mascots, logos, and nicknames from North Carolina public schools by the start of the 2023-24 school year.

Given that the work of eliminating American Indian mascots ultimately lies with local boards of education and district leadership, SACIE will be providing further guidance to support LEAs in engaging in this work. In addition, the U.S. Department of Education White House Initiative on American Indian and Alaska Native Education provides a resource guide offers insight into beginning the journey to changing American Indian mascots. That resource can be found at the website listed below.

“More Than Mascots: A Resource Guide for Ensuring Native Youth Experience Safe and Welcoming School Environments” <https://permanent.fdlp.gov/gpo73768/ed005627p.pdf>

APPENDIX L

RESOLUTION OF THE NORTH CAROLINA STATE ADVISORY COUNCIL ON INDIAN EDUCATION

February 26, 2002

TITLE: A Resolution in Support of Eliminating American Indian Descriptions Naming Mascots, Logos, and Sport Team Nicknames for North Carolina Public Schools.

Whereas, the State Advisory Council on Indian Education serves as a mechanism for advising the State Board of Education on issues pertaining to the education of American Indian students in grades K-12; and,

Whereas, the State Advisory Council on Indian Education is charged by the General Assembly of North Carolina, BB 2560, to advise the State Board of Education and the Department of Public Instruction on effective educational practices for Indian students including practices that raise academic achievement and reduce the dropout rate among American Indian students; and,

Whereas, the use of American Indian descriptions naming mascots, logos, and sports team nicknames has been determined to have detrimental effects on the achievement and self-identity, self-concept, and self-esteem of Indian students; and,

Whereas, nearly sixty public schools in North Carolina have Indian sport mascots, and

Whereas, the academic performance of American Indian students continues to lag behind all other groups in North Carolina; and,

Whereas, American Indian students have the highest drop-out rate of any segment of the North Carolina public school enrollment; and,

Whereas, the 18,000 American Indian students and all students in North Carolina's public schools have the right to be treated with respect and dignity and to be free from demeaning stereotypes, and,

Whereas, it is a strategic priority that North Carolina's public schools provide a welcoming, caring, and conducive atmosphere for learning for American Indian students; and,

Whereas, it is a strategic priority of the State Board of Education to have American Indian students achieve high performance in schools; and,

Whereas, it is a strategic priority of the State Board of Education to have teachers and counselors who practice effective strategies for maintaining high levels of self-esteem among American Indian students thereby decreasing failure and dropout rates; and,

Whereas, it is a strategic priority of the State Board of Education to have teachers, administrators, and staff who are culturally sensitive and who are aware of the social and linguistic differences of Indian students; and,

Whereas, it is desirable to sensitize and to inform those well-meaning persons who feel that they are honoring American Indians by using American Indian descriptions for mascots, logos, and sports teams; and,

Whereas, the National Indian Education Association, the Society of Indian Psychologists, the U.S. Commission on Civil Rights, the North Carolina Commission of Indian Affairs, and over 100 other national organizations and school systems have endorsed the elimination of Indian sports mascots; and,

Whereas, the membership of the State Advisory Council on Indian Education considers the use of American Indian descriptions naming mascots, logos, and sports team nicknames as offensive, demeaning, and disrespectful to American Indians, their culture, and their heritage;

We, therefore, resolve

- that for educational, curricular, and psychological reasons, North Carolina’s public schools and their students will benefit from eliminating American Indian mascots and related imagery, and,
- that the State Advisory Council on Indian Education endorses the Resolution of The N.C. Commission of Indian Affairs (NCCIA) and shares the Commission’s hope that all public schools in North Carolina will eliminate Indian sport mascots and imagery by June 2003, and,
- that the N.C. State Advisory Council on Indian Education requests that the North Carolina State Board of Education recommend that the public schools of North Carolina educate themselves on the educational, curricular, and psychological effects of using sport mascots and logos and that all public school systems review their policies and procedures toward the use of Indian sport mascots, logos, and all demeaning imagery.”

CERTIFICATION

The State Advisory Council on Indian Education adopted this Resolution by a unanimous vote of the membership during the February 26, 2002, meeting.

