

# Identification of Schools

## Comprehensive Support & Improvement (CSI)

List is composed of the bottom 5% of Title I schools according to the All Students group's total score.

List also contains all high schools with a 4-year cohort graduation rate of less than 66.7 percent (regardless of Title I funding).

Identification of schools will take place every 3 years. However, exit criteria is applied after the 4<sup>th</sup> year on the CSI list. year.

## Targeted Support & Improvement (TSI) – Consistently Underperforming

List is composed of schools with a subgroup (N  $\geq$  30 students) receiving a grade of “F” for the most recent and previous 2 years. However, the initial identification in 2019-20 will only use 17-18 & 18-19 data. The 2018-19 list will be a “watch list” (regardless of Title I funding).

Identification is yearly. Exit criteria is also applied at the end of each year.

## Targeted Support & Improvement (TSI) – Additional Targeted Support

List is composed of schools identified in that year as having Consistently Underperforming (CU) subgroups where the School Performance Grade of the identified CU subgroups is lower than the highest identified CSI school's All Students group total score in the identification year (regardless of Title I funding).

Note: In 2018-19, the list will be created from all schools and all subgroups (N  $\geq$  30) without first being identified as a CU subgroup.

Identification of schools will take place every 3 years. Exit criteria is applied after 3<sup>rd</sup> year.

## CSI – Additional Targeted Support Not Exiting Such Status

Beginning in 2021-22, identification of schools will take place every 3 years and list is composed of Title I schools in TSI – Additional Targeted Support that do NOT meet the exit criteria.
