§ 115C-81.5. Standard course of study.

(a) All children can learn. It is the intent of the General Assembly that the mission of the public school community is to challenge with high expectations each child to learn, to achieve, and to fulfill his or her potential. With that mission as its guide, the State Board of Education shall adopt a plan of education and a standard course of study as provided in G.S. 115C-12(9c) for the public schools of the State. It is the intent of the General Assembly that the focus of State educational funding shall be to ensure that each student receives a sound basic education. It is further a goal of the General Assembly to provide supplemental funds to low-wealth counties to allow those counties to enhance the instructional program and student achievement. Instruction shall be offered in the areas of arts, communication skills, physical education and personal health and safety, mathematics, media and computer skills, science, second languages, social studies, and career and technical education. In addition, instruction shall be offered in all of the areas provided in this Part.

(b) The standard course of study shall provide all of the following:

1. A core curriculum for all students that takes into account the special needs of children.
2. A set of competencies, by grade level, for each curriculum area.
3. A list of textbooks for use in providing the curriculum.
4. Standards for student performance and promotion based on the mastery of competencies, including standards for graduation, that take into account children with disabilities and, in particular, include appropriate modifications.
5. A program of remedial education.
6. Required support programs.
7. A definition of the instructional day.
8. Class size recommendations and requirements.
10. Material and equipment allotment ratios.
11. Facilities guidelines that reflect educational program appropriateness, long-term cost efficiency, and safety considerations.
12. Any other information the Board considers appropriate and necessary. (2017-126, s. 5.)
NCDPI reviews each set of content standards every five-to-seven years to ensure clear, relevant standards and objectives.

NCDPI uses a uniform and formalized system built on four guiding principles:
- Feedback-based
- Research-informed
- Improvement-oriented
- Process-driven
NC Standard Course of Study

- Defines the appropriate content standards for each grade or proficiency level and each high school course
- Uniform set of learning standards for every public school in North Carolina
- What students should know and be able to do by the end of a year or course
The purpose of the Internal Procedures Manual is to provide a definitive explanation of the process to be followed when developing or revising a section of the NCSCOS.

This manual is designed solely to assist with the task of developing/revising a content area of the NCSCOS. It is not intended to guide the development/revision of local curriculum guides or other curriculum support documents.

Approved in February 2022/April 2023
