IHE Master's Performance Report

Elon University

2013 - 2014

Overview of Master's Program

The M.Ed. program at Elon University builds upon professional competencies of experienced classroom teachers. Candidates select a 33-semester hour program of study in elementary education, gifted education, or special education (general curriculum). All candidates take core courses in research, testing and measurement, advanced psychological theory, consultation and collaboration, and a capstone advanced graduate seminar. Core courses provide candidates with conceptual understandings including the logic of controlled research and the principles of statistical analysis, measurement concepts and the elements of sound test construction. These essential understandings are integrated with fundamental psychological principles of learning, development, and motivation theory. The advanced seminar gives candidates an opportunity to consider current trends and issues in education and their own future role as educational leaders. In addition to the graduate core, each of the programs of study has its own set of content specific courses. In Elementary Education, candidates examine the theoretical and philosophical bases for practices in education, study principles of effective instruction, and consider the changing roles and responsibilities of teachers in working with diverse student populations and their families. The Gifted Education core provides candidates with opportunities to study curriculum development and instructional methods that are especially appropriate for students who are academically or intellectually advanced. Attention is given to populations that are underrepresented in gifted education and to the social and emotional needs of students who are gifted. The Special Education core concentrates on developing an advanced understanding of the legal and historical issues that drive special education. Candidates explore the research base for effective instructional and behavior management techniques and learn about recent assessment methodologies. A 3-semester hour internship gives special education candidates and gifted candidates the opportunity to apply advanced instructional skills. In addition to required and elective coursework, candidates complete a graduate portfolio as their culminating product of learning. The purpose of the portfolio is to give candidates the opportunity to demonstrate the characteristics, behaviors, understandings, and skills of master teachers. Required portfolio components reflect the five knowledge and skill areas identified in the standards for the master's license. Each portfolio is assessed by three independent evaluators selected from the faculty and school district personnel. Once approved, candidates present their portfolios to peers, faculty, school district personnel, and invited guests during the final section of the Advanced Master's Seminar.

Special Features of Master's Program

Summer and Online Courses – The M.Ed. program at Elon University offers all of its courses either during the summer (on campus) or during the academic year online. This course schedule gives teachers interested in pursuing a graduate degree the opportunity to do so in a timeframe that fits well with their professional schedules. Courses are taught in two three-week sessions during the summer and are purposefully scheduled to match start and end dates of local school district calendars. The Cohort Program is a special configuration of summer/online courses that gives candidates the opportunity to enter the program as a cohort in the summer and continue through two subsequent summers to complete the program in two years and two months. Candidates who enter as part of a cohort and remain with the cohort pay a substantially reduced tuition. Part of the impetus for setting up this special cohort program was to give Visiting International Faculty (VIF) the opportunity to obtain a Master of Education degree during their three-year teaching experience in the United States. While designed specifically to meet the scheduling demands of VIF, the program gives all candidates the opportunity to earn the M.Ed. in a timely fashion and at a reduced cost. Currently in the fourteenth year of this program, feedback from area teachers and enrolled candidates remains very positive. The cohort program gives candidates the opportunity to immerse themselves in graduate study and to form close, collaborative relationships with other teachers from nearby districts and around the world. The blend of local and international candidates enhances class discussions and broadens the perspective of all candidates. For the academic years 2011-2012 and 2012-2013, the VIF enrollment numbers declined reflecting the economic trends in the country. Beginning 2013-2014, the VIF will enroll first in the elementary education add-on licensure, work for a year in the United States while getting licensed and then enroll in the M.Ed. program. Study Abroad Opportunity - One of the electives we make available for Elon M.Ed. candidates is the opportunity to study abroad in Costa Rica for a 10-day period during one of the 3-week summer sessions. Beginning 2013-2014, the elective course entitled Comparative Issues in International Education, has been converted to a core course. In 2015, the graduating cohort will be the first cohort to study abroad as a core course. In this course, candidates identify a question about how the U.S. and Costa Rica differ in regard to some educational issue, and another question on how they can return to the United States better equipped to teach Latino/Latina students. During their time abroad, the candidates focus on seeking answers to their questions by observing urban and rural schools, asking teachers and administrators questions, referring to literature and research, and visiting resources like the Ministry of Education. At the end of the course, they make class presentations to students and faculty. Personal Attention – A highly valued feature of Elon's graduate program is the close personal attention candidates receive from the graduate faculty and university staff. Professional relationships frequently continue after graduation with graduates serving on committees, participating in classes, and hosting student teachers from Elon.

II. CHARACTERISTICS OF STUDENTS

A. Headcount of students formally admitted to and enrolled in programs leading to licensure.

	Ful	ll Time			
	Male		Female		
Graduate	American Indian/Alaskan Native		American Indian/Alaskan Native		
	Asian/Pacific Islander		Asian/Pacific Islander		
	Black, Not Hispanic Origin		Black, Not Hispanic Origin