Signed-

Anthony Locklear, Chairman

Priscilla Maynor, Senior Assistant to State Superintendent of Public Instruction

APPENDIX M

NORTH CAROLINA STATE SUPERINTENDENT OF EDUCATION LETTER TO 117 DISTRICT SUPERINTENDENTS AND CHARTER SCHOOL DIRECTORS CONCERNING STATE BOARD OF EDUCATION'S ACTION STATEMENT ON AMERICAN INDIAN SPORT MASCOTS IN THE NC PUBLIC SCHOOLS

October 31, 2002

MEMORANDUM

TO: LEA Superintendents

Charter School Directors

FROM: Michael E. Ward, State Superintendent

Priscilla J. Maynor, Senior Assistant to State Superintendent

Louise Maynor, Chair, State Advisory Council on Indian Education

SUBJECT: Native American Heritage Month

AMERICAN INDIAN SPORT MASCOTS, LOGOS AND DEMEANING IMAGERY

The month of November is Native American Heritage Month and throughout the state, particularly in our public schools, celebrations and programs are planned that will enhance knowledge in heritage, history, art and tradition of American Indians. These programs reflect your commitment and the commitment of your local board members and school administrators to take every possible step to ensure that schools in your communities are welcoming and caring environments for all public school students.

The State Advisory Council on Indian Education recently convened to discuss action taken by the State Board of Education at its June meeting regarding the use of American Indian sport mascots, logos and demeaning imagery. The State Board approved a recommendation strongly encouraging all educators in the public schools of North Carolina to educate themselves on the educational, curricular, and psychological effects of using American Indian sport mascots and logos. In addition, the State Board agreed that all public school administrators and local boards of education should review their policies and procedures toward the use of American Indian sport mascots, logos, and all demeaning imagery. Therefore, the State Board requests all local education agencies (LEAs) to annually report to the Department of Public Instruction plans of action and actions implemented including (1) the review of local imagery, and (2) any activities to educate public school personnel of the educational, curricular, and psychological effects of using American Indian sport mascots and logos.

In light of No Child Left Behind and its requirements, the State Board's action is timely. American Indian students, both male and female, have the highest dropout rate of any ethnic group enrolled in our public schools. In 2001, American Indian students represented 1.47% of the total school membership and represented 2.7% of the total LEA dropout. Academic performance on end-of-grade and end-of-course tests has consistently improved; however, these

Superintendents

October 31, 2002

students continue to perform significantly lower than comparable students in the state. With this in mind, it is imperative that we encourage American Indian students to be successful in school and make sure schools are inviting places for them.

The Council will be responsible for collecting, analyzing, and reporting activities to the State Board. To assist school districts with this process and planning, the Council has compiled a list of resources and information, which is enclosed. In order to meet the deadlines for the annual report of the State Advisory Council on Indian Education, we need to have each LEA's report on activities and actions taken by March 28, 2003.

We thank you in advance for your cooperation and attention to this important issue. It is a timely reexamination and one that not only has the potential to improve learning environments for American Indian students, but will also support safe, orderly and caring environments for all students. For additional information, you may contact Priscilla J. Maynor, Senior Assistant to the State Superintendent, at pmaynor@dpi.state.nc.us or Louise Maynor, Council Chair, at lmaynor@gte.net.

APPENDIX N

DATA NOTES

Percentage of North Carolina American Indian Students Enrolled in the IEA Cohort vs. the Non-IEA Cohort (Figure 1)

The denominator (17,782) for the percentages of North Carolina American Indian students enrolled in the IEA Cohort vs. the Non-IEA Cohort is the total North Carolina American Indian/Alaskan Native student enrollment in 2018-19. The numerator (14,435) for the IEA Cohort percentage is the North Carolina American Indian/Alaskan Native student enrollment at the 19 Title VI school districts in 2018-19. The numerator (3,347) for the Non-IEA Cohort percentage is the total North Carolina American Indian/Alaskan Native student enrollment minus the enrollment for the Title VI school districts in 2018-19.

Data Source: <https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/school-accountability-and-reporting>

End-of-Course (EOC) Scores

EOC exams are the summative assessments administered to students enrolled in Math I, Biology, and English II courses. EOC scores indicate the percentage of students that scored Level 3, Level 4 or Level 5 (i.e. the percentage of proficient students). The numerator is the number students scoring Level 3, Level 4 and Level 5. The denominator is the number of eligible students.

Data Source: <https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/school-accountability-and-reporting>

End-of-Grade (EOG) Scores

EOG exams are summative assessments administered to students at grades 3-8. These include mathematics and English language arts at grades 3-8, and science in grades 5 and 8. EOG scores indicate the percentage of students that scored Level III or higher. The numerator is the number students scoring Level 3, Level 4 and Level 5. The denominator is the number of eligible students.

SAT Scores

The SAT is an assessment that provides educators an important measure of academic achievement as students prepare for post-secondary college and career opportunities. Typically, students take the test during their junior and senior years to assess their ability to reason, to solve problems, and to gauge the knowledge and skills they develop in their high school course work (College Board, 2017).

