IHE Master's Performance Report

Duke University

2013 - 2014

Overview of Master's Program

The Master of Arts in Teaching Program at Duke University was developed in 1988 as a collaborative effort between Durham's two public school systems and the Graduate Faculty of Arts and Sciences at Duke. The aims of the Program were then, as they are now, to produce liberally educated, reflective teachers who have extensive knowledge of their teaching fields; who see themselves as scholarly educators; and who have a positive impact not only on their students, but also on the teaching professional. To meet these goals, the MAT Program has established the following objectives: to attract exceptionally well-qualified candidates with strong liberal arts backgrounds into the teaching profession; to give students further depth in their academic disciplines by requiring they complete graduate work in their teaching fields; to give students the professional knowledge and skills they need to teach their discipline to diverse students; to give a central role to highly skilled mentor teachers in the training of new teachers; and, to teach MAT candidates the skills of reflection and analysis so that they can diagnose and solve problems of teaching and learning and make ethical decisions about the education of their students. Approved by the North Carolina State Board of Education to recommend its graduates for M licensure, the MAT Program continues the collaboration between the local education agency and the Graduate School Faculty in the design, curriculum, and delivery of the Program and the evaluation of how well the Program meets its goals.

Special Features of Master's Program

The Master of Arts in Teaching Program at Duke University is a program of the Program in Education in the Trinity College of Arts and Sciences. The director reports directly to the Chair of the Program in Education. An Advisory Committee comprised of tenured faculty from each of the academic disciplines with which the program collaborates, a representative from Durham Public Schools, and the University Licensure Officer, oversee the policies, practices, admissions procedures and relationship with the LEA. A committee of two or three members of the Advisory Committee interviews each application candidate who is deemed to be admissible. Once admitted to the Program, MAT students divide their time between graduate level course-work in their academic field (5 courses or 15 credit hours) and education course-work (21 credit hours, including a 27-week internship in the Durham Public Schools.) All education faculty within the MAT Program are practitioners. Durham Public Schools teachers who mentor MAT students are carefully chosen for their skills as teachers and as coaches. They are named instructors in the Graduate School and they are required to complete mentor training, which is provided by Duke.

II. CHARACTERISTICS OF STUDENTS

A. Headcount of students formally admitted to and enrolled in programs leading to licensure.