Data Source: 1) The College Board. (2018) State Integrated Summary 2018-19. North Carolina All-Schools. Atlanta: Southern Regional Office. 2) Western Interstate Commission for Higher Education (WICHE). Knocking at the College Door: Projections of High School Graduates by State, March 2012.

Participation Source: The numerator for the state percentages were taken from the North Carolina Public School State Integrated Summaries (College Board, 2016-17, 2018-19, and 2018-19). The denominators for the state and district percentages were taken from the Western Interstate Commission for Higher Education (WICHE), Knocking at the College Door, and the Grade, Race, Sex (GRS) by LEA files Division of School Business School Financial Reporting.

Performance Source: Mean total scores in this table were taken from the North Carolina Public School State Integrated Summaries (College Board, 2016-17, 2018-19, and 2018-19). The mean total score is the summation of the average Critical Reading score and the average Mathematics score.

AP Exam Scores

The College Board offers college-level courses in 34 subjects that may be taken by high school students. To facilitate access to AP exams to all students, the College Board does not require students to take an AP course before taking an AP exam. Thus, homeschooled students and students whose schools do not offer AP may take AP exams. Final AP exam scores are reported on a five-point scale. Although colleges and universities are responsible for setting their own credit and placement policies, AP scores offer a recommendation on how qualified students are to receive college credit or placement:

- 5 = extremely well qualified
- 4 = well qualified
- 3 = qualified
- 2 = possibly qualified
- 1 = no recommendation

Data Source: The College Board. (2018) State Integrated Summary 2018-19. North Carolina All-Schools. Atlanta: Southern Regional Office.

Participation Source: The numerators for the percentages in the AP data tables were taken from the North Carolina Public School State Integrated Summaries (College Board, 2016-17, 2018-19, and 2018-19); the denominators were taken from the Average Daily Memberships (ADMs) and the Grade, Race, Sex (GRS) by LEA files. (Division of School Business School Financial Reporting, 2016-17, 2018-19, and 2018-19).

Performance Source: The numerators and denominators for the percentages in this table were taken from the North Carolina Public School State Integrated Summaries (College Board, 2016-17, 2018-19, and 2018-19). Note: The percent of Test-Takers Scoring 3 or Higher is the number of test-takers who scored 3 or higher on at least one exam divided by the total number of test-takers.

ACT Average Scores:

The ACT is given to all 11th grade students and the average scores for the ACT are based on data collected from the North Carolina Department of Public Instruction Accountability department. The average scores are calculated from the overall ACT test scores, which include English, Math, Reading, and Science sections and have a score range of 1 to max score of 36.

Cohort Graduation Rates

The calculations for the Cohort Graduation Rate (CGR) begin when students enter the 9th grade for the first time and are based on data collected from the public schools through the authoritative sources. CGR is calculated by dividing the number of graduates by the number of students who should have graduated within the designated cohort.

Data Source: <https://www.dpi.nc.gov/districts-schools/testing-and-school-accountability/school-accountability-and-reporting>

Dropout Rates

North Carolina General Statute 115C-12(27) requires the compilation of an annual report of students dropping out of schools in the state. Dropouts are reported for each district and charter school in the state, and "event dropout rates" are computed. The event dropout rate, or simply the "dropout rate," is the number of students in a particular grade span dropping out in one year divided by the total students in a specified grade span.

Special Abbreviations and Notations

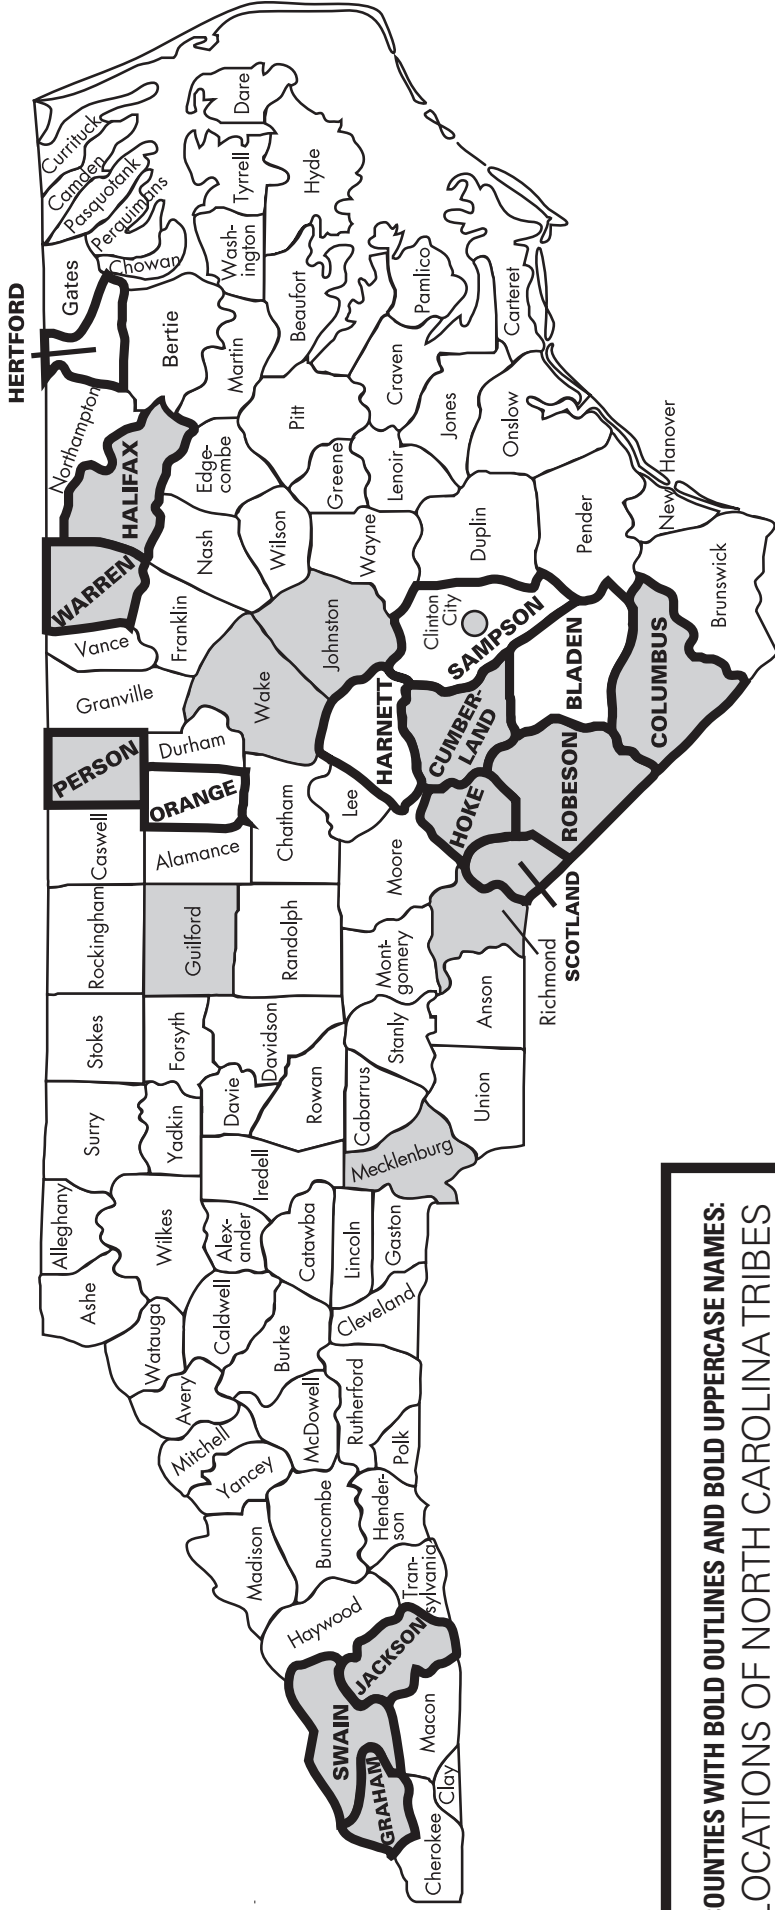

In the footnotes of some of the figures and tables in this report, abbreviations and notations are used to describe the data. The asterisk (*) indicates that the student population in the racial/ethnic group is too small for the value to be reported. In this report, in compliance with federal privacy regulations (FERPA), an asterisk indicates fewer than ten students were in the cohort. Another FERPA regulation is use of <5 or >95 notation which indicates the percentage and number of students are not shown because the actual percentage is greater than 95% or less than 5%. Compliance with these federal regulations ensures that student information remains anonymous (DMG-2009-004-SE). The use of n/a indicates that the current year's data is not available or no scores for the selected test or racial/ethnic group.

Short Term Suspension Data

A short-term suspension equates to a student being suspended for 10 days or less. The data in this section reflect total numbers of short-term suspensions that may include multiple suspensions per student, as some students receive multiple short-term suspensions each year. The charts and tables in this section represent numbers of suspensions, not numbers of unique students. For this year's report, short-term suspension rates are calculated per 1,000 students, not per 100 students as was the case in previous years.
